INTRODUCTION

During the Fiscal Year 1957-58, 351 California cities received revenues of \$1,129,512,201 and in the same period expended \$1,164,221,513.

Revenues increased \$87,877,203 or 8 percent over that of the previous year. Property and sales taxes contributed \$451,798,640 or 40 percent of the total. Revenues from Public Service Enterprises which are closely allied to services rendered amounted to \$345,670,006 or 31 percent. Subventions and Grants from State, Federal and County governments amounted to \$135,311,941 or 12 percent; of this total, \$110,028,790 was received from the State.

The relative importance of the city sales tax as a producer of revenue has more than doubled in the past five years. In 1953-54 it was responsible for 6.41 percent of total revenue whereas in the year under review it represents 13.46 percent.

Not all revenues from the locally imposed sales tax accrue to the city of sales situs. The enactment of the Bradley-Burns Uniform Sales and Use Tax Law † permitting county governments to levy a one-cent sales tax had the effect of necessitating agreements between cities and counties as to the division of sales tax revenue collected within cities; the current status of these agreements present a wide range of variations.

† For detailed discussion of this law, see State Board of Equalization Annual Reports for F. Y. 1955-56, 1956-57 and 1957-58.

During the past 20 years, California's economic growth has been reflected in the value of assessed property subject to local tax to the point where the valuations of Fiscal Year 1958-59 are nearly four times that of Fiscal Year 1938-39. The impact of this growth with respect to the distribution of property as between inside and outside of incorporated areas is indicated for selected years in the percentage of the valuations of cities as they relate to the total of each county's valuations.
