INTRODUCTION

CHANGE IN REPORTED TRANSACTIONS

Relative with the current issue, all transactions pertaining to school districts have been eliminated from this report.

For many years, the records of the county auditors were the only source of information pertaining to school district finances. This situation has been markedly changed in recent years to the point where extensive reports furnished by county superintendents of schools with assistance and guidance of the Department of Education are now available and are published by this office as "The Annual Report of Financial Transactions Concerning School Districts of California." With the gradual development of the separate school district reporting system, the recognition that the continued inclusion of school district transactions in this report was of doubtful value. Essentially, the county auditors' records are necessarily limited to the cash transactions of the several funds, while with the development of a uniform system of accounts by the Department of Education, the school district report has become a comprehensive and authoritative work on the financial aspects of the school program.

Due to the several variances in accounting procedures, the unreconciled differences between the two reports have occasioned some confusion and after weighing the factors involved, it was the opinion and recommendation of the Advisory Committee to the State Controller on the Reporting of Financial Transactions that the interests of the reporting program would best be served by eliminating school district information from the city and county report.

DETAIL AS TO CHANGES

Table 2—Cities: For San Francisco, which has the dual governmental function of a city and county, the tax rate, levy and tax delinquency have been adjusted to exclude school district transactions. The bonded indebtedness has not been so adjusted as all bonds issued for school purposes are general obligations of the City and County of San Francisco.

Table 17—Cities: For San Francisco, when applicable, adjustments as listed for Table 2.

Table 18—Counties: Under county indebtedness, school district bonds have been eliminated.

Table 25—Counties: District payments for education are limited to library functions.

Table 26—Counties: Receipts of district taxes and assessment for elementary, high, junior college and unified schools eliminated. Tax receipts for mosquito, sanitary and park recreation districts have been added.

Table 27—Counties: Subvention and grants pertaining to schools omitted.

Table 29—Counties: Receipts by school cafeterias and day nurseries omitted. The teachers' retirement receipts are continued as they constitute an agency transaction for the State.

Table 34—Counties: Payment for education by unified, elementary, high and junior colleges omitted. Education payments by the superintendent of schools include such special school programs as administered and supervised by the superintendent of schools.

Table 35—Counties: Interest and debt redemption payments for school bonds omitted. For the purposes of this report it was found impracticable to effect a complete elimination of withhold tax pertaining to school employees.

Table 36—Counties: Value of school buildings omitted.

Table 38—Counties: School district tax levies omitted.

NOTE: The City of Oceanside has changed the reporting period from a calendar fiscal year basis. In order to include all the detail not heretofore reported, transactions for this city are for an 18-month period.
