INTRODUCTION.

This eleventh annual report is issued by the Controller of State under provision of chapter 550, Statutes of 1911, and covers the fiscal year beginning July 1, 1920, and ending June 30, 1921. It is compiled from data supplied by the city clerks and county auditors and is as authentic as the present system of securing reports permits. The Controller is appreciative of the cooperation afforded the department by the city clerks and county auditors of the state, who have so generously given of their time to the preparation of these reports, which are the basis of the statistical data here presented.

Referring to Table I, it is evident that some city clerks have rather exaggerated ideas when estimating the population of their respective cities. For this reason and in order to simplify comparisons with former years, and expedite the publishing of this report, the same classification based on the 1920 census, is used.

SCOPE OF REPORT.

The scope of this report covers a wide variety of subjects. The most important as to counties are (1) assessed valuations, tax rates and bonded debts; (2) total receipts, together with segregation of their sources; (3) total payments, segregated and classified as to governmental functions performed; (4) total value of public properties; and (5) a detailed report showing the segregation of the general tax levy and also the special and district tax levies.

As to municipalities, the principal subjects covered are (1) class of city and population; (2) assessment data, bonded indebtedness, tax rates etc.; (3) receipts classified according to source; (4) payments classified in accordance with governmental functions performed; (5) data on municipal service enterprises; and (6) values of public properties.

ASSESSMENT DATA.

The total assessed value of California as compiled from the various county assessment rolls and including the city and county of San Francisco is \$4,921,786,485, an increase of \$370,203,161 or 9 per cent over 1920. The percentage of assessed value to true value is, if we follow the report made in 1915 by the State Tax Commission, about 48 per cent making the total wealth of the state \$10,253,721,884, not including property which is exempt from taxation under our constitution.

The assessed value of the cities as shown by the city rolls and including the city and county of San Francisco is \$3,041,670,620, as against

\$1,640,991,350 in 1911. A large percentage of this increase is accounted for by the incorporation of a large number of cities and towns since 1911.

MUNICIPAL RECEIPTS AND PAYMENTS.

The total receipts of the cities amount to \$39,328,203.53. Of this \$51,849,453.72 (52 per cent) was derived from taxes. This means that if every person living within the limits of an incorporated city or town paid a per capita tax for the support of the municipal government it would have amounted to \$19.09, exclusive of county taxes.

It is interesting to note the effect of the passing of the liquor license on the receipts from licenses and permits. In 1916 the total receipts from this source amounted to \$4,701,379.97. Of this amount \$3,228,295.80 was produced by the liquor license; only \$1,229,085.60 from business licenses, and the balance from dog licenses, building permits, etc. Although there were no receipts from liquor licenses during the past year, there has been no material decrease in the amount produced by licenses and permits as the amount received from business licenses has increased about 200 per cent and totals \$3,720,849.58.

The total municipal expenditures amount to \$36.57 per capita, \$16.90 of which was for the protection of person and property, conservation of health, education, etc. Approximately 45 per cent of the cities' expenditures are for the payment of interest and redemption of bonds, maintenance, building and expenses of public service enterprises such as water works, electric light plants, etc., and unclassified expenditures. Municipal expenditures this year increased 22 per cent over 1920. I have therefore prepared the following table, using as a comparison the years 1916 and 1921, with the idea of showing the percentage of increase in the cost of the various branches of municipal government:

Function	1916	1921	Percentage of increases
General government.....	\$5,785,152 82	\$6,336,704 90	9.5
Protection to person and property.....	9,867,359 48	14,769,780 00	49.7
Conservation of health.....	623,678 31	1,008,748 92	62.0
Sanitation and promotion of cleanliness.....	3,968,158 89	4,257,267 23	8.9
Highways, etc.....	9,523,993 57	10,368,092 21	8.8
Charities and corrections.....	1,255,724 47	2,512,621 48	100.00
Education.....	4,800,080 63	7,358,497 81	53.3
Recreation.....	2,137,247 90	3,744,047 90	75.1
Miscellaneous.....	465,487 59	1,388,869 87	198.3
Public service enterprises.....	11,886,909 78	20,080,259 21	68.9
Interest and redemption of bonds.....	11,613,139 87	14,983,727 31	28.7
Trust.....	3,286,863 13	6,504,102 93	97.5
Totals.....	\$65,183,196 44	\$93,312,719 77	43.2

The above table shows that the principal cause of increase in the of municipal government is not in the administration of general government, but in the protection, privileges and services, such as police fire protection, conservation of health, education, libraries, and other branches that have become recognized policies of the city government.

COUNTY RECEIPTS AND EXPENDITURES.

Although the total receipts of the counties show an increase of 1 per cent over last year, the increase in payments amounts to 37 per cent. It is gratifying to know that the principal cause of this increase is practically the same as that of the city. In analyzing the county expenditures I find that the payments for education have increased \$23,933,408.11 amounts to 52 per cent of the total increase in county expenditures. I also find a noticeable increase in the amount expended for the maintenance and construction of highways, which amounts to \$10,899,10 being 24 per cent of the total increase. It will also be noticed that agency transactions have increased \$12,220,207.30 which is 24 per cent of total increase. These agency transactions are not payments for the of government but are moneys collected for the state, districts, and municipalities and then turned over to the civil division for which they collected.

The percentages of increase which appear in the above discussion amount to 103 per cent of the total increase in county expenditures. This being due to the fact that some of the division such as interest bonds and debt, and miscellaneous, show a decrease. These decreases being immaterial to the foregoing discussion were not taken into consideration, as I merely wish to show that the increase in county expenditures is not in the cost of administration, but due to the same conditions prevail in the municipal and state governments.

The following table shows the steady increase in receipts and payments for the past ten years:

Year	State receipts	State paid
1912	\$21,448,705 98	\$18,691 7
1913	25,053,719 58	22,960

1921	68,527,870 45	65,598

approximately \$550,000, the causes of which are as follows: \$210,000 in the printing department, made necessary by the printing of the bills and statutes passed by the legislature; \$100,000 for the purchase of ballot paper and printing of the constitutional amendments, and \$200,000 in the Motor Vehicle Department.

COST OF STATE GOVERNMENT.

In discussing the expenditures of the state government, I wish to call attention to the fact that this is the first year since 1916 that the receipts into the state treasury have exceeded the expenditures and they have done so by a margin of \$2,929,354.13.

In considering the principal causes of the increase in state expenditures during the past year, we first find that the apportionment to the counties from the Motor Vehicle Fund increased \$502,521.42, but this is beyond control, for as the receipts from the motor vehicle licenses increase or decrease, so will the apportionment, accordingly. There is an increase of \$1,100,000 in the amount expended for educational purposes and it will be remembered that the voters at the last election authorized a large portion of this increase.

We next come to the Industrial Accident Commission whose expenditures have increased \$1,400,000 during the past year, the greater portion of which is due to the increase in the payments of benefits from the Compensation Insurance Fund. There is an increase of \$330,000 made necessary by the meeting of the legislature which did not meet in the previous year. In the administrative departments we find an increase of

*Less city and county of San Francisco.

**Including city and county of San Francisco.

During the past decade, the total bonded indebtedness for all forms of government in California has increased from \$93,906,423 to \$321,616,238.66, or 242 per cent, while the wealth of the state has increased about 245 per cent. It is therefore easily seen that the bonded debt has increased in approximately the same proportion as has the wealth of the state. During the past year the total amount expended for interest and redemption of debt was \$27,559,297. To produce this amount, it would require a tax rate of 56 cents on every \$100 of assessed valuation.

CORRECTION TO ANNUAL REPORT OF FINANCIAL TRANSACTIONS FOR YEAR ENDING JUNE 30, 1922

(To be inserted in place of manuscript on page 10).

During the past decade the total bonded indebtedness for all forms of government in California has increased from \$93,906,423 to \$321,616,238.66 or 242 per cent, while the wealth of the State has increased about 60 per cent. This tremendous increase that aggregates more than 3 per cent of the total wealth of the State should have the attention of all tax levying bodies. California's credit must not be jeopardized by over financing and the same ratio of increase during the next ten years would impose confiscating tax burdens upon the people.

During the past year the total amount expended for interest and redemption of debt was \$27,559,297. To produce this amount it would require a tax rate of 56 cents on every \$100 of assessed valuation.
