INTRODUCTION

The State Controller's Report of Financial Transactions of Cities and Counties of the State of California covers the fiscal year ending June 30, 1952 (with the exception of 13 cities having dates other than June 30th), and follows the general form of previous reports. The City of Huron in Fresno County, incorporated May 3, 1951, is included in this report for the first time. Cities incorporated since 1951 are

Campbell in Santa Clara County, incorporated March 28, 1952;
Fontana in San Bernardino County, incorporated June 25, 1952;
Carlsbad in San Diego County, incorporated July 16, 1952;
Los Altos in Santa Clara County, incorporated December 1, 1952;
Buena Park in Orange County, incorporated January 27, 1953;
Ione in Amador County, incorporated March 23, 1953.

These new cities increase the number of active incorporated municipalities to 311, including San Francisco which is both a city and county.

For several years past most current literature has contained information on the rapidly increasing payments and bonded debt of political entities, with efforts to find additional means of financing or curbing them. Magazines, newspapers and radio have fully informed the public concerning the gravity of this situation, and so without much comment comparative figures are presented below for the cities and counties from 1920 to 1952. They can be accepted only in conjunction with a review of the period they cover—over 30 years of the most powerful history of the United States, including two actual wars and Korea, the big depression, the curtailment and release of vital building materials, the expanse of defense industries with their tremendous payrolls and the decrease in the purchasing power of the dollar.

Population between 1920 and 1950 increased over 200 percent and property valuations nearly 300 percent, but these are not the answer to the tremendous increases shown in city and county receipts and payments. A change in the conception of services demanded from government is largely responsible. New cities are formed to acquire the benefits of services more readily attained by incorporation, and the extension of these benefits, police, fire, sewer, water, etc., swells the total of cash transactions. Retirement systems, practically unknown in 1920 and 1930, are now an integral part of many cities and counties and serve to attract and keep employees. The cash transactions of these retirement plans cover both the governmental cost and the employee contributions and increase total receipts and payments correspondingly. School and welfare requirements have advanced rapidly in the period shown and federal subventions for these services represent part of the vast cash increase.

Problems of meeting the requirements of additional population have necessitated finding new means of producing revenue. The most popular is the sales tax, adopted by nearly half of the cities and producing in 1952 $41,711,000, or about 47 percent of the total cash receipts for the

cities in 1920. The county trust transactions, alone, in 1952 totaled $193,592,771 (including $69,260,635 withheld from employees' salaries for Federal Government income tax) were nearly $73,000,000 more than the total county payments in 1920.

County population for the census years covers the entire State. Population figures for the cities and counties for 1951 and 1952 are estimated by local clerks and auditors.

Between 1930 and 1940 a slight decline is shown in the assessed valuation of property for both cities and counties, due to the efforts of the State Board of Equalization to have all property in the State assessed at a like ratio.
