230	XXXV. COUNTIES—Detailed Report of Special and District Tax Levy
234	XXXVI. COUNTIES—Population and Per Capita Expenditure
236	XXXVII. MUNICIPALITIES—Per Capita Expenditures for Various Classifications of Government

INTRODUCTION

The Annual Report of Financial Transactions of Municipalities and Counties of California presented herewith covers the fiscal year ending June 30, 1930, and includes 275 cities and 57 counties (San Francisco being classified as a city). The federal census returns indicate that this State has 278 incorporated cities and towns, but Kennett in Shasta County, San Joaquin in Fresno County and Hornitos in Mariposa County has ceased to operate; no general taxes are levied or collected, no city officers are elected and such expenditures as may be imperative to meet local needs are met by imposing a small business tax. The cities actively operating range in population from over a million to 107, with privileges, responsibilities and methods of operation varying accordingly. Los Angeles is the fifth city in the United States, and contains 22 per cent of the State's entire population.

The federal census indicates a total State population of 5,677,251. The rural population is 24.86 per cent, which is far in excess of all previous calculations. Four counties contain no municipalities, and seven counties have one city each, which condition suggests unlimited possibilities for State development. The State itself has increased 65.7 per cent in population since 1920.

PER CAPITA TABLES

Accurate population figures being available, it was possible this year to include tables covering per capita expenditures. The county computations were made by deducting from the total expenditures all agency transactions, trust accounts and outlays from bond funds. Since the federal and state governments contribute materially toward county revenues, the per capita figures shown do not indicate an actual per capita cost to the individual but rather an actual per capita expenditure by the county. All counties having been subjected to the same method, the result obtained is comparable and authentic with the above explanation.

The per capita cost shown for municipalities were calculated by eliminating from the total expenditures all items for municipally owned utilities, expenditures of whatever character from special assessment funds, trust transactions and payments from bond funds for capital outlay. The column for "Miscellaneous" contains expenditures for libraries and schools, for small unclassified items and for bond redemption and interest. A further summary of these figures reveals an average per capita cost of government as follows:

Cities over 1,000,000 in population (Los Angeles)	\$34 86
Cities over 500,000 and less than 1,000,000 (City and County of San Francisco)	67 44
Cities over 100,000 and less than 500,000 (3)	32 55
Cities over 50,000 and less than 100,000 (6)	27 18
Cities over 10,000 and less than 50,000 (36)	23 90
Cities over 5,000 and less than 10,000 (48)	20 54
Cities over 1,000 and less than 5,000 (135)	22 90
Cities under 1,000 (45)	16 11

payment, being 220 per cent, a percentage high in itself but small comparison with the others.

During the past year, the bonded debt increased \$53,412,982.77, Francisco representing the greatest portion of this amount by the of \$41,000,000 Spring Valley bonds. Other increases are: receipts, \$41,981.64; payments, \$51,940,094.44 and assessed values, \$632,-

Total receipts, payments and bonded debt for the three forms of government are as follows:

	Receipts	Payments	Bonded debt
1912	\$134,978,949 66	\$121,709,248 75	\$119,646,692 00
1915	167,012,149 39	176,422,682 33	211,212,705 00
1920	293,753,481 53	259,310,839 41	288,510,608 00
1925	596,546,714 04	548,519,534 50	609,549,227 62
1930	827,807,165 93	806,063,345 40	840,306,367 12

ASSESSMENT DATA

During the past five years, the interest of the public in assessment has been persistently increasing. Counties report to the Controller district valuations, the rate of levy and the character of the district, so the information is gathered through the courtesy of the county assessors and is not always complete. Particularly is this true concerning irrigation and reclamation districts. A means of locating exact boundaries, resources, liabilities, etc., for all assessment districts of whatever character would be of vast importance in determining the extent of the tax burden imposed throughout the State. The Controller is also interested in the city special assessment figures, and there can be no possible doubt as to the value of establishing true assessment data for all municipalities. Many, if not most, cities are heavily overburdened by street assessments, and a form is being drafted to enable the publication in the near future of information concerning the special assessments which in many cities equal the general tax.

It is safe to assume that the municipalities with a population from 5,000 to 10,000 operate most advantageously, their reports showing adequate consideration for safety, sanitation and recreation, while the lesser cities have produced a smaller per capita by a sacrifice of one or more of the above functions. The San Francisco per capita can not be considered with either the county or city classifications since it includes the governmental activities of both. The greater part of all expenditures for each of the above segregations is for highways and police protection, with fire protection a close third.

COMPARATIVE DATA

The following tables indicate the increase in State, county and city receipts, payments, assessed values and bonded debt over five-year periods from the date of available reports:

Year	STATE			Bonded <i>debt</i>
	Receipts	Payments		
1912	---	\$18,691,877 28	\$5,681,544 30	
1915	---	29,830,182 34	31,311,500 00	
1920	---	58,743,897 86	50,269,594 30	
1925	---	109,748,845 65	99,402,544 00	
1930	---	155,611,327 19	122,005,501 30	

State payments during the past fifteen years have increased 33 per cent, with receipts necessarily increasing accordingly. During the same period of time, the bonded debt shows an increase of 290 per cent.

For comparative purposes, payments have increased \$12,707,943.11 over 1929, and bonded debt \$832,000, while State receipts decreased \$997,188.23.

Year	COUNTY*			Assessed valuations
	Receipts	Payments	Bonded debt	
1912	\$2,972,943 34	\$49,766,366 20	\$30,667,681 00	\$1,963,314,891 30
1915	68,457,388 51	69,970,496 88	50,841,291 00	2,183,583,041 30
1920	146,024,045 41	130,655,063 80	96,062,069 00	2,193,385,544 30
1925	279,222,788 92	263,850,194 42	227,610,013 96	5,061,991,413 30
1930	375,613,329 49	359,457,368 09	304,632,034 78	7,561,044,641 30

* Excluding City and County of San Francisco.

County assessed valuation in the past fifteen years has increased 243 per cent, and the bonded debt has increased 499 per cent. Outstanding bonds on June 30, 1930, equal 4 per cent of the total county valuation. The interest and sinking fund has become a substantial part of the annual tax levy, and with the constantly increasing total bonded indebtedness, there is occasion for serious consideration by those who are entrusted with the administration of public finances.

County increases over 1929 are as follows: receipts, \$18,775,137.01; payments, \$16,165,106.77; bonded debt, \$4,654,078.78 and assessed valuation, \$148,213,800.

Year	CITY*			Assessed valuations
	Receipts	Payments	Bonded debt	
1912	\$60,557,300 34	\$53,251,005 27	\$83,297,511 00	\$1,647,116,431 30
1915	68,724,578 54	69,922,592 41	129,059,914 00	1,883,378,317 30
1920	88,935,538 26	76,747,095 88	142,189,039 00	2,263,442,400 30
1925	207,516,073 47	180,944,336 23	282,536,713 66	4,098,387,571 30
1930	296,582,509 26	288,908,765 65	413,665,832 34	6,557,564,611 30

* Including City and County of San Francisco.

Municipal assessments have increased 248 per cent in the fifteen years—the same increase shown by the county figures. The bonded debt, however, has the lowest increase of all three forms of
