This 72nd publication of financial transactions concerning Cities of California presents a new format in financial reporting. The cities are listed alphabetical in population group order. A new chart of accounts was developed. Revenues are reported as either functional or general. The revenue and expenditure tables reflect transactions of general city as well as the enterprise funds. Allocation of indirect costs was required.

We certainly hope these changes will enchance the usefulness of the data. We wish to thank everyone concerned for their cooperation in making this publication possible.

PURPOSE AND USE OF BOOK

The purpose of the publication is to enhance the usefulness to readers interested in comparison studies, this publication presents information pertaining to revenues and expenditures, and groups this data according to the cities' estimated population. The reader thus will be able to compare city revenues and/or expenditures to other similar population–sized cities and make comparisons between individual cities of the same population, to smaller or larger population groups and to the state total.

The population group classification, number of cities in each group, and percentage of cities in each group are as follows:

Cities of California

Group Classification	*Number of Cities in Group Classification*	*Percentage of Cities in Each Group*
Under 10,000	162	37.8
10,000–25,000	97	22.6
25,001–50,000	81	18.9
50,001–100,000	63	14.7
100,001–250,000	20	4.6
over 250,000	6	1.4
Total	429 *	100.0

* The City and County of San Francisco is not included in this total.

In order to find data pertaining to a particular city, the reader can locate the population group in which the city is grouped by referring to Table 1. Table 1 provides an alphabetical listing of cities and the population group classification to which it belongs.

After the determination of the population group classification, the cities'revenues, expenditures and long–term debt, can be located on the appropriate table by the use of the table of contents.

It should be noted, that the City and County of San Francisco is not included in any population group classification. Due to its nature of being a city and county entity, the inclusion of the City and County of San Francisco would not lead to any comparable basis in relation to other cities. Data regarding San Francisco is shown at the end of the revenue and expenditure tables. State totals for these tables are shown exclusive and inclusive of the City and County of San Francisco.

a specific service by external requirements, general revenues are revenues that cannot be associated with a specific service.

In reviewing the revenue tables, the reader should take into consideration these points: (1) revenues from general government and city–owned enterprises are consolidated within these tables, (2) total revenues do not reflect special assessments (Improvement Acts 1911, or 1915, and other), internal service fund, pension trusts, and agency transactions.

Tables 2–7 include expenditures from general government and city–owned enterprise activities. The components of expenditures presented in these tables are operating expenditures and capital outlay. Operating expenditures include debt service and excludes depreciation expense from enterprise funds.

Footnote information will follow specific activities which will provide the reader with data concerning services being provided within a particular city. In addition, these tables provide data on current assessed valuation and property taxes allocated and levied.

Tables 8–13 present data regarding government financing provided from outstanding long–term indebtedness as of June 30, 1982. Data on bonded indebtedness, future lease payments, financing obligations provided from Federal and State agencies, and special assessment acts are provided for each city.

At the conclusion of each table, there is a population group summary. The summary includes for each population the following; (1) total number of cities within the group, (2) total revenues and expenditures, (3) summary of revenues and expenditures as a percent of the State total (excluding the City and County of San Francisco).

NOTE TO READER

The information listed here in has been extracted from reports prepared by city fiscal officers; such reports, in most instances, are not subject to audit by the State Controller.

It is recognized this publication may not contain comparable financial data, since all cities do not maintain the same account structure. With this publication an attempt was made to provide comparable financial data with the implementation of a new uniform classification system.

For the fiscal year ended June 30, 1982, revenues generated from general government and city–owned enterprises amounted to $10,296,894,970. Of the total revenues, functional revenues provided $5,897,761,197 or 57.28 percent of total revenues and general revenues totaled $4,399,-133,773 or 42.72 percent of total revenues. The City and County of San Francisco is not included in the State total.

Outstanding Long–Term Indebtedness

Long–Term Indebtedness – Bonds

Chartered cities may establish their own limitations on bonded indebtedness, although a large majority adhere to the provisions of Section 43605 of the Government Code as do general law cities. The code in part states:

"A city shall not incur an indebtedness for public improvements which exceeds in the aggregate 15 percent of the assessed value of all real and personal property, of the city. Within the meaning of this section indebtedness means bonded indebtedness of the city payable from the proceeds of taxes levied upon taxable property in the city."

For the year under review, total outstanding bonded indebtedness for cities amounted to $4,087,295,794.

Bonded indebtedness includes: (1) general obligation, (2) revenue, (3) improvement districts, and (4) limited obligation.

A general obligation bond is one which is secured by the taxing powers of the city. Many general obligation bonds may be redeemed through revenues not directly derived from property taxes, but from sources such as sales tax or city–owned enterprises (i.e., water, electric, sewers, parking, etc.). Such revenue producing activities are used in–lieu of a direct property tax for debt service.

General obligation bonds amounted to $523,779,431 or 12.81 percent of total outstanding bonded indebtedness.

Revenue bonds are those obligations in which principal and interest are payable by revenue producing enterprises, (i.e., electricity, water, sewers, etc.) or if specified in the bond convenant from other sources. Revenue bonds outstanding for year 1981–82 amounted to $3,479,548,-172 or 85.13 percent of the total outstanding bonded indebtedness.

Improvement district bonds whose principal and interest are payable from property taxes or assessments levied on less than city wide districts, (i.e., parking and sewer districts), amounted to $83,439,191 or 2.04 percent of total outstanding bonded indebtedness.

Limited obligation bonds totaled $529,000 or .01 percent of the total outstanding bonded indebtedness. Principal and interest for this type of bond is payable from taxes other than property taxes, or assessments levied by the city.
