COVER . . .

It might be said that any city with a seaport is one up on the landlocked metropolis when it comes to glamour. And certainly the docking of the *Princess Sophie* and the *Canberra,* both on the same day, gives a touch of elegance and sophistication to the City of Long Beach.

That's the *Princess Sophie,* one of the world's largest oil tankers, in the foreground. The *Canberra,* Australia's pride and the largest passenger ship in the world, is in the right background.

But the port provides Long Beach with something more than just a pretty face. In the 1960-61 fiscal year, it handled more than 10,700,000 tons of cargo—which gives Long Beach a pretty fine figure, too, economically speaking.

NOTE

The information listed herein has been extracted from reports prepared by city fiscal officers; such reports, in most instances, are not subject to audit by the State Controller.

A comprehensive analysis of revenues and expenditures as to comparability of cities is of questionable validity without due consideration to the existence of variations in accounting methods and practices as well as qualitative and quantitative differences in services rendered. In an analysis of that type, it is advisable that referral be made to the cities involved for determination if such factors might have a bearing on the material under consideration.

In co-operation with the League of California Cities, the California Society of Certified Public Accountants and many city fiscal officers, this issue as well as the ones for the two preceding fiscal years represents a major revision in the annual reporting of city financial transactions. Due to the revision this report is not comparable in many aspects to reports pertaining to periods prior to Fiscal Year 1958-59.

The classifications and titles follow the basic pattern of the "Chart of Accounts for California Cities" prepared by the California Committee on Municipal Accounting. Where applicable the definitions of accounts are as defined by the National Committee on Governmental Accounting.

INTRODUCTION

For the fiscal year ended June 30, 1961 California cities numbered 372. These cities, exclusive of city-owned enterprises and bond funds, received $1,029,302,417 and expended $1,013,920,257 for cost of government.

During the same period city-owned enterprises consisting of such services as water, electricity, gas, airports, transportation, harbors, cemeteries, hospitals, parking districts and housing received income of $437,482,666 and incurred expenses of $330,780,640; in addition, these enterprises also expended $83,187,863 for capital outlays.

Also for the same period the aggregate expenditures from bond funds of cities and city-owned enterprises amounted to $144,332,967.

General city revenue of $1,029,302,417 represented an increase of $71,280,642 or approximately 7 per cent over that of the previous year.

General city revenues from locally imposed taxes amounted to $587,693,267 or approximately 57 percent of the total. The second largest source of funds was from federal, state and county governments which aggregated $153,912,165 or nearly 15 percent of the total.

The majority of grants received from other governmental agencies are restricted as to the purposes for which they may be expended. The vehicle in lieu tax may be used only for law enforcement, regulation and control of highway traffic and any other state purpose. Gasoline tax grants may be expended only for the construction and maintenance of streets, roads and highways and the acquisition of rights-of-way. For the most part federal and county grants are reserved exclusively for specific purposes. As the city of San Francisco also performs the function of a county government the revenue structure for that city includes approximately 30 million dollars from state and federal sources for county purposes.

Another segment of city revenue which is restrictive in use pertains to money received from fines and forfeitures as a result of violations of the State Vehicle Code. Specifically, such money may be used only for "traffic signs, signals and other traffic control devices, the maintenance thereof, equipment and supplies for traffic law enforcement and traffic accident prevention, and for the maintenance, improvement or construction of public streets, bridges and culverts within such city, but such fund shall not be used to pay the compensation of traffic or other police officers."

Total	$32,680,898	$36,014,309

Many city-owned enterprises have been financed for acquisition and improvement purposes through the issuance of bonds, a number of such bonds being purely revenue, i.e., the debt service to the bond holders is dependent solely on the sufficiency of revenue generated by the enterprise. Another large segment of bonds issued for enterprise purposes are also self liquidating from enterprise revenue; however, such bonds which are also secured by an unlimited property tax authorization are considered as general obligation bonds of the city. In the case of the latter, the debt service amounts provided by the enterprise for such bonds are considered as a revenue contribution from the enterprise and a subsequent general city expenditure for debt service. Of the total revenue received by the cities from enterprises it is estimated that approximately 50 percent is considered as being within this category.

The established importance of sales tax revenue to cities is unmistakable. The $192,296,848 reported by cities from this source constitutes nearly 19 percent of total revenue. Dollarwise as well as from the standpoint of being unrestricted as to expenditure purposes it is second only to property taxes in degree of magnitude. Since Fiscal Year 1956-57, the first year in which was reflected the largest increase in taxable transactions subject to city sales taxes, the rate of revenue increase has leveled off to a point where almost all future year changes will be limited to variations in business conditions. During the last five years the relationship of sales taxes to property taxes has remained fairly constant; for the year under review sales taxes amounted to 32 percent of the total of both sales and property taxes, representing an equivalent property tax rate of $0.92 on $100 of assessed valuation.

Not all revenues from the locally imposed sales tax accrue to the city of sales situs. The enactment of the Bradley-Burns Uniform Sales and Use Tax Law permitting county governments to levy a 1-cent sales tax had the effect of necessitating agreements between cities and counties as to the division of sales tax revenue collected within cities. These agreements vary and are subject to periodic adjustment.

The bonded indebtedness of cities as of June 30, 1961 was $1,410,488,412 of which $575,864,606 represented a revenue bond classification. General obligation bonds of $834,623,806 represented approximately 4 per cent of the assessed valuation of cities.

Although chartered cities may establish their own limitations on bonded indebtedness the large majority of them are the same as general law cities which are limited by the provisions of Section 43605 of the Government Code which states:

> "A city shall not incur an indebtedness for public improvements which exceeds in the aggregate 15 percent of the assessed value of all real and personal property of the city. Within the meaning of this section "indebtedness" means bonded indebtedness of the city payable from the proceeds of taxes levied upon taxable property in the city."

For reporting purposes a general obligation bond is one which is secured by the taxing power of a city. In actual practice many such bonds are redeemed through revenue not directly derived from property taxes, i. e., revenue from other sources such as sales taxes or generated through enterprise activities is used in lieu of a direct property tax for debt service. This procedure however does not lower property taxes as the net effect is to reduce the available revenue which would otherwise apply against property tax needs for other purposes. For the year under review the debt service requirement was equivalent to $0.39 property tax rate.

City-owned enterprise income of $407,482,666 represented an increase of $26,928,636 or nearly 7 per cent over that of the prior year. Expenses of $330,780,640 were $24,474,856 or nearly 8 per cent higher than the previous period. Expenditures for capital outlays amounted to $83,187,869, a decrease of $7,165,865 over the prior year.

The valuation of city assessment rolls for property tax purposes applicable to Fiscal Year 1961-62 amounted to $22,495,121,156, an increase of $1,623,497,989 or nearly 8 percent over the previous year. Taxes levied against this valuation amounted to $408,026,247, an increase of $24,046,765 or approximately 6 percent.

From the period of Fiscal Year 1953-54 through Fiscal Year 1961-62 the value of assessed property for city tax purposes increased 95 percent while for the same period city taxes levied against this valuation increased only 87 percent. For comparative purposes, in the same period the state wide valuation for general county and school purposes increased 84 percent while taxes levied for such purposes increased approximately 156 percent.

Aside from the 71 chartered cities exercising their own option, all other cities are included within the provision of State Statutes as to the total tax rate that can be levied. Section 43068 of the Government Code states in part:

> "Unless a majority of the city electors voting at an election held for that purpose are in favor of it, the annual property tax shall not exceed one dollar ($1.00) on each one hundred dollars ($100), exclusive of such tax * * * (for) any pension plan, * * * exclusive of such tax not to exceed five cents ($0.05) * * * (for) civil defense or disaster preparedness, exclusive of such tax * * * (for) costs of sewage facilities, * * * park and recreation * * * ".

Other code sections permit additional tax levies with various limitations for such purposes as flood control, veterans facilities, museums, libraries, etc. No limitation is placed on the tax rate required to meet bond debt service.

The assessment of city taxes for Fiscal Year 1961-62 was accomplished on the tax rolls of the counties for all except 95 cities. Instead of preparing separate assessments and tax bills and maintaining the detailed records inherent in tax accounting the large majority of cities merely indicated to the counties the tax rate to be applicable for their assessment purposes; such taxes being assessed and collected in the same manner and with the same force and effect as county and school taxes.

The compensation paid to counties for such services is in accordance with Sections 51514 and 51561 of the Government Code which provides that such compensation shall be fixed by agreement between the board of supervisors and the city legislative body. These sections also provide that for general law cities the charges so fixed shall not exceed 1 percent for collecting the first twenty-five thousand dollars ($25,000), and not more than one-fourth of 1 percent for all sums over that amount. In the case of chartered cities the compensation shall not exceed one-half of 1 percent of all money collected.

One of the more significant reasons for general law cities to accomplish their own assessment and collection of taxes is the necessity to place a higher valuation on property than that as determined by the county. This necessity stems largely from the restriction imposed by the maximum tax rate quoted above which applies to general law cities.

As a partial answer to this problem the legislature recently enacted a provision of law (Section 43072 of the Government Code) which provides that any statutory rate limitation to which a general law city is subject is automatically increased (if applicable) when the city transfers its assessment and collection functions to the county. This increase is proportional to the amount by which the assessed value of property on which city taxes were extended exceeded the assessed value of that property for county tax purposes in the last year for which the city collected its own property taxes.

The significance of the above provisions is already apparent as approximately 20 cities have indicated intentions to transfer tax assessment functions to the counties for the ensuing fiscal year.

† This city assesses common property and collects its own property tax. Counties assess common property and collect taxes for cities not designated.

†† Article XIII, Sec. 14, Calif. Const. (in part) State-assessed Property: . . . all pipe lines, flumes, canals, ditches and aqueducts not entirely within the limits of any one county . . . railroad companies . . . car loaning and other car companies operating upon the railroads in this state . . . telegraph and telephone companies . . . companies engaged in the transmission or sale of gas or electricity—shall be assessed by the State Board of Equalization. . . .

††† Tax Rate: Per $100 of net secured valuation. Part of rate (generally on bonds) may not apply to entire valuation.

* Tax levy of prior year.

** San Francisco: Tax rate and taxes levied are exclusive of school and special district purposes. Consolidated rate and levy for all purposes $8.31 and $123,653,443 respectively.
