## INTRODUCTION

This report covers the cash transactions of 279 cities and 57 counties of the State of California for the fiscal year ending June 30, 1934, and indicates the earnest endeavor of political units to again become self-supporting. The exact extent of success or failure is hard to determine for the reason that the State figures are swelled by government moneys for various purposes in the sum of \$33,838,123, and the county receipts include \$15,708,774 borrowed from the State unemployment relief bond fund. City funds are also inflated by government moneys used for civic projects to an extent which can not be determined from the records submitted. Where actual grants have been made a benefit has accrued; in the case of loans the governments have merely assumed a greater debt which must be carried over a period of years.

The United States Bureau of the Census has published the estimated population figure for California on July 1, 1934, as 6,158,000, an increase of 480,749 over the official count of 5,677,251 for April 1, 1930. The bureau allows California the highest percentage of increase among the States, the rate being 8.5 per cent, with Florida next at 7.3 per cent. An effort is now being made to establish a State bureau which would receive and study data of all descriptions affecting population trends, and on the basis of the material accumulated issue a population estimate which would be acceptable to all State departments and chambers of commerce. Such an estimate would consider vital statistics, commercial fluctuations and the more stable school figures. The merit of the conclusions adopted would be subject to check at the time of the next Federal count and the advantage of further estimates determined at that time.

During the past five years the mishandling of public funds has increased, and while the instances are still few in number the results are disastrous to the government concerned, its taxpayers and the serving official. In many instances these difficulties could be avoided by a careful use of the safeguards in accounting already provided by the systems in operation. The tendency among public officials of long acquaintance is to become careless after years of precaution have failed to show the need for diligence. Boards of supervisors or trustees, treasurers, auditors and clerks should avail themselves unceasingly of every possible means afforded to protect the public funds entrusted to their care.

Of the 57 counties in California (San Francisco city and county being classified in the city tabulations), 44 show receipts in excess of payments with the result that the total receipts for all counties exceed the payments by approximately \$3,000,000. Payments for all cities exceed receipts by about \$4,000,000, though slightly more than half the cities show receipts in excess of payments. General and district taxes comprise about 44 per cent of the county revenue, and 42 per cent of the city. Three of the smaller cities enjoy civic benefits without a tax of this character; Lawndale in San Mateo County receives the

\*Excluding City and County of San Francisco.  
\*\*Previously published receipts and payments are subject to above corrections which includes additions to Los Angeles County trust and agency subdivisions.

County receipts during the past year increased \$6,000,000. The effect of the additional \$15,708,773.92 received by the counties from the State unemployment relief bonds was nullified to a great extent by a decrease of \$10,000,000 in the receipts from trust and agency transactions.

The only decisive changes in the county expenditures in the past year are an increased payment of \$12,000,000 for charities and corrections and \$2,000,000 less paid for highways.

While county receipts are \$3,000,000 in excess of county payments for 1933-'34 it is to be noted that approximately \$5,000,000 for the State unemployment relief bond fund was paid to the county during May and June of 1934, and would appear properly in the receipts but undoubtedly would not have been spent in total.

Although several of the countries have voted new bond issues for construction, relief and schools, the increase in the total amount of outstanding bond debt is so slight as to indicate the exercise of caution. County assessment values are lower this year than at any time since 1924, while the bonded debt has increased 47 per cent since that date.

The Controller, through questionnaire, endeavored to collect percentages of tax delinquencies for the cities. Difficultly was experienced by those cities whose tax functions were handled by the county officials, resulting in failure of such cities to report. Others were confused as to the distinction between general taxes and special assessments. The data, therefore, are not sufficiently complete or authentic for use. The 1983-84 total for municipal nonoperative property is equivalent to the 1995-96 figure, while the bond debt has increased 46 per cent since that time.

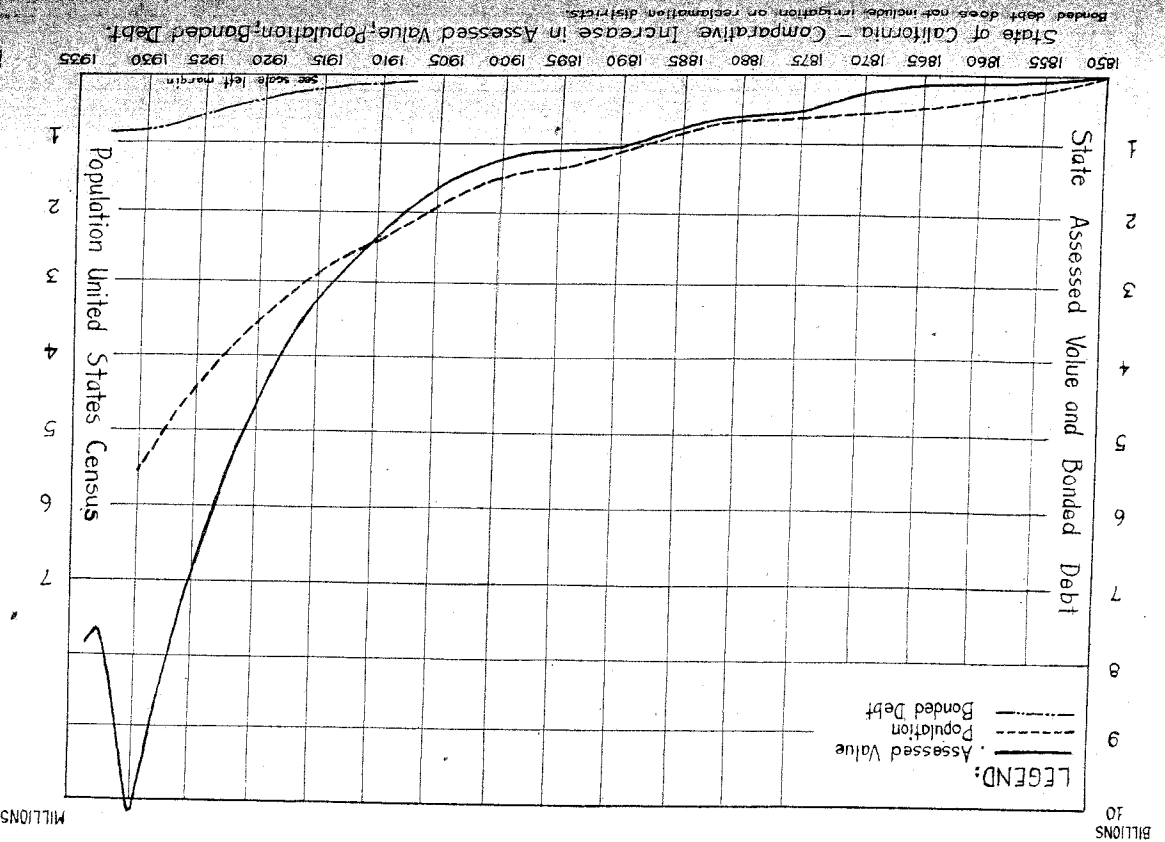

With city and county receipts, payments and assessed values approximating the 1926 figures, the bonded debt for these two forms of government has increased 29 per cent since that year, or \$160,000,000. The total debt for the entire State, including reclamation and irrigation district bonds outstanding on the last available date, is \$1,082,952,024.

In response to frequent requests for comparative cost of administrations since 1900, the following tabulation is included in this report:

In reviewing the above tabulation, consideration must be given to the fact that from 1900 to the present date the people having steadily raised their individual standards of living required likewise an increasing number and variety of services from the government which they supported.

The above graph indicates that real property was subjected to the same speculative influences that affected intangibles between 1920 and 1930.
