INTRODUCTION

The original act under which the Annual Report of Financial Transactions of Municipalities and Counties of California is issued by the State Controller was passed by the 1911 Legislature. In the years following two amendments have been made; one in 1915 which placed a penalty on city and county officials for failure to submit reports when notified by the State Controller, and one in 1937 which set forth in greater detail definite requirements of the original reports filed by the city and county finance officers, fixed a time within which to file the reports and reenacted the penalty provision to accord with the time limitation imposed. Little difficulty is experienced by the Controller in the collection of original data for this publication. City and county officials, with few exceptions, file their statements automatically during the ninety days after the close of the fiscal year and respond promptly to requests from the Controller for further information.

No new cities have been added during the year presented, and the current issue covers the financial transactions of 284 municipalities. Two cities, Bayshore and Pismo Beach, which appeared in the 1940 report, have disincorporated and are not shown this year. Hornitos in Mariposa County remains inactive though still incorporated and is omitted. San Francisco, operating as a combined city and county government, is listed with the cities, leaving 57 counties in the county section of the report.

Local estimates of population are published as presented. Efforts to approach a figure of any particular accuracy are useless for the reason that defense activities attract workers and families who are, in many instances, neither transients nor settled residents of a community. An increase in population is indicated in most cities and counties, some estimates being extremely high though, under existing conditions, not impossible. An actual count is the only reliable method of securing population figures between census periods.

As a guide for comparisons, totals for the various governmental subdivisions covering the preceding ten years are shown below:

STATE

Year	Receipts	Payments	Bonded Debt
1932	\$166,785,662.54	\$190,982,095.95	\$142,369,500.00
1933	163,831,439.89	181,207,579.91	140,380,500.00
1934	239,845,369.50	253,282,221.73	157,211,500.00
1935	345,763,566.83	351,876,638.56	182,753,500.00
1936	348,925,882.29	358,791,711.63	188,628,500.00
1937	426,173,372.98	396,767,590.21	183,409,500.00
1938	520,518,532.62	523,520,199.01	190,807,500.00
1939	590,105,016.95	607,550,316.05	184,865,500.00
1940	621,411,652.07	646,112,400.96	173,715,500.00
1941	661,624,265.08	633,463,804.10	162,330,500.00

State receipts represent the grand total of all deposits into the State Treasury affecting governmental cost funds, interest and sinking funds, working revolving funds, bond funds, assessment funds and trust and special funds. These figures include both revenue and non-revenue receipts. Refunds to the State of appropriation expenditures and interfund transfers by warrants are also included.

The payments represent the grand total of all warrants issued by the State during the year from all of the classes of funds referred to above. Interfund transfers and revenue refunds are included, as are all other types of governmental cost disbursements made by warrant. The State bonded debt has decreased steadily since 1932, and this year reaches the lowest outstanding total since 1934.

* Excluding City and County of San Francisco.

County receipts have increased 37 per cent during the past 10 years; county payments have increased 35 per cent. The largest percentage increase in receipts for the 10 years was 243 per cent for subventions and grants, and the largest percentage gained in payments for the same period of time was 231 per cent for charities and corrections. The popular use of old age security benefits has almost doubled the payments for relief in the past five years as shown:

Year	Payments for Charities and Corrections
1937	\$58,759,581.93
1938	78,168,541.19
1939	91,374,528.10
1940	100,327,222.18
1941	112,928,138.64

On January 1, 1940, the aid to needy aged was increased from \$35 to \$40 per month, automatically accounting for a portion of the increases during the last two years.

In 1932 the counties received approximately \$2,550,000 from interest on investments, while in 1941 receipts from this source were only \$1,100,000. This represents the only material decrease in county sources of income during the above ten years. Payments for highway purposes have decreased over \$6,000,000 since 1932, and payments for interest on bonded debt have decreased nearly \$4,000,000.

The county outstanding bonded debt has decreased steadily since 1936 and is 16 per cent less than in 1932.

** Including City and County of San Francisco.

While the city assessed valuations increased 4.47 per cent in the past 10 years, the collection from general property taxes decreased 4.48 per cent. County assessments are subject to regulation by the State Board of Equalization, giving assurance of like values throughout the State. City assessments, however, do not maintain similar ratios of true to assessed value, making analysis difficult.

The principal increases in city sources of revenue for the 10-year period shown above are in the classifications for subventions and grants, public service enterprises and receipts from debt obligations as follows:

Receipts	1932	1941
Subventions and Grants	\$6,708,532.68	\$28,656,736.24
Public Service Enterprises	57,537,641.68	94,602,173.13
From Debt Obligations	21,521,324.35	100,965,271.69

Approximately half of the increase in subventions and grants is due to the inclusion of San Francisco in the city tabulations and represents moneys received from the State and Federal governments for charitable purposes.

Twelve additional cities have purchased water plants since 1931, which with the normal development of those operating at that time accounts for the increase in receipts from publicly owned utilities.

The increase of \$79,500,000 in receipts from debt obligations and trust transactions is in large part due to Los Angeles city bond transactions. During the fiscal year ending June 30, 1941, Los Angeles called and refunded electric plant revenue bonds in the sum of \$53,566,000. Total municipal receipts for 1941 have increased 22.46 per cent since 1940, of which percentage 18.43 per cent was due to these bond refunding transactions of Los Angeles city.

Reassuring aspects of the current State, county and city tabulations are that receipts exceed payments and that the bonded debt outstanding has decreased for all three types of government since 1940.
