INTRODUCTION

The Annual Report of the State Controller is published according to the provisions of Chapter 550, Statutes of 1911. The current edition covers 287 cities, including the City and County of San Francisco, and 57 counties. On June 30, 1946, California had 291 cities. During the year covered by this report the following new municipalities were incorporated:

Ripon in San Joaquin County, incorporated November 27, 1945;
Wasco in Kern County, incorporated December 17, 1945;
Folsom in Sacramento County, incorporated April 20, 1946;
Pismo Beach in San Luis Obispo County, incorporated April 25, 1946;

Portola in Plumas County, incorporated May 16, 1946;

all cities of the sixth class. Financial transactions of Folsom, Pismo Beach, and Portola are not shown in this report since they were incorporated too late in the fiscal year to levy or collect taxes. Hornitos in Mariposa County, though incorporated, does not function as a city and is not covered by this publication for that reason.

Population estimates for the State have increased 31 percent since the 1940 federal census. The present total of 9,043,670 indicates an addition of 2,136,283 people in six years. Urban population now represents 75 percent of the total, or 6,778,898. Both urban and rural populations have increased materially since 1940, the urban 35 percent and the rural 20 percent. While all recent population figures covering the State are necessarily estimates, and the total published in this report the collective result of figures submitted by 58 county auditors, the total is even more conservative than estimates of other agencies.

The effect of population increases, more particularly in relation to urban areas, has brought with it serious problems in municipal financing due in part, at least, to the tax limitation imposed by law, upon cities.

In the effort to keep revenues apace with expenditure demands occasioned by the heavy population increases, many cities have inaugurated a sales tax program and have installed parking meters, in the business area. Both, according to reports, have proven a lucrative source of revenue, but not adequate to meet the increasing demands upon municipal services, such as police and fire protection, water supply, sewage disposal, sanitation and other functions necessary to the health, safety and welfare of the people. Reappraisal of properties is being conducted in many localities, both city and county, to determine the feasi-

bility of broadening the tax base. A concerted effort is being made to induce the Legislature to grant more and more financial aid from state funds, while other new and heretofore unthought of sources of revenue are being sought. Altogether the problem is both serious and critical, particularly as it relates to the more densely populated urban areas, and will continue to increase in magnitude with further population increases.

Home building continues on a tremendous scale, but shortage of materials and supplies has reduced available housing considerably below earlier estimates, which together with high prices leaves the housing problem still extremely acute.

The following totals for state, county, and city governments from 1940 to date are provided for comparative purposes, together with a brief explanation of increases or decreases of the totals for 1946 against the previous year and to further show the trend of government financing in California:

* Excluding City and County of San Francisco.

County assessed valuations have grown steadily since 1940. During the past year the 7 percent increase is the largest annual raise for the years shown above. Since 1940, valuations have risen 30 percent.

County receipts are $52,270,664.55 in excess of the payments. This is principally due to the issuance of district bonds. County auditors show that 32 counties during the past fiscal year issued school district bonds in the sum of $55,597,059, and other district bonds in the sum of $4,268,533.98. From the total of $59,865,592.98, they report an expenditure for capital outlay of only $2,970,027.33, leaving an unexpended balance of $56,895,565.65. Actual governmental receipts, which exclude these bond transactions, agency and trust accounts, exceed governmental costs by only $7,627,906.72.

Receipts from county and district taxes exceed the 1945 collection by 14 percent. The most significant increases in payments during the year are 21 percent for highways and 12 percent for education.

Tables XXXV and XXXVI, covering general and district tax levies for 1946-1947, indicate even larger future expenditures. Requirements for each purpose have increased materially, resulting in an addition to the general tax levy of the previous year of 34 percent and to the special tax levy of 25 percent, or a total increase of nearly $87,000,000.

* Including City and County of San Francisco.

City figures also show an increase in the totals indicated above. The assessed valuation has increased 16 percent since 1940; receipts 98 percent and payments 69 percent. The bonded debt has decreased 11 percent since 1940 but shows an increase of 2.5 percent during the past year. Twenty-eight cities issued bonds for a wide variety of purposes totaling $66,073,415, and expenditures from this money amounted to $18,505,128, leaving a balance of $47,568,287 to be used as supplies and materials become more easily available. While the total receipts exceed the total payments by $74,302,498.36, this difference lies entirely in the trust accounts which contain proceeds from bond sales and payments from this money, pension contributions and withholding taxes. A comparison of the first 20 cities listed in the tabulations shows trust receipts in excess of trust payments to the extent of $73,789,665.04. Actual governmental costs exceed governmental receipts by $3,084,684.50.
