INTRODUCTION

The 1948 Annual Report of Financial Transactions of Municipalities and Counties of California is published by the State Controller and covers fiscal data for 298 reporting cities, including the City and County of San Francisco, and 57 counties. Hornitos in Mariposa County, though incorporated, did not function as a municipality and has been omitted for that reason. Since the 1947 report, an additional 10 cities have incorporated, four of which are included in this report and the remaining six to be presented in 1949. The new cities are:

<i>Municipality</i>	<i>County location</i>	<i>Date of incorporation</i>
Gonzales	Monterey County	January 14, 1947
Greenfield	Monterey County	January 17, 1947
Live Oak	Sutter County	January 22, 1947
Barstow	San Bernardino County	September 30, 1947
Millbrae	San Mateo County	January 14, 1948
Brentwood	Contra Costa County	January 21, 1948
Orange Cove	Fresno County	January 28, 1948
Port Hueneheme	Ventura County	March 22, 1948
San Pablo	Contra Costa County	April 26, 1948
Capitola	Santa Cruz County	January 10, 1949

The 1940 federal census showed 285 cities with a population of 5,020,850. On June 30, 1948, there were 303 cities with an estimated population of 7,142,380, an increased population within cities of 42 percent. Many of the estimated populations shown by the city clerks and auditors have been based on actual recent intercensal figures. Some of the recently incorporated areas claim populations far in excess of older municipality-incorporated areas giving accurate population figures for the State, for example San Pablo 21,000, Wasco 6,000, and Millbrae 5,500. The county auditors' population estimates total 10,185,288 for the State, an increase of 47 percent since 1940. The ratio between urban and rural populations remains practically unchanged since 1940, the current portion being 70 percent urban and 30 percent rural. The approaching 1950 federal census giving accurate population figures for the State and its subdivisions will be especially welcome due to the many and varied shifts of the war and postwar years.

For purposes of comparison the following yearly totals are presented:

1948	11,192,708,057	1,161,863,248	1,088,190,785	351,709,379

* Excluding City and County of San Francisco.

The trend in all totals for the various units of government is upward, and the causes correspond with the obvious financial aspects of the present period. Delayed necessary construction, increased availability of supplies, inflationary cost of materials and labor and the demand for additional services and functions by communities supply the answer to most of the unusually sharp increases in the cost of county government. The counties have formulated no new revenue-producing methods and have been forced to increase the rates for established ones. Property taxes and subventions which in 1940 amounted to \$352,239,350 and represented 74 percent of the total receipts, in 1948 totaled \$773,798,180 and represented 67 percent of the total receipts.

Since 1940 county receipts have increased 146 percent and county payments 132 percent. Trust funds account for one of the largest single increases. In 1940 trust receipts were about \$20,000,000 and in 1948 \$105,000,000, a leap of 424 percent resulting principally from salary deductions for retirement systems, which are becoming more popular and more numerous annually, and from federal income tax withholdings. Deductions for federal income taxes, which were nonexistent in 1940, totaled \$60,559,070 in 1948 for cities and counties.

The counties reported more new bond issues in 1948 than during any single annual period since the first publication of the Controller's Financial Transactions in 1911. School bonds were issued in the sum of \$81,430,500; other district bonds \$7,319,000 and a general county bond issue of \$329,000 was reported. Only 14 counties completed the fiscal year of 1947-48 without some additional bonded debt. While all other payments for 1948 have increased since 1940, payments for bond interest have decreased. In 1940, with bonds outstanding in the sum of \$259,490,000, the interest payment was about \$12,000,000; in 1948, with outstanding bonds in the sum of \$351,700,000, the interest payment was only \$9,090,000, emphasizing the decline in present interest rates.

County tables covering inside and outside property assessed valuations and tax levies, which have previously appeared in the State Controller's Biennial Report, are this year shown for 1947 and 1948 in the Financial Transactions as Tables XIX and XL.

*Including City and County of San Francisco.

City assessed valuations have increased 52 percent since 1940, the receipts and payments for the same period over 100 percent. The bonded debt decreased 5 percent although the present total is \$29,000,000 larger than in 1947.

The total city receipts in 1948 exceeds the total payments by \$10,946,948, but governmental payments exceed governmental receipts by \$15,423,015. The difference lies in the trust receipts and trust payments which include all new bond transactions, salary withholdings for all purposes, etc. Receipts from new bond issues reported by 50 cities amounted to nearly \$57,000,000 during 1948, while the expenditures from this money was only \$32,500,000.

Cities have found two additional lucrative sources of revenue—the sales tax employed by 98 cities which produced \$23,590,000 in the current year and parking meters used by 100 cities and producing \$4,000,000. A detailed statement follows this preface covering both of these collections.
