TABLE I. MUNICIPALITIES—Class, Population, Estimated Population	16
TABLE II. MUNICIPALITIES—Fiscal Year, Area, Assessment Data, Bond Debt	18
TABLE III. MUNICIPALITIES—Receipts Classified According to Source	26
TABLE IV. MUNICIPALITIES—Payments Classified in Accordance With Governmental Functions Performed	42
TABLE V. MUNICIPALITIES—Detailed Report of Taxes, Licenses and Permits	53
TABLE VI. MUNICIPALITIES—Detailed Report of Fees, Charges for Services and Minor Sales by Departments	74
TABLE VII. MUNICIPALITIES—Detailed Report of Payments for General Government	82
TABLE VIII. MUNICIPALITIES—Detailed Report of Payments for Conservation of Health and Sanitation and Promotion of Cleanliness	98
TABLE IX. MUNICIPALITIES—Detailed Report of Payments for Highways	106
TABLE X. MUNICIPALITIES—Detailed Report of Receipts and Disbursements of Water Works System	122
TABLE XI. MUNICIPALITIES—Detailed Report of Electric Light Plants	134
TABLE XII. MUNICIPALITIES—Detailed Report of Wharves, Docks, Landings, etc.	137
TABLE XIII. MUNICIPALITIES—Detailed Report of Gas Plants	138
TABLE XIV. MUNICIPALITIES—Detailed Report of Municipal Railway of San Francisco	139
TABLE XV. MUNICIPALITIES—Value of Property Owned by	140
TABLE XVI. MUNICIPALITIES—Detailed Report of Bonds, Showing Issues, Dates, Amounts, etc.	148
TABLE XVII. COUNTIES—Assessed Valuation, Tax Rate, and Bond Rate	172
TABLE XVIII. COUNTIES—Receipts Classified According to Source	174
TABLE XIX. COUNTIES—Disbursements Classified According to Governmental Functions Performed	178
TABLE XX. COUNTIES—Detailed Report of Taxes, Licenses, Fines and Penalties	182
TABLE XXI. COUNTIES—Detailed Report of Rents, Interest, Receipts, Subventions and Grants	184
TABLE XXII. COUNTIES—Detailed Report of Gifts, Donations, etc., and Fees	188
TABLE XXIII. COUNTIES—Detailed Report of Special Service Rendered	190
TABLE XXIV. COUNTIES—Detailed Report of Agency Transactions for State	194
TABLE XXV. COUNTIES—Detailed Report of Payments for General Government	198
TABLE XXVI. COUNTIES—Detailed Report of Payments for Protection to Persons and Property	200
TABLE XXVII. COUNTIES—Detailed Report of Payments for Conservation of Health, Sanitation and Promotion of Cleanliness	204
TABLE XXVIII. COUNTIES—Detailed Report of Payments for Highways, Bridges, etc.	206
TABLE XXIX. COUNTIES—Detailed Report of Payments for Charities and Corrections	208
TABLE XXX. COUNTIES—Detailed Report of Payments for Education	210
TABLE XXXI. COUNTIES—Detailed Report of Payments for Trust Funds, Interest and Redemption of Debt	212
TABLE XXXII. COUNTIES—Detailed Report of Payments for Agency Transactions for State	214
TABLE XXXIII. COUNTIES—Detailed Report of Property Owned by	216

INTRODUCTION.

JOHN S. CHAMBERS, State Controller.

While the purpose of this annual publication as to the financial transactions of the counties and municipalities of California is to submit data for the consideration of those who are directly interested and involved in the fiscal affairs of government, another field equally important is offered in making use of the information thus obtained so that it may be laid before the people of the state in such fashion that they will understand it easily and thus become acquainted with revenue and taxation matters and particularly with expenditures. The great need here, and presumably in other states as well, is the education of the people along governmental lines so that they will have a clearer idea of the functions of government and that they may vote more intelligently as to the direction of affairs. With this idea in view, I shall follow in this report the general lines followed in the report of 1915 and deal mainly with the cost of government. In addition to tables of the kind quoted last year, I will present a little further along in this introduction a new table which will show the cost by functions of our three main forms of government—the state, the county and the city. This should prove of much interest and great value.

As explained last year, the figures I use as to receipts and expenditures begin with the fiscal year of 1910-11, for two reasons: First, it was not until six years ago that the controller was authorized under the law to collect such data as now appears in these annual reports; and, second, it was in 1910-11 that our dual system of taxation went into effect, whereby the state derives its main revenue from corporations and the counties and cities from taxes upon general property.

I herewith submit a table showing receipts and payments, or expenditures, by the state, the counties and the cities. It will be noted that the city and county of San Francisco is included under the heading of "Municipal." Further, included in the gross expenditures, is money derived from the sale of bonds. In ascertaining the cost of government, this character of expenditure should only be considered when the bonds are redeemed. It is important to carry this distinction in mind. For instance, included in the disbursements upon the part of the state in 1916 will be found \$6,649,989.99 expended by the State Highway Commission in construction work. While the figures I give show gross disbursements, the time to consider the expenditure of money based upon the proceeds of bond sales is, as I have stated, when the bonds are redeemed.

Receipts and Payments.

The table showing gross receipts and gross payments follows:

STATE RECEIPTS.	
1911	\$17,882,091 37
1912	21,445,956 99
1913	25,052,863 10
1914	35,895,013 58
1915	29,830,182 34
1916	37,902,612 96
STATE PAYMENTS.	
1911	\$18,020,555 39
1912	18,691,877 28
1913	22,900,416 40
1914	28,655,022 55
1915	36,529,593 04
1916	36,085,889 77
COUNTY RECEIPTS.	
(Less City and County of San Francisco.)	
1911	\$41,345,925 99
1912	52,972,943 84
1913	55,702,561 83
1914	57,927,987 85
1915	68,457,388 51
1916	75,092,681 45
COUNTY PAYMENTS.	
(Less City and County of San Francisco.)	
1911	\$36,272,598 02
1912	49,786,336 20
1913	56,212,591 51
1914	55,263,728 23
1915	69,970,496 88
1916	74,649,396 73
MUNICIPAL RECEIPTS.	
(Including City and County of San Francisco.)	
1911	\$46,777,803 61
1912	60,557,300 34
1913	63,838,310 05
1914	66,830,330 37
1915	68,724,578 54
1916	68,305,640 66
MUNICIPAL PAYMENTS.	
(Including City and County of San Francisco.)	
1911	\$43,808,965 13
1912	53,251,005 27
1913	67,089,259 36
1914	58,175,734 68
1915	69,922,592 41
1916	65,183,196 44

Cost by Functions.

The new table to which I referred, showing the cost of our three main forms of government by functions, is here submitted. To arrange data in this fashion called for much thought and considerable work, because the classifications used by the state are not entirely identical with the classifications used by the federal government and which are fast coming into favor in our counties and cities. It was necessary to make new and complete segregations as to the three forms of government in order to properly classify the payments. This work was done by Mr. Claude E. Cooper, the statistician of the controller's office. The total cost of such governments, in California, for the fiscal year ending June 30, 1916, was \$175,868,482.94. It will be noted that the cost of county government was the highest, running \$74,649,396.73, while the cost of the state government was the lowest, running \$36,035,889.77, with the cities totaling \$65,183,196.44.

Education shows a total cost of \$43,983,893.90, but there is a duplication in this sum of \$6,533,332.71 which represents the money contributed by the state for the support of the elementary and the high schools and which, when received, was again expended by the districts for the support of such schools.

Agency transactions are where any particular form of government acts as an agent in behalf of another form. Thus the accompanying table shows agency transactions upon the part of the state amounting to \$1,789,773.58. As a matter of fact, such transactions by the state are far in excess of this sum, inasmuch as the state is really the agent in collecting a certain amount of money for the support of the local schools, just as it is in returning money to the counties and cities because of the old bonded indebtedness outstanding when the dual system of taxation went into effect and just as it is in the matter of returning 50 per cent of motor vehicle collections, less overhead, to the counties.

A study of the data at hand shows that the counties today are receiving approximately three dollars for every dollar the state receives from the counties.

To properly appreciate just what such a statement as follows means, the mass of detail contained in numerous other tables should be studied. It is not practicable in an introduction of this kind to make as clear as is desirable the entire situation.

	State	County	City	Total
General government	\$1,852,267 99	\$7,553,705 82	\$5,785,152 82	\$15,191,126 63
Protection to person and property	1,992,914 36	2,847,656 49	9,867,359 48	14,707,930 33
Conservation of health	232,717 62	102,682 17	623,078 31	953,478 10
Sanitation and promotion of cleanliness	68,875 97	36,985 20	3,903,158 89	4,014,020 06
Construction of roads, harbors, etc.	9,716,953 06	16,106,469 85	9,523,993 57	35,347,421 48
Charities and corrections	5,238,536 71	4,312,662 13	1,255,724 47	10,856,923 31
Education	10,312,493 99	28,871,314 28	4,800,080 63	43,983,893 90
Recreation	37,206 40	179,280 52	2,137,247 90	2,353,734 82
Miscellaneous	1,025,684 80	1,019,791 98	375,956 05	2,421,432 83
Interest on bonds	2,220,935 00	2,605,532 65	6,021,930 09	10,848,397 74
Redemption of debt	368,000 00	1,947,200 22	5,621,209 78	8,436,410 00
Trust funds	414,156 54	883,141 59	3,286,863 13	4,584,161 26
Public service enterprises			11,886,909 78	11,886,909 78
Payments to correct errors; accrued interest on bonds, etc.	215,363 75	95,711 25	89,531 54	400,606 54
Agency transactions	1,739,773 58	8,087,262 58		9,877,036 16
Totals	\$36,035,889 77	\$74,649,396 73	\$65,183,196 44	\$175,868,482 94

It may be worth while to submit a little more detail at this juncture for the purpose of throwing more light upon expenditures. Under the classification of "Construction" is included the work on roads, harbors, etc.; and it may prove of interest to know just what was disbursed in the state of California last year by the state, the counties and the cities for highway and street purposes. The grand total was \$33,544,733.52. The total chargeable against the state was \$7,914,270.10; against the cities, \$9,523,993.57, and against the counties, \$16,106,469.85. These totals include new construction, improvements, erection of bridges and other necessary structures, new streets, upkeep of streets, curbs, gutters, dust prevention and the maintenance of state roads and outlays for new highway construction.

Under the classification of "Education" the grand total expended for elementary school purposes was \$22,727,941.78, of which sum \$4,974,396.24 was for new buildings, sites, etc., and the balance for operation and maintenance. The high school cost in 1916 was \$5,443,427.07, of which sum improvements cost \$669,469.81, the balance \$4,763,958.16 going for operation and maintenance.

The cost of the various elections held in the state for the fiscal year ending June 30, 1916, was \$1,091,791.86.

I merely cite these illustrations to make clearer the meaning of the totals I am using and also to encourage the study of tables showing receipts and payments in detail. As to sources of revenue, purposes for which expenditures were made and functions of each individual city and county, statements V to XVI of cities and XX to XXXII of counties, have been compiled so that students of political economy and others interested may be able to see in detail what these various subdivisions are doing in a financial sense.

Bonded Indebtedness.

In the 1915 report I dwelt at considerable length on the bonded indebtedness of the state, the counties, districts and cities. The situation in such a short period has not changed much one way or the other, although it is a hopeful sign that of the bond proposals submitted to the people for approval last year, issues totaling \$12,679,500 were rejected. I am assuming that the people exercised proper judgment in these rejections. The stand I have taken is that we can not eliminate bond issues, but that they should be held to matters of the first importance, which would impose too heavy a present burden if undertaken by direct taxation. And such bond issues should be short-term serials, the life thereof not exceeding, and preferably being under the estimated life of the proposed improvement.

Eliminating the bonded indebtedness of certain districts, I find that the situation as of June 30, 1916, was as follows: Bonded indebtedness of the state, \$33,013,500; of the municipalities, \$135,567,045.39, and of the counties, \$56,461,189.94, making a grand total of \$225,041,735.33. The interest paid last year on the bond issues of the cities and counties amounted to \$8,627,462.74, while the total of bonds redeemed was \$7,568,410. In other words, the interest payments exceeded the redemptions by \$1,059,052.74. The total interest bill last year, including the state, was considerably in excess of \$10,000,000.

The figures given above do not include the state highway bond issue of \$15,000,000 which was approved in November, 1916, by the voters of the state, or other issues approved after June 30, last. I have deemed it better this year to hold the figures within the fiscal period treated of in the report, rather than perhaps confuse the situation by adding issues authorized after the end of the fiscal year.

In the 1915 report I illustrated the unwisdom of long-term bonds by certain calculations in the matter of the cost of new public buildings authorized by the people. This question to me is so serious that I would like to emphasize it, and I do not know a better way than to quote from

my biennial report as of January 1, 1917, in the matter of the \$10,000,000 San Francisco harbor bond issue, as follows:

"Under date of October 19, 1916, the Board of State Harbor Commissioners adopted a resolution directed to the Governor and to the State Treasurer, requesting the issue and sale of bonds to the amount of \$1,000,000, being a portion of the \$10,000,000 issue authorized by the San Francisco Harbor Improvement Act of 1913. As soon as these bonds are sold, the interest charges will immediately constitute an added liability against the monthly receipts of the harbor commission from rentals, etc., and in this connection the practicability of issuance of long-term bonds may be briefly considered:

"The \$1,000,000 issue above mentioned as a portion of the \$10,000,000 total authorized by vote of the people, together with the remaining \$9,000,000, presumably to be issued from time to time in the future, as necessity arises, are conditioned as follows:

"They are to bear interest at 4 per cent, payable semiannually. They are redeemable, by lot, on and after July 2, 1954, and the series will ultimately expire on July 2, 1989, so far as bonds unredeemed by lot prior to that date are concerned. Thus the first bonds redeemable (in 1954) will bear interest for some thirty-six years, and *each \$1,000 bond, in interest and redemption, will cost about \$2,440*. Future blocks of this issue will bear interest for various periods terminating at intervals between July 2, 1954, and July 2, 1989."

Exemptions From Taxation.

In 1914 the people voted to exempt from taxation educational institutions of collegiate grade not conducted for profit and, also, all vessels of more than fifty tons burden registered at any port in this state. About seven counties only are affected by this last amendment, but the total reduction in the assessment rolls because of its adoption, I can not give, since no returns are available. The exemption of educational institutions of collegiate grade resulted in taking from the 1916 rolls property previously assessed at \$1,751,920. The exemption of property belonging to soldiers and sailors, who had met certain requirements, totals in value \$9,451,574. It is impossible to say what is the value of church property exempted, because very few of the assessors any longer take note of such property, even for statistical purposes. As pointed out in the 1915 report, the property of this kind exempted in San Francisco amounted to \$8,000,000, alone.

Prior to 1894, the only property in California exempt from taxation was that to which this state or the United States held title, property owned by cities and counties, growing crops, property used exclusively for public school purposes, free museums and free libraries. Property of Stanford University, the California School of Mechanical Arts, the California Academy of Science and the Cogswell Polytechnical College, were exempted later. Personal property of every household to the extent of \$100 is exempted, too.

A number of constitutional amendments are at this writing before the legislature of 1917, the purpose of which is to exempt from taxation certain classes of property such, for example, as cemeteries, Young Men's and Young Women's Christian associations, mining claims under a certain figure, all personal property, except the franchises of public service corporations and all improvements on land.

Personally, I am opposed to the exemption of property from taxation under our present dual system. Our various forms of government must have a certain amount of money for maintenance and development. It is only right and proper that all property should pay a proportionate share of the cost of government. If this is not done, it means, where exemptions are granted, that other property is bearing an undue proportion. The total value of exempt property in California is very, very high. Unquestionably, this fact contributes to the heavy tax burden of which the people complain so much.

Assessments.

The grand total of the assessment rolls of the counties and cities for last year was \$3,577,877,764. Of this sum \$660,742,075 represents the assessment of operative property. By this is meant property of the public utility corporations withdrawn from local taxation and the gross earnings of which are taxed by the state for revenue purposes. This leaves the net nonoperative roll, or general property as taxed by the counties, at \$2,917,135,689.

It should be borne in mind that the receipts shown in the tables of this report, while collected in 1916, were based upon the assessment rolls of the year previous, which totaled \$3,232,863,959 and of which sum \$505,406,448 represented the sum total of operative property. Collections are still being made this year upon the rolls of 1916; and on the rolls of 1917, which are now under way, collections will be made next year, 1918. This distinction should be borne in mind.

The State Tax Commission, after an investigation extending through a period of many months, came to the conclusion that the ratio of assessed to true value in the matter of the assessment of property in this state, is approximately 42 per cent. On this assumption, the total true value of taxable property in California, eliminating the franchises of corporations taxed by the state, is \$8,518,756,580. In 1850 the total assessed value of property in California was \$57,670,689; in 1880, \$666,399,985; in 1900, \$1,217,648,863, and in 1909, \$2,439,566,493. From 1909 to 1916 there was an increase in assessed value of over \$1,000,000,000.

Referring to operative property, it probably would be well to call attention here, as I did in my biennial report of January 1, to a situation which I consider very serious. When the state's new system of taxation

went into effect, it was provided that the state should pay a certain proportion of the bonded debt outstanding at that time and which amounted to \$77,682,312.28, as well as a certain proportion of the interest. This proportion as to principal and interest was to be based on the assessment of the withdrawn public utility properties and applied thereto the current local bond rate. In 1911-12, the first year of these "refunds," the total refunded by the state to the cities and counties was \$650,324. The total claimed for 1915-16 was \$721,715.15. The amount of redemptions in 1916-17 was \$3,366,666.93. It is estimated that these redemptions average about \$3,000,000 a year. Yet, at the end of the fifth year, we are refunding to the cities and counties \$71,391.15 more than when these payments began.

In the past five years the increase in assessments of nonoperative property—that is property subject to local taxation—has been only a little over 26 per cent, while that of the operative property, which is assessed locally, but upon which assessments the state pays at the local bond rates, the increase has been 45.9 per cent. Comparing 1916-17 with 1915-16 the increase in the assessments of operative property amounted to 37.38 per cent, while that of the nonoperative was only 4.45 per cent.

It is plain to all, I assume, that the more of this old bonded indebtedness the state carries, the less will be the burden upon the counties and cities. Therefore, the temptation is strong to raise the assessments on operative property unduly; that is, out of proportion to the assessments on general property. This unquestionably has been one of the several causes in the production of the very unsatisfactory situation that exists. Another cause is the assessment locally of operative property which has come into existence since 1910-11. There are many who firmly believe that the assessment of these new properties as against the state is unjust and was not intended by the framers of the constitutional amendment which put our present tax system into effect. Another cause of increase is the assessment by certain counties, notably San Francisco and Los Angeles, of the franchises of the corporations as assessed by the State Board of Equalization for state purposes. Perhaps such assessment by counties is legal, but unquestionably it was not contemplated by those who framed the present tax system.

I do not know what can be done to better the situation, but it is obvious from the point of view of the state, at any rate, that the heavy increase in refunds year by year is hardly consistent with the heavy decrease in the principal year by year.

Annual Report.

The Annual Report.

Covering the financial transactions of last year, there are represented in this report 241 cities and towns, or, in other words, all incorporated municipalities, and also all of the counties. The city and county of San Francisco, it should be noted, is treated under the heading of municipalities, and also all of the counties. The functions performed in that subdivision are to a large extent the same as those of a county.

"Municipal." The functions performed by San Francisco are more those of a city than of a county. In that issue, which appeared last year because in that issue, which was published at the same time as the 1916 report, I expressed much gratification last year because I expressed much gratification city and town and the 58 counties of the fifth, every incorporated city and town and the 58 counties of the state were represented. The 1915 report was the most complete of the kind ever issued in California. Appreciating this fact, 1,500 copies were ordered from the State Printer. This indicates a very live concern on the part of the officials of the state and others interested in municipal reports.

The demand was so great that

the issue long since was taken up by the fiscal officials of the state upon the part of the statistics in these reports. Each revenue and taxation matters and the statistics are more closely

Each year shows a marked improvement in the manner in which the revenue is collected. Each year shows a marked improvement in the manner in which the revenue is collected. Each year shows a marked improvement in the manner in which the revenue is collected.

This office still has difficulties to overcome, due to a great extent to the want of data.

This office staff has difficulties to overcome, due to a great extent to the fact that the auditors and clerks of many of the cities are elected to serve a term of only two years. It would seem that more efficient work could be obtained by not changing the clerk or auditor oftener than once in four years. Another of our troubles is the segregation of outlay items from those of expense. When outlay items are betterment items from those of expense of a few cities far classed as expense, it runs the per capita expense down, consequently, the excess above those whose classification is correct and, consequently, the excess over and the legislative bodies of these few cities are in most cases accused of mismanagement. The fact that these figures are furnished unjustly of mismanagement renders it impossible in a great many cases by city and county officers to make all the corrections necessary to have for this department to report absolute correctness. In all cases where errors are discovered report incorrectly, the matter is taken up, adjusted and properly classified or amounts, however, assume the responsibility for corrections made. We can not, however, assume the responsibility for stating that the report is correct in all its details.

The manner in which to gather data for this report is for each city to send sufficient information in which to gather data for this report is for

[illegible]

system of accounting so that comparisons can be made and other data of value ascertained at minimum cost and less labor. In addition to the tables shown in this report, the following utilities are owned by the cities as enumerated:

- Incinerators—Palo Alto and San Jose;
- Public bathhouses—San Jose, El Paso de Robles;
- Markets—Long Beach;
- Pleasure piers—Santa Monica and Oceanside;
- Rock crushers—Placerville;
- Sewer system—Madera.

Bishop has a municipal water plant which is financed by a direct and no charge is made for the use of water. Yuba City, apparently, is in a class by herself. Water collected there, in connection with the municipal plant, totaled 100 per cent.

Many additions to public utility plants were made last year, either from the proceeds of bond sales or current revenues.

14 I can not at this time state the number of trained agents that would be necessary or what the cost would be, but I have no hesitation in asserting that the benefit to be derived would far exceed the expense. I earnestly hope that the next legislature will grant the Controller a sufficient appropriation to put this policy into effect.

In line with proper reporting of this character would come, of course, practical budget systems for the various counties and cities and uniform systems of accounting. Progress along these lines is being made, but not rapidly enough.

Population.

The question of population is always interesting. On July 1, 1915, in estimating the population, which was based upon the number of registered voters, we arrived at a state population of between 2,854,000 and 2,878,000. On January 1, 1915, the United States Census Bureau estimated California's population at 2,803,085. In 1910 the state had, according to the United States census, 2,377,549 people. This year, by working from the registered voters, there should be 2,956,430 people residing here, and we feel this figure is not far wrong. Last year the Superintendent of Public Instruction, estimating from the school census, gave the state a population of 3,004,000.

The only remedy for this uncertain state of affairs would be for this state to take, as many others do, a census every ten years, alternating with the federal government. We would then have an accurate census every five years.

Our cities are claiming this year a population of 2,508,719, leaving a rural population of only 447,711. Assuming that our method of estimating the state's population is approximately correct, the rural population figured on the census basis should be something like 850,000. From this it would appear that several or possibly the greater portion of our cities, in their zeal to grow, have over estimated their population about 400,000.

California, according to the census bureau's report, ranks tenth in population and second in area, having 155,652 square miles of land and 2,645 square miles of water. It is exceeded in area only by the state of Texas.

Public Service Enterprises.

It is worthy of note that in the majority of instances the reports as to the light and water plants of the different municipalities show that while they are furnishing these necessities at very reasonable rates, yet in most cases they are bringing in revenue to the city.

most cases they are bringing in revenue to the city.

201. Rocklin				
202. Susanville				
203. Hillsborough				

TABLE IX. MUNICIPALITIES—Continued.

Detailed Report of Payments.

Municipality	Cities	General (music, cele-brations, etc.)	Parks and trees	Other recrea-tion (play-grounds, etc.)	Outlays	Totals
204. Ferris		\$10 00				\$10 00
205. Calistoga						
206. Ross		\$19 50	268 95			288 45
207. Potter Valley						12 50
208. Susan						469 75
209. Avalon		469 75	87 25			557 00
210. Beaumont						
211. Concord			57 50			57 50
212. Corcoran		148 80				148 80
213. Elsinore					\$160 00	160 00
214. Morgan Hill						
215. Blue Lake						
216. El Cajon						
217. Phredaugh						
218. Loyalton						
219. Walnut Creek					421 16	421 16
220. Beverly Hills				\$132 18	2,288 14	4,779 86
221. Stanton						
222. Delano						
223. Alviso						
224. Belvedere			14 00			14 00
225. San Juan		10 00				10 00
226. San Marino						
227. Etna						
228. Biggs			7 00			7 00
229. Fort Jones						
230. Meritttrick						
231. Point Arena						
232. Slason			52 00			52 00
233. Tehachapi			16 25			16 25
234. Wheatland						
235. Montague						
236. Dorris			39 00			39 00
237. Hercules			34 18			34 18
238. Tehama						
239. Coram						
240. Gustine City						
241. Seal Beach						
Totals		\$175,091 10	\$1,097,848 37	\$337,325 90	\$806,787 53	\$2,187,247 90

TABLE XIII. MUNICIPALITIES.
Detailed Report of Gas Plants.

Town of Santa Clara	
Receipts from operation	\$11,084 40
New connections	125 00
Meter sets	62 00
Lump rent	122 45
Sales of merchandise	19 29
Extension charges	451 25
Gas used by town	240 81
	\$15,085 60
Administration expenses	
Operation expenses	\$1,584 65
Labor	1,350 00
Supplies	7,785 37
Maintenance expenses	
Labor	1,400 00
Material	2,982 81
Water	700 41
Gas used by town	18 75
Insurance	16 00
Electricity	378 27
Interest on bonds	1,350 00
Redemption of bonds	750 00
Total payments	\$18,004 66
Deduct outlays	4,785 37
	\$13,219 29
Profit	\$1,806 31
Depreciation	700 00
Net profit	\$1,106 31
Number of consumers end of year	688
Cubic feet of gas made during year	14,689,000
Cubic feet of gas sold during year	12,381,900
Cubic feet of gas used by town	172,100
Cost per thousand cubic feet	\$1.02
Meter rate per thousand cubic feet	\$1.25
Minimum rate per month	\$.50
Miles of mains in operation	17
Character of gas manufactured	Oil
Barrels of oil used	3,755
Price per barrel	\$.80 and \$.70
Value of plant	\$47,000.00

TABLE XIV. MUNICIPALITIES.

Report of Municipal Street Railway of San Francisco for Year 1916.

Receipts from operation	\$1,980,087 86
Sale of material	2,400 64
Miscellaneous receipts	44 75
	\$1,992,133 25
Expenses.	
Administration expenses	
Operating expenses	\$7,805 00
Labor	887,721 00
Supplies	825,956 00
Maintenance	
Labor	20,608 00
Material	8,820 00
Refund taxes	550 00
Injuries	11,176 00
Insurance	622 00
Purchase of lands	50,804 00
Purchase of library bonds	135,159 00
Construction account	280,959 00
Bond interest	286,650 00
Bond redemption	101,000 00
	\$2,085,980 00

TABLE XV. MUNICIPALITIES.
