ANNUAL REPORT OF

FINANCIAL TRANSACTIONS

Concerning

Cities of California

Fiscal Year 1961-62

ALAN CRANSTON
State Controller

NOTE

The information listed herein has been extracted from reports prepared by city fiscal officers; such reports, in most instances, are not subject to audit by the State Controller.

A comprehensive analysis of revenues and expenditures as to comparability of cities is of questionable validity without due consideration to the existence of variations in accounting methods and practices as well as qualitative and quantitative differences in services rendered. In an analysis of that type, it is advisable that referral be made to the cities involved for determination if such factors might have a bearing on the material under consideration.

In co-operation with the League of California Cities, the California Society of Certified Public Accountants and many city fiscal officers, this issue as well as the ones for the three preceding fiscal years represents a major revision in the annual reporting of city financial transactions. Due to the revision this report is not comparable in many aspects to reports pertaining to periods prior to Fiscal Year 1958-59.

The classifications and titles follow the basic pattern of the "Chart of Accounts for California Cities" prepared by the California Committee on Municipal Accounting. Where applicable the definitions of accounts are as defined by the National Committee on Governmental Accounting.

INTRODUCTION

For the fiscal year ended June 30, 1962 California cities numbered 377. These cities, exclusive of city-owned enterprises and bond funds, received $1,097,683,459 and expended $1,086,040,617 for cost of government.

During the same period city-owned enterprises consisting of such services as water, electricity, gas, airports, transportation, harbors, cemeteries, hospitals, parking districts and housing received income of $470,498,105 and incurred expenses of $366,003,464; in addition, these enterprises also expended $109,028,161 for capital outlays.

Also for the same period the aggregate expenditures from bond funds of cities and city-owned enterprises amounted to $150,887,437.

General city revenues of $1,097,683,459 represented an increase of $68,381,042 or nearly 7 percent over that of the previous year.

General city revenues from locally imposed taxes amounted to $628,852,799 or approximately 57 percent of the total. The second largest source of funds was from federal, state and county governments which aggregated $159,261,170 or nearly 15 percent of the total.

The majority of grants received from other governmental agencies are restricted as to the purposes for which they may be expended. The vehicle in lieu tax may be used only for law enforcement, regulation and control of highway traffic and any other state purpose. Gasoline tax grants may be expended only for the construction and maintenance of streets, roads and highways and the acquisition of rights-of-way. For the most part federal and county grants are reserved exclusively for specific purposes. As the City of San Francisco also performs the function of a county government the revenue structure for that city includes approximately 32 million dollars from state and federal sources for county purposes.

Another segment of city revenues which is restrictive in use pertains to money received from fines and forfeitures as a result of violations of the State Vehicle Code. Specifically, such money may be used only for "traffic signs, signals and other traffic control devices, the maintenance thereof, equipment and supplies for traffic law enforcement and traffic accident prevention, and for the maintenance, improvement or construction of public streets, bridges and culverts within such city, but such fund shall not be used to pay the compensation of traffic or other police officers."

Many city-owned enterprises have been financed for acquisition and improvement purposes through the issuance of bonds, a number of such bonds being purely revenue, i.e., the debt service to the bond holders is dependent (in so far as the bond agreements are concerned) solely on the sufficiency of revenue generated by the enterprise. Another large segment of bonds issued for enterprise purposes are also self liquidating from enterprise revenue; however, such bonds which are also secured by an unlimited property tax authorization are considered as general obligation bonds of the city. In the case of the latter, the debt service amounts provided by the enterprise for such bonds are considered as a revenue contribution from the enterprise and a subsequent general city expenditure for debt service. Of the total revenue received by the cities from enterprises it is estimated that approximately 50 percent is considered as being within this category.

During the year under review all cities except one newly incorporated, had a local sales tax ordinance in effect. The $204,588,328 reported by cities from this source constituted nearly 19 percent of total revenues. Dollarwise as well as from the standpoint of being unrestricted as to expenditure purposes it is second only to property taxes in importance. During the last six years, the relationship of sales taxes to property taxes has remained fairly constant; for this year sales taxes amounted to 33 percent of the total of both sales and property taxes, representing a property tax rate equivalent of $0.91 on $100 of assessed valuation.

Not all revenues from the locally imposed sales tax accrue to the city of sales situs. The enactment of the Bradley-Burns Uniform Sales and Use Tax Law permitting county governments to levy a 1-cent sales tax had the effect of

necessitating agreements between cities and counties as to the division of sales tax revenue collected within cities. These agreements vary and are subject to periodic adjustments. In addition to the agreements listed below which are formalized by local ordinances of cities and counties and by contract with the State Board of Equalization acting as collection agent, several counties have supplemental agreements with their cities in which a percentage of collections is returned to the city of sales situs. This percentage is usually equal to the amount retained by the state as an administrative charge against the respective city.

The bonded indebtedness of cities as of June 30, 1962 was $1,585,627,830 of which $686,670,294 represented a revenue bond classification. General obligation bonds of $898,957,536 amounted to nearly 4 percent of the asssessed valuation of cities.

Although chartered cities may establish their own limitations on bonded indebtedness the large majority of them are the same as general law cities which are limited by the provisions of Section 43605 of the Government Code which states:

> "A city shall not incur an indebtedness for public improvements which exceeds in the aggregate 15 percent of the assessed value of all real and personal property of the city. Within the meaning of this section 'indebtedness' means bonded indebtedness of the city payable from the proceeds of taxes levied upon taxable property in the city."

For reporting purposes a general obligation bond is one which is secured by the taxing power of a city. In actual practice many such bonds are redeemed through revenue not directly derived from property taxes, i.e., revenue from other sources such as sales taxes or generated through enterprise activities is used in lieu of direct property tax for debt service. The impact of this procedure however has the same effect as a direct property tax as the net result is the reduction of available revenue which would otherwise apply against property tax needs for other purposes. For the year under review the debt service requirement was equivalent to $0.39 property tax rate.

City-owned enterprise income of $470,498,105 represented an increase of $33,015,439 or nearly 8 percent over that of the prior year. Expenses of $366,003,464 were $35,222,824 or nearly 11 percent higher than the previous period. Expenditures for capital outlays amounted to $109,028,161, an increase of $25,840,298 over the prior year.

The valuation of city assessment rolls for property tax purposes applicable to Fiscal Year 1962-63 amounted to $23,840,658,094, an increase of $1,345,536,938 or nearly 6 percent over the prior year. Taxes levied against this valuation amounted to $445,783,956, an increase of $37,757,709 or 9 percent.

From the period of Fiscal Year 1953-54 through Fiscal Year 1962-63 the value of assessed property for city tax purposes increased 107 percent while for the same period city taxes levied against this valuation increased 105 percent.

Aside from the 70 chartered cities exercising their own option, all other cities (except as indicated below) are included within the provisions of state statutes as to the total tax rate that can be levied. Section 43068 of the Government Code states in part:

"Unless a majority of the city electors voting at an election held for that purpose are in favor of it, the annual property tax shall not exceed one dollar ($1.00) on each one hundred dollars ($100), exclusive of such tax * * * (for) any pension plan, * * * exclusive of such tax not to exceed five cents ($0.05) * * * (for) civil defense or disaster preparedness, exclusive of such tax * * * (for) costs of sewage facilities, * * * park and recreation * * *"

Other code sections permit additional tax levies with various limitations for such purposes as flood control, veterans facilities, museums, libraries, etc. No limitation is placed on the tax rate required to meet bond debt service.

The assessment of city taxes for Fiscal Year 1962-63 was accomplished on the tax rolls of the counties for all except 75 cities. Instead of preparing separate assessments and tax bills and maintaining the detailed records inherent in tax accounting the large majority of cities merely indicated to the counties the tax rate to be applicable for their assessment purposes; such taxes being assessed and collected in the same manner and with the same force and effect as county and school taxes.

The compensation paid to counties for such services is in accordance with Sections 51514 and 51561 of the Government Code which provides that such compensation shall be fixed by agreement between the board of supervisors and the city legislative body. These sections also provide that for general law cities the charges so fixed shall not exceed 1 percent for collecting the first twenty-five thousand dollars ($25,000), and not more than one-fourth of 1 percent for all sums over that amount. In the case of chartered cities the compensation shall not exceed one-half of 1 percent of all money collected.

One of the more significant reasons for general law cities to accomplish their own assessment and collection of property taxes is the necessity to place a higher valuation on property than that as determined by the county. This necessity stems largely from the restriction imposed by the maximum tax rate quoted above which applies to general law cities.

As a partial answer to this problem the legislature recently enacted a provision of law (Section 43072 of the Government Code) which provides that any statutory rate limitation to which a general law city is subject is automatically increased (if applicable) when the city transfers its assessment and collection functions to the county. This increase is proportional to the amount by which the assessed value of property on which city taxes were extended exceeded the assessed value of that property for county tax purposes in the last year for which the city collected its own property taxes.

In the first year after the enactment of the above law the following 19 general law cities transferred the tax assessment function to the counties.

City	*County Location*	*City*	*County Location*
Antioch	Contra Costa	Lindsay	Tulare
Arroyo Grande	San Luis Obispo	Martinez	Contra Costa

In addition to the above, 18 other general law cities have indicated intentions to transfer tax assessment functions to the counties for ensuing fiscal year.

† The city assesses common property and collects its own property tax. Counties assess common property and collects taxes for cities not designated.

†† Article XIII, Sec. 14, Calif. Const. (in part) State assessed property: . . . all pipe lines, flumes, canals, ditches and aqueducts not entirely within the limits of any one county . . . railroad companies . . . car loaning and other car companies operating upon the railroads in this State . . . telegraph and telephone companies . . . companies engaged in the transmission or sale of gas or electricity—shall be assessed by the State Board of Equalization.

††† Tax Rate: Per $100 of net secured valuation. Part of rate (generally on bonds) may not apply to entire valuation.

* San Francisco: Tax rate and taxes levied are exclusive of school and special district purposes. Consolidated rate and levy for all purposes $9.39 and $140,526,581 respectively.
