

ANNUAL REPORT

OF

Financial Transactions

OF

Municipalities and Counties of California

For the Year 1915

Compiled and published by authority of Chapter 550, Statutes of 1911

JOHN S. CHAMBERS, State Controller

CALIFORNIA
STATE PRINTING OFFICE
1916

INTRODUCTION.

FINANCIAL TRANSACTIONS OF CALIFORNIA CITIES AND COUNTIES, WITH COMMENT, DISCUSSION AND DATA.

JOHN S. CHAMBERS, State Controller.

It is very gratifying to announce that this, the fifth annual, issue of the Financial Transactions of the Municipalities and Counties of California, contains full reports from each of the 239 incorporated cities and the 58 counties of the State. No other previous issue, the first of which was published in 1911, was so complete. In each of the four years, several of the municipalities failed to comply with the law, and in 1914 six counties neglected to respond.

The Legislature of 1915 amended the act governing the publication of these statistics by providing for a heavy penalty in case of delinquency and this fact, no doubt, was given due consideration by the few officials who may have been inclined to be careless. But it is only just to say that nearly all the city and county officials concerned are showing not only a growing appreciation of the value of these annual publications but also a genuine desire to co-operate.

And I would be remiss if I failed to commend, also, Mr. G. Cooper, the statistician of the Controller's office. Upon him devolved the duty of gathering the statistical data and preparing it for publication. The marked improvement each year in the reports, culminating this year in the most complete and satisfactory of any of them is largely due to his efforts.

Comprehensive Data Needed.

The state government of California, while possibly not as intimately associated in a financial way with the governments of the cities and counties of the State as it was under the old general property tax system, still is very closely connected with them, nevertheless, and a proper conception of California's financial problems can be obtained without studying the field as a whole and the relation of the State to its subdivisions and their relation to it.

It is here this report plays an important part. Prior to 1911 there was no law calling for the gathering of this financial data at a central office and its annual publication. True, there were local publications of the kind made, but they were scattered and of no great value. Former controllers made efforts now and then to assemble data of this kind for the purpose of publication, but having no law to back them

TABLE OF CONTENTS.

INTRODUCTION

TABLE I.	MUNICIPALITIES—Class, Population, Estimated Population.	1
TABLE II.	MUNICIPALITIES—Fiscal Year, Area, Assessment Roll, Bond Debt	1
TABLE III.	MUNICIPALITIES—Receipts Classified According to Source.	2
TABLE IV.	MUNICIPALITIES—Payments Classified in Accordance With Governmental Functions Performed.	4
TABLE V.	MUNICIPALITIES—Detailed Report of Taxes, Licenses and Permits, and Subventions and Grants.	5
TABLE VI.	MUNICIPALITIES—Detailed Report of Fees, Charges for Service, and Minor Sales by Departments.	7
TABLE VII.	MUNICIPALITIES—Detailed Report of Payments for General Government and Protection to Persons and Property.	7
TABLE VIII.	MUNICIPALITIES—Detailed Report of Payments for Conservation of Health and Sanitation and Promotion of Cleanliness.	8
TABLE IX.	MUNICIPALITIES—Detailed Report of Payments for Highways and Recreation.	10
TABLE X.	MUNICIPALITIES—Detailed Report of Receipts and Disbursements of Water Works System.	11
TABLE XI.	MUNICIPALITIES—Detailed Report of Electric Light Plants.	11
TABLE XII.	MUNICIPALITIES—Detailed Report of Wharves, Docks, Landings, etc.	11

TABLE XXX.	COUNTIES—Detailed Report of Payments for Education.	2
TABLE XXXI.	COUNTIES—Detailed Report of Payments for Trust Funds, Interest and Redemption of Debt.	2
TABLE XXXII.	COUNTIES—Detailed Report of Payments for Agency Transactions for State and District and Special Taxes.	2
TABLE XXXIII.	COUNTIES—Detailed Report of Property Owned by.	2

met with practically no success. Following the act of 1911, the situation changed for the better and each year has witnessed a marked improvement in the annual report.

The forms used for recording the data are those approved by the Census Bureau of the United States. When all the cities and counties respond, as they have done this year, a complete survey of the financial field in connection with state reports that are always available, is made possible. Receipts and expenditures, the sources of the former, and the distribution of the latter, comparisons as to costs, and the aggregate of the tax burdens, can be ascertained, as well as other information necessary not only to an intelligent conception of how public business is carried on, but also as to how abuses may be stopped and reforms accomplished.

There is no doubt that the tax burden is increasing, in nation and state, city and county, not only in the case of the individual but also of the corporation. Expenditures become heavier each year. As the nation expands, the states develop, and the cities and counties grow in population, industries and wealth, so does the cost of government mount up. This result can not be avoided. And these various governments, too, are taking on, from time to time, new functions that add to the tax burdens of the people.

We can not, therefore, hope to escape a steady increase in proper expenditures, but more people to assess and more wealth to tax may prevent the burden in the individual case from becoming too heavy. But to accomplish this, expenditures must be held within legitimate bounds. It is necessary, therefore, to have accurate data, properly classified, that the situation may be studied intelligently. To this very desirable end, these annual reports certainly contribute.

VAST SUMS EXPENDED.

The tables that follow show in great detail the financial transactions of the cities and counties of California for 1915. Those who desire to study the situation closely, to compare county with county or city with city will find the data there. Students of financial matters as they affect our various forms of government will discover much of value and interest in the tables.

I propose, however, for this year at least, to confine the introduction to general matters of moment, believing that such a course will prove of more interest to the public and therefore of more value. It is highly desirable at this time, to awaken the interest of the people, to call their attention to the trend of affairs, and to bring home to them a realization of their financial situation. This is more likely to be accomplished by a general review than by comment too statistical in character.

For the fiscal year of 1914-15, or the year running from July 1, 1914, to June 30, 1915, the State of California collected from all sources available under the law the sum of \$29,830,182.34. And for the same period, the State's expenditures for all purposes amounted to \$36,529,593.04.

The total receipts of the incorporated cities of California for the same year were \$68,724,578.54 and their expenditures, \$69,922,592.41.

The counties of the State, for the same period, collected \$92,938,440.79 and spent \$95,218,542.74.

These figures do not tell a strictly accurate story, since the three totals, especially as to receipts, involve the same money over again, as in the matter of the motor vehicle tax, bond debt refunds, etc. The State, for instance, paid to the counties last year \$8,045,876.74 and received from them \$4,985,690.25. But the net totals are huge enough to merit earnest thought and a brief review may be in order.

The following tables, beginning with 1911, the first year in which the financial transactions of the cities and counties were published as a whole, and continuing to and including 1915, will show the growth of expenditures and receipts for the State and the subdivisions indicated, during the five years.

What Five Years Show.

STATE RECEIPTS.

1911	\$17,882,001 37
1912	21,445,956 99
1913	25,052,863 10
1914	35,895,013 58
1915	29,830,182 34

The high total of 1914 is due to the amount of bond sales that year; the transactions of the kind having been more than double those of a similar character in any of the other years. Allowing for this excess, 1914 would be in proportion to the other periods.

STATE EXPENDITURES.

1911	\$18,020,555 39
1912	18,601,877 28
1913	22,900,416 40
1914	28,655,022 55
1915	36,529,593 04

While space will not permit a detailed review of the expenditures for any one year, it may be well to give a general idea of the distribution of the money. In 1915, for instance, only a little over \$3,000,000 went for the support of the state government proper, including the legislative, judicial, executive, administrative, regulative, and defensive

branches; while over three times that sum, or \$9,325,569.50, was spent for educational purposes; four times the amount, or \$12,320,952.63, for constructive purposes, including the state highway, San Francisco harbor work, and the state engineering department, with the state hospitals costing over \$2,500,000 and the penal institutions, nearly \$1,500,000.

MUNICIPAL RECEIPTS.

(Including City and County of San Francisco.)

1911.....	\$46,777,803 61
1912.....	60,557,300 34
1913.....	63,838,310 05
1914.....	66,830,330 37
1915.....	68,724,578 54

MUNICIPAL EXPENDITURES.

(Including City and County of San Francisco.)

1911.....	\$43,808,965 13
1912.....	53,251,005 27
1913.....	67,089,259 86
1914.....	58,175,734 68
1915.....	69,922,592 41

COUNTY RECEIPTS.

(Less City and County of San Francisco.)

1911.....	\$41,345,925 99
1912.....	52,972,943 34
1913.....	55,702,561 83
1914.....	57,927,987 85
1915.....	68,457,388 51

COUNTY EXPENDITURES.

(Less City and County of San Francisco.)

1911.....	\$39,272,598 02
1912.....	49,766,336 20
1913.....	56,212,591 51
1914.....	55,263,728 23
1915.....	69,970,496 88

STAGGERING BONDED DEBT.

I have submitted these totals as to receipts and expenditures of the State, counties and cities that the tremendous extent of their financial transactions may be realized. It is not the purpose here to attempt to say how far they are justified, especially the expenditures. It would be impossible to do so, at this time at least, except perhaps as to the State, and even then it would be one man's opinion to a large extent. But there are certain phases of the general situation so open to comment and criticism that they should be discussed.

The most important, in my opinion, is that of the ever-increasing bond issues. The State of California, which until 1909 was conserva-

tive, now has outstanding and unpaid, bonds in the sum of \$31,311,500, and unsold but which will be disposed of in due time, new issues and balances of old ones totaling \$15,202,000.

The counties of the State, including the districts, are carrying a bonded debt of \$92,466,091.

The cities, including the city and county of San Francisco, which since the admission of California into the Union, have issued bonds to the amount of \$210,576,130, still owe \$129,059,913.

In other words, the State and its cities, counties and districts, not counting the unsold issues held by the State and its subdivisions, owe the staggering sum of \$252,837,504 in the shape of bonded debts, and upon which interest is being paid at rates running from 4 to 6 per cent, with the remnant of an old issue carrying 8 per cent. And the floating debt is also of vast proportions.

Cost of Long-Term Bonds.

Most of these issues are for long terms, but a single illustration will serve to show, if not the unwisdom of bond issues, generally speaking, at least the folly of long-term issues. At the election held in November, 1914, the people authorized a bond issue of \$3,000,000 for additional State buildings at Sacramento; \$1,000,000 for similar structures at San Francisco, and \$1,800,000 for University of California buildings, a total of \$5,800,000, bearing interest at from 4 to 4½ per cent and running for fifty years.

It is calculated that the interest at the end of the time will amount to \$8,500,000, or, say, in round numbers \$3,000,000 more than the total issue. In other words, the cost to the State will be almost \$14,500,000 for the privilege of erecting \$5,800,000 worth of buildings. The interest as figured will average about \$170,000 a year.

On the other hand, a direct general property tax of, say, five cents on the \$100 of assessed valuation for a term of four years easily would raise an amount in excess of the total of these bond issues, the money would be available year by year as needed, and there would be no interest or delay due to failure to sell bonds.

Short-Term Serials.

Time was when the long-term bonds were about the only kind that could be sold. The financial interests wanted them for investment purposes and it was largely due to their attitude and influence that public officials adopted a like stand. But sentiment has changed. It is the short-term bond that now is popular, not only from the point of view of the public and government agents, but also from that of bankers and financial men generally.

But we have to face, notwithstanding this change of view, the fact that the State and its cities, counties and districts now have out-

Assessment Rolls.

The total of the assessment rolls of the counties of the State for the fiscal year of 1915-16 was \$3,232,646,152, or \$78,800,592 more than for the year preceding. The "outside" rates ran from \$1.20, the lowest, to \$3.35, the highest, while the "inside" ran from 85 cents to \$2.95. The assessment rolls of the municipalities amounted to \$2,157,555,809. As no record, except here and there, has been kept of the value of property exempt from taxation in this State, it is not possible, of course, to say how much the total of the assessment rolls would be increased if such property were taxable, and the rates thereby reduced; but, excluding property owned by the federal government, the State and its cities and counties, the aggregate must be over \$50,000,000 and possibly \$100,000,000.

All property exempt from taxation should be assessed just as taxable property is and such rolls should be sent in to the Controller, or some other fiscal official or board, and full publicity given the figures that the people may be kept advised of the result and so can guide themselves accordingly. The constitutional provision that all property in California shall be taxed in proportion to its value is a pretty good rule to stand by.

UNIFORM ACCOUNTING.

The State Board of Control is now engaged in installing in the counties a uniform system of accounting and when that work is completed a similar service will be performed for the cities.

Uniform accounting makes for efficiency and economy. The cost of government as between similar units can be ascertained and thus regulated, overlapping of duties, unnecessary overhead charges, and waste detected and prevented. Uniform accounting and an efficient budget system—such as the State now has, for example—are powerful factors in reducing the cost of government. This fact should not be forgotten when considering revenue, taxation, and expenditures.

While the returns to the Controller's office for the purpose of aiding in the publication of these annual reports are now made upon approved forms, it does not follow that the records of the various city and county officials are kept in any such uniform manner. The contrary is the case. And the result is that the reports to the Controller involve a great deal of labor. But with a uniform system, which fits in with that endorsed by the federal officials, the work will be simplified and made much easier and more exact.

I would like to use here certain portions of a paper on Financial Reporting for Cities and Counties, read by the writer at the convention of the National Association of Comptrollers and Accounting Officers held at San Francisco in August, 1915. As there is practically nothing

10 ANNUAL REPORT OF FINANCIAL TRANSACTIONS.

over a quarter of a billion of dollars. This is not only a tremendous burden upon the present generation, but it will be upon coming generations, also. It would seem to be good policy, as short-term bonds grow more in demand, to refund these old long-term issues into new short-term issues, at no higher rates of interest than now prevail, and possibly lower, and thus make a determined effort to work off this great load.

Bond issues will not cease. Nor would it be possible to carry on our various forms of government and progress as we should, out of current revenues. But care should be taken to confine such issues to projects of the first importance, that could not well be paid for out of the ordinary revenue. And such bonds should be not only short-term—the time in large measure depending upon the nature of the contemplated work of improvement—but they also should be serial in character rather than payable at a fixed future date or optional. The payments, then, could be provided for in the annual tax levy and there would be no need of sinking or redemption funds, which sometimes are overlooked, sometimes unwisely invested and sometimes embezzled.

MILLIONS EXEMPT FROM TAXATION.

Another practice, or policy, that adds to the tax burdens of the many for the profit of a few is that of exempting certain classes of property from taxation. The value of such exempt property in this State today is away up in the millions and by just so much is the assessment of other property increased or the tax rate raised to meet the difference.

In San Francisco alone the value of church property exempt from taxation is about \$8,000,000; in Los Angeles County, in 1914, exempt property belonging to soldiers, totaled \$3,428,330; in San Francisco, \$621,000, and in Sacramento, \$140,000.

At the polls in November, 1914, the people voted to exempt from taxation, educational institutions of collegiate grade and ships of more than fifty tons displacement. And last year, 1915, the assessed value of these two new classes of exempt property amounted to over \$9,000,000. And other classes of property, as a result, carried just that much more of a load.

Prior to 1894, the only property in California exempt from taxation was that to which this State or the United States held title, property owned by cities and counties, growing crops, property used exclusively for public school purposes, free museums and free libraries. Property of Stanford University, the California School of Mechanical Arts, the California Academy of Science and the Cogswell Polytechnical College, was exempted later. Personal property of every household in the

new to add and the situation was covered then as well as it could be now by the writer, I will quote as follows:

The California Situation.

* * * For a number of years there had been speculation as to the cost of government in California. The only data available was the amount raised by the general county rate. There was no record of special and district taxes or of miscellaneous receipts from other sources. The revenues and expenditures of municipalities were unknown. Nobody could tell the total rate paid by the property owner.

This lack of information was keenly felt following the proposal to separate state and local tax sources. It was proposed the State should tax the gross earnings and franchises of the public utility and other corporations and that the counties should tax general property. That each should pay in proportion was admitted, but there was little data available for purposes of comparison.

In 1908, my predecessor made an attempt to gather material for a report on all such financial transactions, including city and county assessment rolls and tax rates. It was uphill work. There was no law to back him up. He had to depend upon the courtesy of county and city auditors and clerks. Many helped him, others would have done so had their time permitted, while the rest evinced no interest.

In 1911, however, the Legislature passed an act directing the Comptroller to publish annually the complete financial transactions of the counties and municipalities of California. Under this law, we have done the best we could, considering the smallness of our annual appropriation, the lack of uniform systems on the part of cities and counties and the failure each year of a number of officials to report.

The first schedule followed the main classifications of the United States Census Bureau and was used for two years. At the request of the League of California Municipalities, backed by a representative of the Census Bureau, the classifications were then changed to correspond entirely with those of the federal government.

It is very difficult, however, to have 300 men report and classify their receipts and disbursements correctly. Some time since we issued a small pamphlet as to classifications for the use of our smaller cities. If we could put trained agents into the field, this difficulty would be overcome.

We fully realize the shortcomings of our report and are striving to overcome them. The antiquated systems of accounting in use in most of our fifth and sixth class cities have been and still are a problem, but I venture to assert that during the past three years accounting methods have been improved over fifty per cent. And this is directly due to the uniform system of reporting required. The financial officer of a city or county prefers to keep his records so that it will not be necessary on July first of each year to review his entire work for that period.

Like the corner grocery, we are still in the age of Receipts and Disbursements, but are progressing steadily, if slowly, toward the standard of Revenue and Expenditures, and a Balance Sheet that actually will balance. * * *

As with other states, we have experienced difficulty in developing a schedule that will fit all cities and be applicable to the large as well as the small. But we have made progress along this line. We are making corrections from time to time and feel we are improving conditions constantly.

The many inquiries we now receive for copies of our financial report, the use made of it by tax experts and the suggestions they make for its improvement, as well as suggestions from others who are interested in accounting and revenue and taxation matters generally, convince us the report even now is valuable, and with greater uniformity, full returns from financial officials and more generous appropriations from the Legislature can be made of very great value to this State and perhaps other states as well.

PUBLIC SERVICE ENTERPRISES—MUNICIPAL.

In referring to increasing expenditures, where I gave figures on receipts and disbursements, I mentioned the fact that one cause of the growing cost of government was the assumption by the nation, state, cities and counties of new functions—functions heretofore performed, if performed at all, by individuals. The following digest of tables in this report relating to public service enterprises operated by cities, may prove of interest:

Water Works.

One hundred and four cities report water works as municipally owned, with receipts amounting to \$4,312,619.34, not including bond sales or service deposits. The sale of bonds amounted to \$2,306,139.91, and service deposits to \$11,991.69, making the total receipts \$6,630,750.94.

The disbursements for operation, maintenance, water purchased, etc., amounted to \$1,871,491.23; the bond interest and redemption to \$1,570,430.16; the outlays to \$5,021,950.54; and service deposits returned to \$2,229.76; making total disbursements of \$8,466,101.69.

The following general information on water works may be worth noting:

Ninety-six plants furnish 198,662 consumers; 48 plants used 16,182,500,973 gallons of water during year; 90 plants have 3,224.04 miles of mains; 97 cities have 14,917 fire hydrants owned by the cities; 13 plants are operated by gravity; 66 plants are operated by pumps; 19 plants are operated by both; 63 plants get their supply of water from wells; 12 plants get their supply of water from streams or rivers; 8 plants get their supply of water from springs; 15 plants get their supply of water from two or more sources; 22 plants were acquired in 1900 or previous; 35 plants were acquired between 1901 and 1910; 29 plants were acquired between 1911 and 1914; 6 plants were acquired between 1914 and 1915; 90 plants and systems cost \$48,160,953.89.

Electric Light Plants.

Seventeen plants reporting give total ordinary receipts of \$782,818.78; sale of bonds, \$5,000, and service deposits, etc., \$3,590.13; making a total of \$791,408.91.

The disbursements were as follows: Ordinary expenses, \$466,982.22; interest and redemption of bonds, \$44,963.29; service deposits returned, etc., \$2,126.08; outlays, \$164,930.01, making a total of \$679,001.60.

The following data may be of interest: 12 plants buy their electricity; 5 plants generate their electricity; kilowatts purchased and generated, 24,133,282; 545.96 miles of pole line and conduit; 13 plants cost \$2,344,261.44.

Wharves and Docks.

Cities operating wharves, docks, etc., report, in the aggregate, as follows:

Thirteen report receipts of \$147,816.51, and disbursements of \$1,065,732.75, of which \$847,698.94 was for outlays and \$106,888.20 for bond interest and redemption, leaving the operation and maintenance expense \$111,145.61.

Seven cities have 35,737 feet of wharves, docks, etc., at a cost of \$4,253,340.33.

Gas Plants.

Santa Clara is the only municipality in the State operating its own gas plant, the details of which may be found in Table XIII. There are three other municipally owned gas plants not operated by the cities.

ESTIMATED POPULATIONS.

The populations of the various cities of the State as given in Table I of this report, are based upon estimates. It is not claimed that they are correct, but presumably they are approximately so—at any rate they are as near the mark as the various city clerks or auditors can hit it after careful investigation.

As a matter of fact, the population of the State is not known, although the difference in the totals as ascertained by three methods is not great, 150,000 separating the highest from the lowest, as follows:

School census method.....	3,004,000
Registered vote method.....	2,878,470
United States census method.....	2,854,727

On the basis of the percentage of increase according to the census bureau's method, the rural population of the State should be 837,781. The cities claim 2,450,181. The two figures give a total of 3,287,962, which exceeds the highest estimate by any of three methods indicated. It appears safe to assume that the cities in arriving at their estimates were a little too enthusiastic. Either of the figures under the three million estimate is likely to be practically correct.

TABLE I. MUNICIPALITIES.

SHOWING CLASS, POPULATION ACCORDING TO 1910 CENSUS AND POPULATION ESTIMATED BY CITY CLERKS AND AUDITORS, JUNE 30, 1915.

No. of city in tables	City	Class	Population per 1910 Census	Estimated population June 30, 1915
124	Alameda	City	23,383	30,000
144	Albany	City	808	1,900
14	Albany	City	5,021	9,000
26	Albany	Town	916	1,900
130	Albany	Town	402	550
218	Alviso	City	1,009	1,400
234	Amador	City	2,025	4,175
65	Anaheim	City	1,124	2,500
93	Angels	City	606	2,000
131	Antioch	City	1,121	1,050
181	Arcadia	City	1,121	1,400
174	Arcata	City	1,200	1,200
225	Arroyo Grande	City	2,370	2,300
90	Auburn	City	750	750
207	Avalon	City	1,477	2,000
121	Azusa	City	12,727	19,229
13	Bakersfield	City	51	1,500
172	Banning	City	75	75
191	Beaumont	City	31	55
229	Belvedere	City	2,300	2,400
111	Benita	City	40,434	60,000
6	Berkeley	City	493	59
226	Beverly Hills	City	1,190	1,700
231	Biggs	City	61	61
137	Bishop	City	507	3,000
211	Blue Lake	City	881	2,000

11. Stockton	Undetermined	16,230	Wood and concrete.	200,000 00	1914	12 cratis docketed.
20. Santa Cruz (7 mos.)	Undetermined	2,610	Wood	\$99,582 77	1914	8,828 tons handled.
Totals		33,731		\$1,233,340 33		

TABLE XIII. MUNICIPALITIES.

DETAILED REPORT OF GAS PLANTS.

Town of Santa Clara--	
Receipts from operation	\$13,670 12
New connections	120 00
Meter sets	68 00
Lamp rents	177 00
Sales of material	107 95
Charges for extensions	25 00
Charge to town for gas	109 62
Total revenue	\$14,277 69
Administration expenses	
Operation expenses--	\$1,616 80
Labor	
Supplies	1,205 25
Maintenance expenses--	3,718 75
Labor	
Material	1,205 25
Water	1,885 13
Gas	1,611 24
Insurance	18 75
Electricity	54 00
	443 60
Expenditures from revenue	\$11,188 77
Bond interest	\$1,350 00
Bond redemption	750 00
Interest and redemption of bonds (non-revenue)	\$2,100 00
Other Data.	
Number of consumers	676
Cubic feet of gas made	13,730,000
Cubic feet of gas sold	11,276,600
Cubic feet of gas used by town	150,700
Cost per cubic foot based on total output	\$1.04
Meter rate per thousand cubic feet	\$1.25
Minimum rate per month	\$5.50
Miles of mains in operation	17
Character of gas manufactured	Gas
Value of plant	\$13,000 00

TABLE XIV. MUNICIPALITIES.

REPORT OF MUNICIPAL STREET RAILWAY OF SAN FRANCISCO FOR FISCAL YEAR 1915.

Revenues.

	Amount
Receipts from operation	\$1,650,191 26
Advertising	7,089 15
Taxes	23,442 53
Sale of material, etc.	3,601 21
Bond redemption fund	271,600 00
Bond interest, etc.	35,412 79
Refunds bond interest	2,042 66
Charges for labor	843 53
Refund accrued interest	2,189 08
Earned interest bond investment	2,929 07
Total current revenues	\$2,048,938 83
Excess expenses over revenues	80,234 47
Sale of bonds	\$2,108,173 40
Transfers from other funds	1,708,855 00
Depreciation fund	966,191 36
	432,759 59
	\$5,215,949 35

Expenses.

Administration expenses	\$101,770 03
Operation expenses--	802,573 31
Labor	151,340 93
Supplies	
Maintenance--	116,530 43
Labor	45,201 77
Material	*134,229 15
Purchase various municipal bonds	
Purchase Geary Street Railway bonds, 1910	\$12,208 25
Purchase Market Street Railway bonds	6,018 00
Purchase of Garbage bonds	*8,071 11
Purchase land, right of way, etc.	*73,101 50
Taxes refund	63 94
Depreciation fund--purchase of bonds	*416,100 83
Bonds--interest	217,877 50
Total current expenses	*\$2,108,173 40
Outlays--construction	12,652,573 37
Transfers to other funds	\$4,160,736 77
Revenue over expense	1,035,202 58
	\$5,215,949 35

*It will be observed from the above statement and report that the expenditures for the year was \$2,108,173.40, which amount includes the acquirement of lands for right of ways, etc., amounting to \$73,101.50, as also the purchase of municipal bonds out of the reserve fund (known and designated as the Depreciation Fund) amounting to \$416,100.83, also the purchase of various municipal bonds out of the revenues, amounting to \$180,317.51, aggregating \$609,809.80, which amount segregated shows as follows:

Investment Fund	\$596,708 39
Acquired land--right of way, etc.	73,101 50
	\$609,809 80

†New construction and improvements to car barns, etc., \$2,052,573.37.
