Court

Compiled and published by authority of
Chapter 550, Statutes of 1911

RAY L. RILEY
STATE CONTROLLER

INTRODUCTION

This publication is the twenty-second report of financial transactions of the municipalities and counties of California issued by the State Controller under authority of Chapter 550, Statutes of 1911. It contains the cash transactions of 277 cities and 57 counties, San Francisco being classified as a city. Since the 1931 issue, a new city Fairfax in Marin County, has been added, while Tujunga has consolidated with Los Angeles City and is no longer reported as a separate division. Hornitos in Mariposa County and San Joaquin in Fresno County are not represented for, although they are incorporated units they do not levy taxes or function as city governments.

In Table I of this issue, federal census figures have been given a of January 1st, 1920 and April 1st, 1930. No effort has been made to supply estimates of population since the last actual count for the reason that a satisfactory method has not been found. Dr. J. N. Bowman of the Berkeley Chamber of Commerce has within the past year made a most complete investigation of the methods heretofore used. Tests were made for 1930 in order to establish the accuracy of systems employed. The results disclosed some discouraging elements in each method, and as yet no selection has been made. No doubt the simplest and best known system of estimating population is to use the known increase between two actual counts, determine the addition for each year or month, and project it forward to the desired date. The system is applicable to all cities incorporated at the time of the last two censuses, and from the information in the first table may be used without difficulty. It does not attain the highest score as to accuracy, but each system when applied throughout the State revealed some discrepancies and many of the systems could not be applied to every city.

The figures presented for the State and the cities show a continuation of the increase in bond debt, while the county figures show a slight decrease. Veterans' bonds for approximately \$12,000,000 and Public bonds for \$2,500,000 account for the major part of the increase in State debt. Sale of Hetch Hetchy bonds by San Francisco is responsible for the upward trend of municipal indebtedness. With all branches of government facing deficits, the total outstanding debt becomes of paramount interest. At present this figure is almost unobtainable. Irrigation districts at present carry a bonded debt of approximately \$80,000,000, but since the Controller receives no report from these subdivisions little if any of this amount is carried in the total district bond figure. Similarly, many cities fail to show the total special assessment due. Provision should be made requiring the collection and publication of debt information at regular intervals by some governmental agency.

A publicly owned utility can not be considered self-sustaining profit-making unless receipts are sufficient to cover not only all operating expenses but also interest on all indebtedness and a proper depreciation charge. The table of municipal railways definitely shows a loss during the current year. Data is not available for other utilities sufficient detail to permit a decision, and since no prescribed uniform method is used by the cities it is quite possible that a survey of original records would not in every case provide better information.

COMPARATIVE DATA

For State

Year	Receipts	Payments	Bonded debt
1915	\$29,830,182 34	\$36,559,593 04	\$31,311,500 00
1920	58,748,897 86	61,908,139 73	50,259,500 00
1925	109,748,845 65	103,725,003 80	99,403,500 00
1930	155,611,327 19	157,696,711 66	122,008,500 00
1932	166,786,662 54	190,982,096 95	142,389,500 00

In the period between 1930 and 1932 State receipts have increased only 7.18 per cent while State disbursements have increased 21.11 per cent. This alarming difference can not long be maintained, and efforts of the Legislature and tax authorities are now centered on methods to check outgoing funds and increase the source of State revenues. In the five-year interim between 1925 and 1930, the State bonded debt increased 22.74 per cent, while in the two years from 1930 to 1932 the increase is shown as 16.68 per cent. The voting public has checked the speed of increasing local debt, but still continues to favor State bonds.

For Counties*

Year	Assessed valuation	Receipts	Payments	Bonded debt
1915	\$2,189,238.068	\$68,457.388	\$69,970.496	\$30,841.291
1916	\$3,199,238.556	146,024.045	120,665.653	\$6,062.009
1920	5,061,941.479	279,222.758	368,550.194	227,610.013
1925	7,507,043.917	375,613.329	435,457.868	249,632.034
1930	6,107,112.142	338,766.749	351,110.651	291,842,813
1932				

* Excluding the City and County of San Francisco

While, obviously, receipts for government have decidedly decreased, nevertheless the expenditures remain substantially the same as shown for 1930. Payments for the current year exceed receipts by \$14,344,792, indicating a serious condition of unbalanced budgets.

For Cities**

Year	Assessed valuation	Receipts	Payments	Bonded debt
1915	\$1,883,783,816	\$68,724,578	\$69,922,592	\$129,059,914
1920	2,263,142,420	88,858,558	76,747,477	142,109,038
1925	4,093,937,271	207,875,079	180,944,336	282,556,716
1930	6,567,156,430	296,852,509	288,903,765	413,665,833
1932	6,536,156,480	224,681,220	241,960,768	449,560,927

** Including the City and County of San Francisco

Since 1930, receipts for cities show a decrease of \$71,995,289, while payments have failed to keep pace and show a decrease of only \$40,948,700. Payments exceed receipts by \$23,373,538. A continuation of this condition in the three forms of government indicated above can produce, but one result, bankrupt treasuries.
