INTRODUCTION.

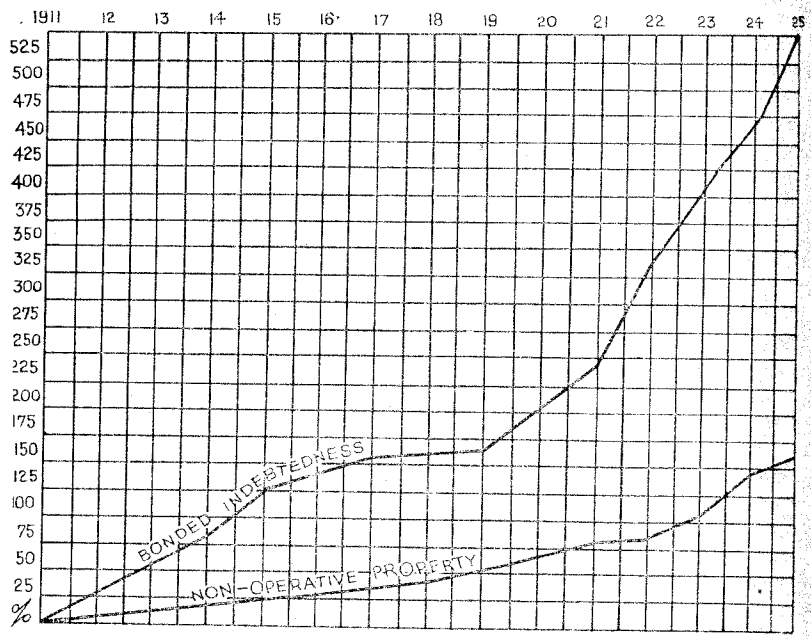
The legislative session of 1911 authorized the Controller's Department to collect statistical data concerning the cost of county and municipal government. The purpose was to enable public officials who were charged with the expenditure of public funds to compare costs between the various cities and counties, thereby serving as a check upon expenditures. Ordinarily, statistical information furnishes little intellectual entertainment; however, the story told in the sixteen issues of this report is the story of California—a state that has expanded so rapidly in these years that comparable data has been useless. Cities and counties have responded to the urge of needed public improvements with a prodigal liberality. A constant influx of new people intensifying the demands for additional educational facilities, the automobile with its trail of good roads, expansion of governmental agencies to keep pace with modern ideas—all of these things have contributed to a tax burden that demands attention.

The great State of California, with its remarkable resources such as no other commonwealth enjoys, can not continue to increase public expenditures at the present rate with impunity. The chief danger lies in increased bonded indebtedness. Governmental luxuries purchased from current revenues can be curtailed when the burden begins to stagger the taxpayer. Bond interest and redemption is inflexible in its demands and must be met. We can not permanently mortgage the future, for the future is in part with us now and each year brings added burdens.

The business of government has become so complex that it is idle to expect the ordinary citizen to have an intelligent grasp of public fiscal affairs. Moreover, their duly elected officials frequently place the responsibility of constantly increasing tax burdens upon the people, a statement that is only partially true and therefore misleading. If public officials generally cultivated the courage to stand against unwise and foolish expenditures of public money, even though public clamor demanded it, the electorate would have more confidence in its servants and the tax burden would ultimately solve itself.

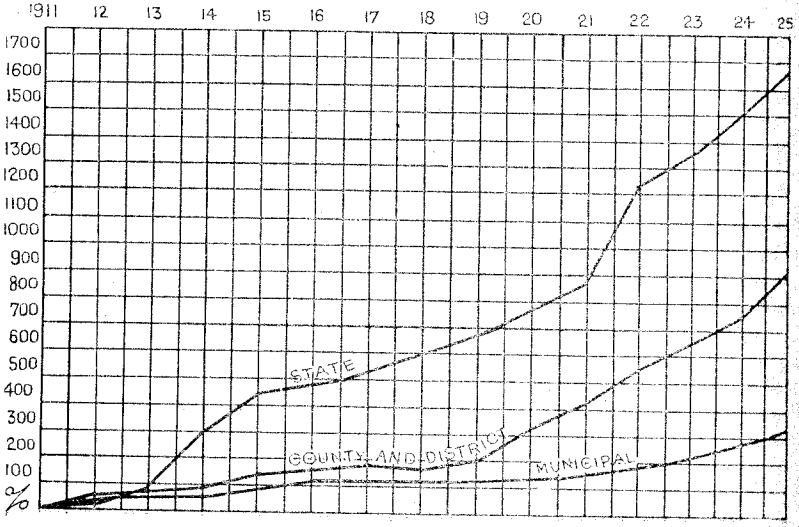
BONDED INDEBTEDNESS.

The bonded indebtedness continues to increase at the same ratio as during the past few years and at the present writing represents 10.5% of the total assessed value of non-operative property as compared with 4.2% in 1911. The total bonded indebtedness for all forms of government as of June 30, 1925, was $609,549,227.62, an increase of 549% over 1911. During the same period the assessed value of non-operative property, which is liable for the interest and redemption of bonds, increased but 160%. The following chart is a graphic illustration of the startling increase in combined bonded indebtedness of state, cities and counties as compared with the increase in assessed value of non-operative property.



In considering the bond debt of each form of government separately, we find that the cities show the smallest percentage of increase, being 331% as compared with 905% in the counties and 1650% in the state government.

The following graph sets forth the percentage of increase in state, county and municipal bond debts.



Bonded Indebtedness for All Forms of Government From 1911.

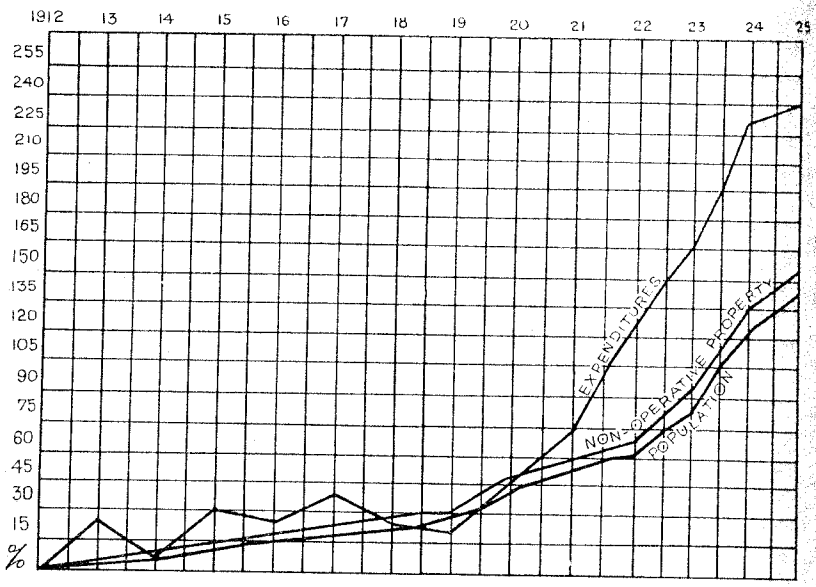
Year	State	County	Municipal	Totals
1911	$5,677,500 00	$22,655,890 00	$65,573,033 00	$93,906,423 00
1912	5,681,500 00	30,667,681 00	83,297,511 00	119,646,692 00
1913	10,098,500 00	35,358,917 00	100,387,559 00	145,844,976 00
1914	22,909,500 00	41,292,025 00	106,924,759 00	171,126,284 00
1915	31,311,500 00	50,841,291 00	129,059,914 00	211,212,705 00
1916	33,013,500 00	56,461,190 00	135,567,045 00	225,041,735 00
1917	34,493,500 00	64,003,252 00	139,451,712 00	237,948,464 00
1918	39,367,500 00	62,947,875 00	137,018,593 00	239,333,968 00
1919	44,558,500 00	67,052,389 00	135,839,736 00	247,450,625 00
1920	50,259,500 00	96,062,069 00	142,189,039 00	288,510,608 00
1921	54,806,500 00	117,197,907 84	149,611,830 82	321,616,238 66
1922	75,964,500 00	147,342,515 26	191,096,236 66	414,403,251 92
1923	81,389,500 00	169,357,217 83	201,234,192 37	451,980,910 20
1924	91,439,500 00	192,926,118 95	248,833,633 01	533,199,251 96
1925	99,402,500 00	227,610,013 96	282,536,713 66	609,549,227 62

EXPENDITURES.

County and city accounting methods do not furnish the data to determine actual cost of government in those political subdivisions and this report follows the practice of former years by including capital outlays, agency transaction and other minor items in its expenditure accounting.

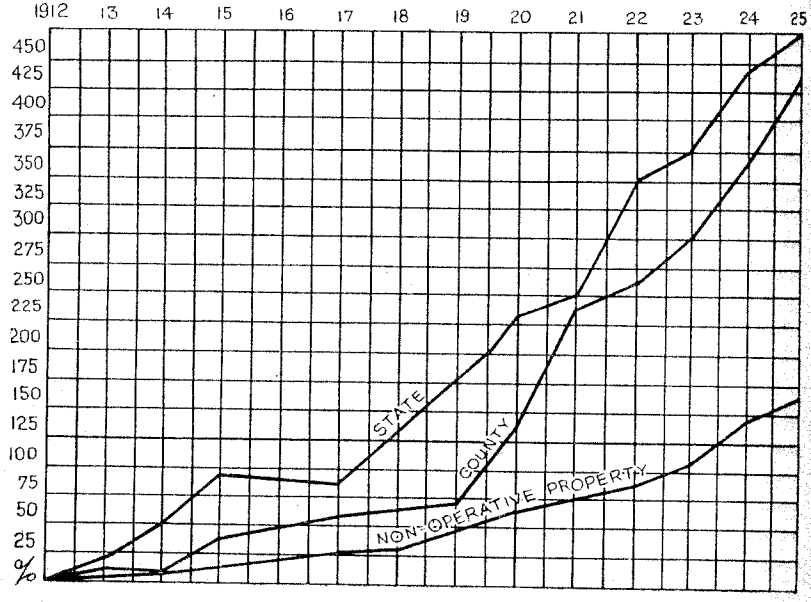
The total expenditures by all forms of government as above stated during the fiscal year ending June 30, 1912, was $121,709,248.75. During the fiscal year ending June 30, 1925, there was expended by these same political subdivisions $548,519,534.50. The principal expansion in county expenditures since 1912 has been the ever increasing demands for better educational facilities, augmented by increased expenditures for interest and bond redemption, highways, charities and corrections. Agency transactions are in greater volume in the tabulation of county expenditures, therefore data concerning the cost of government with respect to county government is of less value than tabulations concerning municipalities. The largest increase in cities has been in the cost of municipal service enterprises closely followed by increases for the payment of interest and bond redemption, protection to person and property, highways and education.

The following graph shows the comparative increase in city expenditures (including city and county of San Francisco) as compared with the increase in urban population and the assessed value of non-operative property within the cities as shown by the county assessment rolls.



In considering the increase in expenditures by the state government we find it to be made up of practically the same class of expenditures as in the cities and counties, the principal items being education, highways, regulative boards and commissions, bond interest and redemption.

The following illustrates the percentage of increase in state and county expenditures as compared with the increase in assessed value of non-operative property. (Expenditures and assessed value of city and county of San Francisco not included.)



The following tables show the steady increase of receipts and payments.

Year	State receipts	State payments
1912	$21,448,705 98	$18,691,877 28
1913	25,053,719 58	22,900,416 40

1925	207,575,079 47	180,944,336 28

**Including City and County of San Francisco.

NEW METHOD OF POPULATION ESTIMATES.

Former issues of this report employed the Federal system of estimating population. The rapid growth of California can not be measured by a system that applies to normal or average increases of population throughout the United States. Therefore the Controller's statistical department has adopted a new system that more nearly reflects actual population of the various cities of California, a system that is based upon increased property values as shown upon the county assessment rolls.

This system is not infallible and in some instances estimates have not been made because accurate information regarding true to assessed value for the time period necessary to establish the proper base upon which to apply the formulae is not available. However the results check remarkably well with surveys that have been carefully made in several cities. It has the merit of simplicity and will be used until the census of 1930 at which time its value will be determined.

The population of the state as of September, 1925, based upon the above system was 5,066,288.

The estimates of population in the following table are based upon the new method.

INTRODUCTION.

The first report of Financial Transactions of Counties and Municipalities covered the receipts and expenditures of 15 cities for the fiscal year ending June 30, 1911. In 1915, the State Controller was enabled through additional legislation to publish the first complete report, containing the 58 counties and 239 cities. Since then, there has been a steady tendency to increase the number of municipalities until in 1925, a total of 267 reported to this office. The present report shows a decrease for the first time since 1915, 264 cities and towns being included. Disincorporation and annexation have produced this slight difference, regardless of the fact that two new cities have been added.

For the first time in fifteen years the financial operations of counties and municipalities for 1926 indicate a tendency to maintain a reasonable relation between increased expenditures and increased values. The payments for the year 1925 reached the highest point in the history of the State. The five years preceding was a period of constantly expanding expenditures out of all proportion to the increased values, a condition that could not continue indefinitely. The demand for improvements has not lessened materially, as the usual increase of bonded indebtedness was incurred during the fiscal year of 1926.

For purposes of true comparison between the receipts and expenditures of the several cities and towns of this State, two serious obstacles must be overcome. At the present time, the boundaries of the fiscal years shown on the reports sent to this office differ greatly, some even beginning in the middle of the month. Legislation correcting this evil has been effected in other states, but cooperation would remedy this defect and, after the period of adjustment, there would be no additional inconvenience. The records of the counties and of the State of California show July first as the beginning of the fiscal year. Since the greater number of cities now use this date, it would seem possible and highly beneficial for the others to adopt it. Certainly, it would increase the value of the figures set forth in this publication, as well as enable us to furnish them at an earlier date. The other and far more involved barrier is the widely different systems of bookkeeping employed in California. It is to be hoped that in the near future a uniform system of accounting will be installed throughout the State, a system adequate to meet the demands of the large cities, yet simple enough for use in the smaller towns. This would enable the Controller to give to the interested public, figures of definite value and reliability.

BONDED INDEBTEDNESS.

During the past year, many projects requiring substantial bond issues have met defeat at the hands of the voters, and it is obvious that public attention has been finally directed to the connection that exists between governmental constructive enterprises and the tax bill. Municipalities and counties have been vying with one another in the matter of public improvements covering civic buildings, streets, parks, playgrounds and so forth until California possesses a metropolitan smartness in every

municipality throughout the State. In addition thereto the State's highway program is far in advance of any other commonwealth when a comparison is made between expenditures and mileage with territory and assets. The National Industrial Conference Board is responsible for the statement that California occupies second place in the nation in per capita expenditures. It is probable that the federal base of computing population was used in determining per capita costs and if so, such a method would be unfair to California. There is a difference of at least 25 per cent between the federal estimates and the actual population of this State, which illustrates the difficulty of preparing statistical data that accurately reflects true conditions. In all probability California's expenditures have not greatly exceeded other comparable states in population and wealth. However, we will of necessity be obliged to accept calculations based upon an inaccurate premise until the next federal census relieves the situation.

In 1924, the total bonded indebtedness showed an increase of 17.9 per cent over 1923; in 1925, the increase over 1924 was 14.3 per cent, while the increase in 1926 was 10.2 per cent. The yearly increase in the State's bonded indebtedness for 1926 is less than it has been for any year since 1912, being .953 per cent. The percentage of increase of county bonded indebtedness for 1926 as compared with 1925 is 15.2 per cent, and the increase for municipalities covering the same period is 9.5 per cent. The present bonded indebtedness represents 11.1 per cent of the total assessed vale of nonoperative property as compared with 4.2 per cent in 1911. Bonded indebtedness has increased 615 per cent since 1911, while the assessed value of nonoperative property which is liable for the interest and redemption of bonds during that same period of time has increased only 166 per cent. The table below shows the increase in the bonded indebtedness for each of the various forms of government since 1911.

Bonded Indebtedness for All Forms of Government from 1911.

Year	State	County	Municipal	Total
1911	$5,677,500 00	$22,655,890 00	$65,573,033 00	$93,906,423 00

RECEIPTS AND EXPENDITURES.

The following tables are presented showing the receipts and payments, together with the increased receipts, increased payments and balance on hand. For the first time in seven years, the municipalities show decreased payments, while the State and county expenditures continue to increase in practically the same ratio as heretofore. Each of the three forms of government shows a large balance of cash on hand, the greater portion of which is, no doubt, in sinking funds to be used for bond interest and redemption.

State Receipts, Payments and Excess Receipts or Payments.

Year	State receipts	State payments	Increased receipts	Increased payments
1912	$21,448,705 98	$18,691,877 28	$2,756,828 70

POPULATION.

The Controller has again used his method of computing the population according to the assessed value of property and attention is called to the fact that unusual conditions or unavailable information prevent us in many instances from furnishing an estimate. It will be interesting to note, however, when the 1930 federal census figures become available, just how nearly accurate these population figures have been. Our estimate of population for the entire State, as of September, 1926, is 5,246,729, an increase of 180,551 since 1925. The population for cities and towns for 1926 is 4,006,526, an increase of 147,908. This would indicate that 82 per cent of the increase in population of the State has been in the cities. The federal government has recently called attention to the fact that throughout the country, the urban population has increased much more rapidly than the rural. Our figures do not seem greatly out of proportion when taken in conjunction with a recent statement of the Census Bureau, which estimates that 247 cities, having a population of over 30,000, contained 35.3 per cent of the entire population of the nation.
