INTRODUCTION

The Annual Report of Financial Transactions of Municipalities and Counties of California is published by the State Controller. The current issue contains fiscal data for 304 cities and 57 counties, the City and County of San Francisco being classified as a city. All counties and all active cities are included. With the exception of 15 cities, the period reported covers the fiscal year ending June 30, 1950.

The final 1950 census figure for the State of California is 10,586,223, an increase of 53 percent since 1940. Allotment of this total by counties has not been released as this goes to press. The preliminary census for the counties is shown in Table 18 as 10,490,070. The federal 1950 preliminary figures for cities incorporated in 1940 of 1,000 and over are given in Table 1, and estimates submitted by the city clerks have been shown for the remainder. No comments on population trends are made for the reason that the United States Department of Commerce has advised the State Controller that final statistics for minor civil divisions of this State are not expected until July or August, 1951.

Comparative totals for assessed valuation, bonded debt and cash transactions of cities and counties from 1940 to 1950, both inclusive, are shown below. In addition to the average problems affecting the greater part of the State, California has communities with special needs; for instance, snow removal in the northern section of the State and beach cleaning in coastal areas. Industries present extra problems which need solution by the finance officers of counties and cities. When making comparisons between the totals presented for any of the years shown, the dollar valuation, economic trends and population increase must be considered as important factors.
