INTRODUCTION

The Controller's Report of Financial Transactions of Cities and Counties of California covers the fiscal year ending June 30, 1951, with the exception of 13 cities with other fiscal year dates. The current report covers 57 counties (San Francisco City and County being included in the city tables) and 304 active cities. The Secretary of State lists four inactive cities—Hornitos in Mariposa County, Linden in San Joaquin County, Markleeville in Alpine County and Meadowlake in Nevada County. During the period represented by this report, Huron in Fresno County was incorporated (May 3, 1951) and will be included in future publications.

The Federal Government has now made available the actual 1950 census figures for the cities and counties, which will be found in Table 1 for cities and Table 18 for counties. The cities have been reclassified according to the 1950 census as shown in Table 1, which also shows the 1940 and the 1950 federal censuses and the estimated population as of June 30, 1951, according to the city clerks and auditors. During the intercensal period, many of the cities, irrespective of size, made phenomenal population growth. While the 10 most populous cities in the State account for 29 percent of the 10-year increase, unusual gains were made by many others, the most outstanding of which were Alameda with a population gain of 28,174; Burbank with 44,240; Compton with 31,793; Fresno with 30,984, and San Jose with 26,823. In the past decade, 38 cities increased their population over 100 percent, 4 over 200 percent, 6 over 300 percent and Concord, with populations of 1,373 in 1940 and 6,953 in 1950, 406 percent. Some 14 cities, all under 6,000 population, show a decrease in the 10-year period; 20 have incorporated since the 1940 census, and Hercules in Contra Costa County remains constant at 343. Los Angeles County has 37 percent of the total state population gain of 3,678,836 and Contra Costa, San Mateo and Solano Counties have more than doubled their 1940 census. Alpine, Mariposa, Mono and Sierra Counties show slight decreases.

Totals of property valuations, cash receipts, cash payments and bonded debt are shown below for cities and counties from 1940 to date. The 1951 totals in every instance have consistently increased in conformity with the current financial trend. In the current year 45 counties show new school district bond issues totaling \$107,366,700 and 26 counties report new issues for various other purposes totaling \$13,339,395. Only seven counties showed no new issues during the current year.
