INTRODUCTION

The 1935 Report of Financial Transactions covers 279 cities of California (including the City and County of San Francisco) and 57 counties. The first report was published in 1911, but was incomplete. In 1915 the legislature provided for the imposition of a penalty against delinquent city and county officials, and since that time full reports have been assembled.

Until this year the forms on which these political subdivisions reported, and the tabulations made therefrom, have been practically unchanged. Those interested in tax matters have been able to procure cost of government information by deducting trust and agency transactions from the total payments. To readily supply this information it was necessary to substantially alter the character of the reports coming to the Controller. Each session of the legislature has imposed new burdens upon county officials and the Controller has been reluctant to increase the duties of county auditors and city clerks during the past years. However, the demand for a better system of reporting that would give a true picture of the expenditures of local units of government made it necessary to adopt a new procedure. Pursuant thereto a majority of the county auditors were consulted before the change was definitely adopted. Functional headings in both city and county forms were changed as little as possible in order that comparisons may still be made with prior reports—more particularly covering important activities. Tables IV and XXI now contain general governmental costs, and a per capita cost for counties will be found in Table XVII. The 1935 legislature passed an act (Chapter No. 443) requiring cities within ninety days after the close of the fiscal year to prepare and make available to the public a statement showing income and expenditures for the preceding year, as well as other data covering assessments, levies, indebtedness and approximate population. The Controller's new city form was made to conform with those requirements. Grateful acknowledgment is made to county auditors and city clerks for the cooperation and interest extended which has enabled the publication this year of additional information that was desired. The splendid response leads the Controller to the belief that conferences with officials of other units of government, more particularly school districts, will make it possible to include in one publication all the financial transactions affecting the taxpayers of the state. By following such a procedure the constant controversy over uniform reporting and accounting would be eliminated. The method employed by the accounting divisions is of little moment if accurate reports can be secured therefrom.

Comparative figures for the state, counties and cities are submitted with pertinent data covering increases.

STATE

Year	Receipts	Payments	Outstanding bonds
1915	\$29,830,182 34	\$36,529,593 04	\$3,814,500
1920	58,743,897 86	61,908,139 73	50,259,500
1925	109,748,845 65	108,725,003 80	99,402,500
1930	155,611,327 19	157,636,711 66	122,008,500
1934	239,845,369 50	253,285,221 73	157,211,500
1935	345,763,566 83	351,576,638 56	182,753,500

The tremendous increases in state receipts and payments over the twenty-year period shown above are reflected in the increase of duties assumed by the state. Educational, charitable, promotional and protective services borne by the counties in earlier years are now being carried by the state in whole or in part.

During the past year state receipts increased \$106,000,000, the greater part of which covers an additional \$60,000,000 received from the federal government for unemployment relief and \$23,000,000 increased retail sales tax collections. State payments increased \$98,500,000, due in large part to relief expenditures which were \$87,000,000 greater in 1935 than in 1934. Unemployment relief bonds for \$24,000,000 and veterans' farm and home building bonds for \$5,000,000 account for the increase in bonded debt during the past year.

COUNTIES

The following changes have been made and must be considered when using the 1935 totals for purposes of comparison: the first column of Table XVIII includes, in addition to the general property tax collections before used, collections from special assessments and districts. A segregation of these collections will be found in Table XXIII. The column for receipt of gifts and donations, which has annually decreased in importance until the last report showed a total of less than \$75,000, has been eliminated and these receipts are now included in the miscellaneous column.

The more important changes have been made in the payments for counties. The two functional headings of "Conservation of Health" and "Sanitation and Promotion of Cleanliness" have been consolidated in one column under "Health and Sanitation." This was done for the reason that in many counties the duties of these two divisions were so closely related as to make a segregation impossible. In Table XIX covering total expenditures, the "District" column heretofore used has been omitted. Originally it contained those district expenditures which could not be classified elsewhere, such as utility districts, composed of cemetery, water, etc., and payments to other agencies. The utility districts have been placed under miscellaneous and the column formerly devoted to municipalities has been enlarged to include transactions for those districts over which the county has no actual control but is merely the depository of funds. A new column has been added in Table XIX entitled "Payment from Proceeds of Bond Sales," and covers disbursements which have been made from bond moneys and are not therefore cost of government charges until interest and redemption

payments are assumed. Heretofore these expenditures have been classified as outlays under the functional headings, and to make comparisons with prior year figures the following amounts must be added to the current functional headings.

General government	\$212,669 69
Protection to person and property	2,883,956 04
Health and sanitation	231,619 96
Charities and corrections	273,880 82
Education	6,778,025 41
Miscellaneous	640,790 52
Total	\$11,030,942 44

County totals * covering the past twenty years at five-year intervals are as follows:

Year	County assessment of property subject to local tax rate	Receipts	Payments	Outstanding bonds
1915	\$2,185,563,068	\$68,457,388 51	\$69,970,496 88	\$30,841,291 00
1920	3,139,238,546	146,024,045 41	120,655,663 80	96,062,069 00
1925	5,061,091,179	279,222,788 92	263,550,194 42	227,010,013 96
1930	6,175,935,262	375,613,329 49	350,457,868 09	304,632,634 78
1934	4,551,905,003	323,418,497 69	320,405,665 01	284,423,109 17
1935	5,753,997,459	328,385,747 46	324,596,461 83	294,249,734 57

* Excluding City and County of San Francisco.

Utility property to the extent of \$811,539,360 and efforts of the State Board of Equalization to have all assessments uniform in ratio to the value account for the increase of \$1,232,092,456 over the past year assessment figure. The addition of the utility property, and the consequent widening of the base for local taxation, was believed to be a decided move toward lowering the burden of taxes on real and personal property. Additional rates in sixteen counties of the state nullified the benefit expected to be derived and the levy on common property was actually increased over the prior year. Table XXIV, showing the detail of the general tax levy, including the City and County of San Francisco, indicates an increase of over \$6,000,000, differences being as follows:

Increase during current year	Decrease during current year
General government	\$5,000,000
Salaries	900,000
Hospital and indigents	2,000,000
Junior college	500,000
Library	100,000
Total increase	\$8,500,000
	Total decrease
	\$2,300,000

In the levy for special districts shown in Table XXV, the current year's increase is nearly \$16,000,000, of which \$14,000,000 covers increased levies for school purposes.

Although a general total increase of about \$5,000,000 is shown in county receipts during the past year, a comparison of the individual items making up the total shows a decrease in several classifications such as general property taxes, licenses and permits, receipts from debt obligations, sale of property, etc.
