INTRODUCTION

Chapter 550, Statutes of 1911, requires all municipalities and all counties of the State to file with the Controller, annually, a report of their financial transactions for the preceding fiscal year. The data herein contained has been compiled from the reports of 285 municipalities, including the City and County of San Francisco, and 57 counties, and relates to the Fiscal Year 1943-44.

The cooperation of the city clerks and county auditors is a necessary factor in a compilation of this character, and though in many instances war conditions have imposed unusual difficulties on these public officials, the Controller desires to express appreciation for the fine cooperation given by them.

Population estimates for the State as a whole continue on the upward, confined principally to cities in the vicinity of defense industry. California's population as of June 30, 1944, based upon estimates gathered from various official and semiofficial sources, stood at a total of 3,414,230 persons, an increase of 398,510 in the year from June 30, 1943, to June 30, 1944. Fifteen of California's cities show more than 100 per cent increase since the Federal census of 1940. The estimates for at least six of these are apparently justified by special census enumeration taken subsequent to the 1940 enumeration. Among the larger of these, Richmond in Contra Costa County has jumped from 23,642 in 1940 to an estimated 112,000 in 1944—an amazing 374 per cent increase. Housing, water supply, sewage disposal, police and fire protection and kindred necessary public services have presented gigantic problems, both in financing and administration, that have taxed public officials to the limit. Obviously, when the war is over they will have equally serious problems of readjustment to face that may prove equally staggering.

Property valuations likewise continue a definite upward trend and we find an increase in total assessed valuation in the counties of \$370,381,037, and in cities of \$92,615,246.

In the Report of Financial Transactions for 1943 it was stated that it was the Controller's intent and purpose to develop greater uniformity in county budget procedure and in reporting financial transactions and to eliminate as many of the complexities of both as are possible and practical, commensurate with the requirements of the law. It was also stated that the County Auditors' Association, the County Supervisors' Association and numerous interested taxpayers' groups had pledged assistance in carrying out the program.

During the year just passed, very considerable progress has been made in connection with county budget procedure. Clarification and simplification in budget forms has been suggested, approved, adopted and will go into operation immediately. This has been made possible by the wholehearted assistance and cooperation of all the groups mentioned above and the Controller and his staff wish to acknowledge with sincere thanks the great help so generously given.

The second phase of the plan outlined last year will now start—the improvement and simplification of the reporting of financial transactions. The present forms for reports came into being in 1911 and in the main are modeled in the forms used by the United States Census Bureau and those approved by the National Municipal League. Since that time there have been many changes in revenue structure and in expenditure needs and accounting procedures have changed considerably in many counties and cities. The need for improved reporting forms is felt both by the officials reporting and by those using the reports. The Controller feels sure that the associations and groups which have so generously given their time and help in improving the county budget forms will continue to assist and advise him in this further undertaking and he hopes and believes that interested municipal associations will as wholeheartedly cooperate.

Both county receipts and county payments have increased sharply in the Fiscal Year 1943-44. Receipts increased \$60,932,349.98, or 12.5 per cent, while payments increased \$72,797,878.93, or 15.28 per cent. Receipts exceeded payments by \$7,761,266.48.

Receipts and payments of cities show a gross increase of \$77,951,250.87 in receipts and \$122,134,609.42 in payments, while payments exceeded receipts by \$3,935,264.68. The unusually great increase in receipts during the year reported is largely accounted for by refunding debt obligations and trust transactions due to withholdings from employees' salaries. The increase in payments is accounted for to a great extent by the same transactions representing the payments for bonds called in connection with reissues and payments to the Federal Government of withholdings from employees' salaries and to the reduction of bond debt during the year in amount of \$49,707,624.46.

Bonded debt of counties has steadily decreased since 1936 when the total debt reached a high point of \$304,666,349.63. The present debt amounts to \$193,726,913.81, a decrease of \$110,939,435.82, or 36.41 per cent.

City bond debt has also steadily decreased during recent years. In cities the peak was reached in 1937 with a total of \$511,299,500.26. The total debt now stands at \$422,515,730.74, a reduction of \$88,783,769.52 or 17.36 per cent.

Postwar construction will probably be partly financed by sale of bonds and it is to be expected that the downward trend in bonded indebtedness will be halted and sharp increases in total bond debt of both cities and counties will occur following the end of the war.

The following totals for State, county and city governments from 1934 to date are provided to facilitate comparisons, and to show the trend of government financing in California.
