

JOHN CHIANG
California State Controller

July 26, 2007

**To the Citizens, Governor, and Members
of the Legislature of the State of California:**

I am pleased to submit the 27th edition of the *Public Retirement Systems Annual Report* for the fiscal year ended June 30, 2005. This report serves as a reference source for persons concerned with the status and adequacy of funding for public retirement systems in California.

Sections 7501-7504 of the Government Code require state and local public retirement systems to submit audited reports to the State Controller within six months of the end of their respective fiscal years. In addition, the defined benefit systems are required to submit an actuarial valuation every three years at a minimum. This publication is compiled from the data contained in those individual reports.

Following are the highlights of the financial activities of California's public retirement systems for the fiscal year ended June 30, 2005.

- The aggregate funding ratio for all defined benefit systems continued to decline and has decreased to 88%, 1% down from the 2003-04 funding ratio of 89%. In addition, 17 open systems reported a funding ratio of less than 85%, an increase from 5 open systems in the 2003-04 fiscal year.
- Beginning this year, the California Public Employees' Retirement System (CalPERS) began reporting contracting agency information using newly formed risk sharing pools generally for plans with less than 100 members. Contracting agencies may have plans participating in risk sharing pools and plans that are not part of the risk sharing pools. Of the 1,434 contracting agencies, there are a total of 2,025 plans, of which 1,567 plans are now participating in the risk sharing pools.

I would like to extend my appreciation to all those in both the public and the private sectors who contributed to this report, as well as to my staff. Their cooperative efforts made this publication possible.

Sincerely,

Original Signed By:

JOHN CHIANG
California State Controller

Introduction

Government Code Section 7501-7504 directs the California State Controller to compile and report the financial transactions of California's retirement systems to the public annually. The *Public Retirement Systems Annual Report* is based on actuarial data and audited financial statements for the period of July 1, 2004, through June 30, 2005, for the 133 public retirement systems that filed their reports.

California has 10 state systems, 20 systems operating under the County Employees Retirement Law of 1937 (1937 Act), one independent county system (San Luis Obispo County), 38 city systems, 57 special district systems, three school district systems, and four other systems. The "other" category includes systems that do not have one predominant sponsoring or employing agency. Currently, this category includes four systems: the Public Agency Retirement System (PARS) Defined Benefit Plans, the PARS Defined Contribution Plan, the Housing Authority of the County of Tulare Defined Contribution Pension Plan, and the San Diego Housing Commission Pension Plan. In the 2004-05 fiscal year, one new system, Los Angeles County Metropolitan Transportation Authority AFSCME Employees' Retirement Income Plan, began reporting to the State Controller's Office and one system, the City of Adelanto Employee Retirement Plan, ceased reporting.

Comparisons and Evaluations

The Government Code provisions for periodic and independent analysis of the financial transactions of each public retirement system enable the California State Controller to gather information upon which to base comparisons and evaluations of the financial condition of such systems. These comparisons and evaluations are included in this Introduction, in the sections titled Discussion of Key Issues and Summary of Statistical Data.

Financial and Actuarial Data

To facilitate comparison and to provide detailed financial and actuarial information, the State Controller's Office presents the 133 reporting retirement systems based on their organizational structure as either defined benefit (86) or defined contribution (47).

There are 86 systems classified as "defined benefit." In a defined benefit system, benefits are predetermined by a formula based in part on the employee's salary and/or length of service. The employer's contributions are determined on the basis of benefits to be paid.

The other 47 systems are classified as "defined contribution." In a defined contribution system, the rate of contribution by the employer, and sometimes by the employee, is fixed. Therefore, the employee's pension benefit will be whatever amount the accumulated contributions plus investment earnings will provide at retirement.

In this report, both the defined benefit system and the defined contribution system sections have been divided by state, county, city, special district, school district, and other systems. However, the reporting counties have no

defined contribution systems at this time. This publication presents the systems' data in accordance with guidelines established by Governmental Accounting Standards Board (GASB) Statements No. 25, 26, and 34.

In this publication, we have grouped California Public Employees' Retirement System (CalPERS) financial and actuarial data with other state defined benefit systems. However, we have included a supplemental CalPERS section for a more comprehensive view of CalPERS and of the 1,434 active public employers that contract with CalPERS to administer their retirement systems. Beginning this year, CalPERS provided information based on risk pools.

Risk pooling is the process of combining assets and liabilities across employers to produce large risk sharing pools. Further information regarding risk pooling can be found on page 286 of this publication. Of the 1,434 active contracting public employers, there are a total of 2,025 plans, of which 1,567 plans are in the newly formed risk sharing pools. Employers may have plans in a risk sharing pool and plans that are not part of the risk sharing pool. The supplemental CalPERS section details the funding position, retirement benefit policies, disability benefit policies, and the contribution rate of both the employer and employee for each contracting agency.

Retirement Systems Included, Excluded

The retirement systems included in this publication are those chartered or operated by – or on behalf of – state and local public agencies.

Systems excluded from this publication are defined contribution plans, such as Internal Revenue Code 457 and most 401(k) plans, that are designed for employee retirement savings with no employer participation.

Accounting

Each system reported in this publication maintains its own set of accounting records, with accounts for assets and liabilities. The amount of net assets available for benefits is equal to assets minus liabilities, and changes to net assets available for benefits are shown as additions and deductions in the Statement of Changes in Net Assets, in accordance with GASB Statements No. 25 and 27.

The majority of the systems operate on either a fiscal-year basis, with the year ending June 30, or a calendar-year basis, with the year ending December 31. A few systems operate on accounting cycles that end on dates other than June 30 or December 31. This publication includes calendar-year systems with the year ending December 31, 2004; fiscal-year systems with the year ending June 30, 2005; and "off-fiscal" year systems with fiscal years ending between July 1, 2004, and June 30, 2005.

Audit Requirements

The State Controller's Office has compiled the financial information in this publication from financial statements audited by a qualified person, in accordance with Government Code Section 7504(b). As defined in the code, "a qualified person" means:

1. A person who is licensed to practice as a certified public accountant in this state by the California State Board of Accountancy;

2. A person who is registered and entitled to practice as a public accountant in this state by the California State Board of Accountancy;
3. A county auditor in any county subject to the County Employees' Retirement Law of 1937; or
4. A county auditor in any county having a pension trust and retirement system established pursuant to Government Code Section 53216.

Discussion of Key Issues

Material in this publication is intended for informational purposes only. The findings presented in this introduction are the State Controller's Office's summarization of information received from California's retirement systems. They should not be construed as proposals for action made by the California State Legislature, the California State Controller, or any part of the Executive Branch of the State of California.

This publication contains detailed financial and actuarial information derived from individual reports submitted to the California State Controller by each public retirement system. The detail sections for each public retirement system may contain comments and/or footnotes describing any existing situations or conditions deemed to be of potential interest to the users of this publication. This discussion section highlights some of the key areas of concern impacting public retirement systems.

Retirement Benefits

The typical public retirement system in California provides retirement benefits based on the retiree's years of service and final compensation. For example, in a system that provides 2% per year at age 60, members with 20 years of service may retire at age 60 and receive upon retirement approximately 40% of their average salary as defined. Each system has a normal retirement age, or the age when full retirement benefits are paid. Most systems allow early retirement at a reduced benefit.

In many retirement systems, retirees' benefits are automatically increased to replace the purchasing power lost through inflation. This cost of living adjustment (COLA) benefit is linked to an index that measures inflation, although it may be limited to a maximum annual percentage increase. Some systems do not provide automatic COLA benefits, offering *ad hoc* increases instead.

In some retirement systems, employees receive different benefits, depending on their classification. Safety employees, such as police officers and firefighters, receive higher benefits than do general employees. This higher benefit may be manifested in a higher percentage per year of service and/or a younger normal retirement age. Systems may also have different tiers of pension coverage for employees within the same classification, with each tier providing different benefits. The tier to which an employee belongs often depends on his or her date of hire.

Benefit Factors

The factors involved in determining retirement benefits are not easily compared because of the variety of provisions within each system and among employer categories. A typical defined benefit retirement system will use three factors to determine an employee's benefits: number of years of

service, age at retirement, and final average salary (FAS). This publication reports details of the specific benefit provisions of each retirement system along with each system's financial and actuarial data. Refer to the Table of Contents to locate a specific system.

The number of years of service required to qualify for benefits can range from zero, as in the case of a duty-related disability retirement benefit, to as many as 20 years of service for full retirement benefits. The age at retirement can be anywhere between 50 to 71 years of age depending on the member's years of service.

The compensation amount systems use in calculating benefits also varies. Between defined benefit systems and tiers within systems, 15 systems use compensation earned at the time of retirement as the basis for determining retirement benefits, 14 systems use compensation of the position last held, 17 systems use a formula that averages compensation earned in the final years of service, and 71 systems use a formula that averages the highest years of compensation earned. We have excluded other defined benefit systems from the count because they did not report a FAS formula. Therefore, the sum of the number of systems using a given FAS formula has no relationship to the total of 86 defined benefit systems reporting. Systems that average compensation use a range of years of average salary earned varying from a one-year period to a five-year period. Because most defined benefit systems have multiple tiers that may use different FAS formulas, some systems may be included in more than one of the above categories.

Financing Benefits

The goal of a defined benefit system is to finance pre-defined employee benefits by accumulating assets through employer/employee contributions and investment earnings. The yield from investments is important, as higher investment returns help reduce contributions needed in future years.

Defined contribution systems accumulate contributions for retirement without defining the retirement benefit. Most gains, losses, and earnings of the system are credited to the employees' accounts.

Contributory systems require employees to share in the cost of financing their retirement benefits through monthly contributions. The state systems require contributions at a flat percentage of salary, commonly from 5% to 9%. County systems require contributions at rates that vary with the employee's age at employment.

Rather than accumulating funds in advance, a few systems operate on a pay-as-you-go basis. Under this system, only those funds necessary to meet the current obligations are appropriated. As there are no significant assets in these systems to generate investment returns, employer contributions may tend to escalate rapidly.

To develop a financing program for defined benefits, systems must project the future stream of payments to retirees and beneficiaries through the services of an actuary, using a process known as an actuarial valuation. Systems submit to the State Controller's Office Actuarial Valuation Reports,

Financial Transactions Reports, and audited Financial Statements Reports; and the State Controller's Office reviews the reports concurrently. Government Code Section 7504 requires an actuarial valuation to be performed at least every three years, while GASB Statement No. 25 requires one at least every two years. The majority of the systems perform an actuarial valuation every one or two years.

Actuarial Valuations for Defined Benefits

Once the value and timing of these benefits are actuarially projected, they are typically financed by annual contributions designed to be a constant percentage of total payroll. Contributions are designed to increase at the same rate as wages. For various reasons, the contribution rates change from valuation to valuation. If, for instance, higher benefits are given, the valuation of the system should show a higher contribution requirement. Other reasons for a rate change could be a change in the assumptions used in a system's benefits valuation or a significant variance between actual experience and the assumptions used. Projections made by a retirement system are based on the experience of that system. The assumptions included in this publication are those that must be given "particular consideration," pursuant to Government Code Section 7502. Excluded from this publication is a multitude of other actuarial assumptions that may be used in a variety of plans but are not statutorily required to be reported.

This publication lists the salary scale and interest rate assumptions for each defined benefit pension system. Generally, changes in these two assumptions have opposing effects on contribution rates. Increasing the interest rate assumption means the pension fund is expected to earn more on its investments and, therefore, lower contributions will be needed. Increasing the salary scale means anticipating higher salaries and correspondingly higher benefits, resulting in higher contribution requirements.

Responsible Funding

The responsible funding of retirement systems vitally concerns all interested parties, because systematic and adequate funding enhances the financial stability of these retirement systems.

For defined benefit pension systems, a measure of the achievement of responsible funding is the system board's adoption of contribution rates that have been recommended by the actuary. This publication lists both the rates recommended by the actuary and those adopted by the retirement board. Of the 86 defined benefit systems reporting, 21 systems have adopted employer contribution rates that are different from the rates recommended by the system actuary. Of those 21 systems, 13 have adopted employer contribution rates that are below the rates recommended by the system actuary. Seven systems have adopted employer contribution rates that exceed the rates recommended by the system actuary. One system, with multiple tiers, has adopted employer contribution rates that are both below and above the rates recommended by the system actuary. This publication does not explain why retirement boards choose contribution rates that are different from those recommended by the system actuary, as the boards do not usually disclose their reasoning in the submitted reports. Note that many of the defined benefit systems contain multiple tiers and adopt different rates within the system itself.

Another measure for defined benefit systems is the funding ratio, which is used to compare the assets of a system to its actuarial liabilities. Under ideal circumstances, the actuarial liabilities would equal the actual assets of the system, but they seldom do.

Various reasons explain why the asset and liability values differ. One reason might be a system's increase of benefits retroactively for past service, which causes actuarial liabilities to increase without a corresponding increase in the assets. Another reason would be salaries increasing at a rate faster than that assumed in the salary scale, which also would cause actuarial liabilities to increase. A third cause may be that the rate of return on investments varies from the rate assumed.

The difference between actuarial liabilities and system assets is called the unfunded actuarial accrued liability (UAAL). The UAAL is funded by amortization over a period of time recommended by the actuary. It is possible for the UAAL to be overfunded (more assets than liabilities), in which case the UAAL will be reported as a negative number.

Extending the amortization period reduces the annual payment for retiring the UAAL. In this publication, a supplemental contribution rate – called the UAAL amortization rate – is shown with the normal rate in each plan's contribution rate table. The normal rate is the necessary percentage of payroll contributed to the retirement fund to pay for future benefits earned in the current fiscal year. The UAAL amortization rate allows for the system to meet contribution deficiencies from the past.

Note that, because many systems design the UAAL amortization payments to increase proportionately with salaries, it may be possible for the funding ratio to decrease in the early years of the amortization period.

Finally, note that a 100% funding ratio means only that past funding deficiencies have been made up, not that the financing program is completed. If a system achieves a 100% funding ratio, the total contribution required would be equal to the normal contributions required to finance retirement benefits earned by employees in the current year.

Funding Positions

Figure 2 on page xv shows that, in the aggregate, statewide actuarial liabilities are approximately \$504.2 billion while net assets available for benefits are approximately \$445.4 billion. Actuarial accrued liabilities exceed the actuarial assets by approximately \$58.9 billion; the aggregate funding ratio is 88%. The funding ratio is the ratio of system assets to actuarial liabilities. The aggregate funding ratio for all reporting defined benefit systems has decreased 1% from the 2003-04 fiscal year aggregate funding ratio. Eight systems reported funding ratios below 50%; all of these systems have been closed to new membership, a move that will help control future costs. These closed systems will cease to exist when no beneficiaries remain to receive the benefits. Figure 2 also shows an aggregate funding liability per member of \$16,220, with county systems having the greatest funding liability at an average of \$33,121 per member.

An analysis of the reports submitted for this publication shows that the 2004-05 fiscal year average employer contribution rate was 11.1% of covered payroll for defined benefit general systems and 17.7% of covered payroll for defined benefit safety systems.

Generally, a funding ratio of 85% or above has been used as an indicator of a healthy system. The past few years have seen an increasing number of systems reporting lower funding ratios each year. Recent analyses show 17 open systems with funding ratios of less than 85% in the 2004-05 fiscal year, an increase from 5 open systems in the 2003-04 fiscal year. Figure 4, located under “Funding Position for Defined Benefit Plans,” lists the affected systems along with the past three years of data.

Employer Contributions

Many systems are attempting to control costs by adding new benefit tiers that offer lower benefit levels to their membership and by closing the higher benefit tiers to new employees. Of the 86 defined benefit systems reporting, 37 have adopted multiple benefit tiers. The effect of the new benefit levels can be seen by comparing the contribution rates for the various systems. Generally, additional tiers translate to reduced benefits, which result in reduced contribution rates for the new tiers.

Disability Requirements

Most California public employee retirement systems report similar disability retirement benefits, ranging from 33% to 50% income replacement for both safety and general members.

The median percentage of disability retirees to all retirees receiving benefits, survivors not included, was 12.3% during the period covered by this report. These percentages ranged from 0% to 100%. Because most of these systems had similar benefits, the wide range appears to be the result of differing policies and practices of individual retirement boards in administering disability retirements.

Interest Rate Assumptions

During the 2004-05 fiscal year, the median interest rate assumption among all reporting defined benefit systems was 8.0%, averaging 7.5%. The actual earning median among defined benefit systems for the year was 9.7%, with an average of 9.3%.

Legislative and Accounting Changes

On July 1, 1991, the Omnibus Reconciliation Act of 1990 (OBRA 1990) became effective. OBRA 1990 requires all state and local governmental employers to provide retirement benefits to their part-time and intermittent employees or to participate in Social Security.

Many of the reporting agencies in this publication have established new levels of benefits for their part-time and intermittent employees. One system, Public Agency Retirement System, was created specifically to address the new requirements placed on local governmental employers by OBRA 1990.

In November 1994, GASB issued Statements No. 25, 26, and 27, entitled, respectively, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, *Financial Reporting for Postemployment Healthcare Plans Administered by Defined Benefit Pension*

Plans, and Accounting for Pensions by State and Local Governmental Employers.

The provisions of GASB Statements No. 25 and 26 are effective for periods beginning after June 15, 1996. The provisions of GASB Statement No. 27 are effective for periods beginning after June 15, 1997.

GASB Statement No. 26 provides guidance for accounting and financial reporting of postemployment healthcare plans and does not affect the areas of this report. Beginning with the 1997-98 publication of this report, we have obtained the financial and actuarial information provided herein from audited financial statements that have been prepared, except where noted, in accordance with GASB Statement No. 25 or 27. These two statements require, among other things, a statement of plan net assets, a statement of changes in plan net assets, and that investments be carried at fair value with unrealized gains and losses included in the statement of changes in plan net assets. Additions to net assets available for benefits must include the net appreciation or depreciation in the fair value of investments. This publication also presents annual required contributions (ARC) of the employer and the employee. ARC should be actuarially determined in accordance with GASB Statement No. 25 parameters. Defined benefit plans are also required to footnote disclosures regarding actuarial methods, contribution requirements, and funding progress of the system. This requirement supersedes GASB Statement No. 5, which required invested assets to be reported at cost or amortized cost.

In June 1999, GASB issued Statement No. 34, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments*. This statement establishes financial reporting standards for state and local governments, including public employee retirement systems. GASB Statement No. 34 becomes effective in three phases, based on a government’s total annual revenues in the first year ending after June 15, 1999.

Summary of Statistical Data

Funding Position for Defined Benefit Systems

This section provides comparisons, evaluations, and other pertinent information on the public employee retirement systems included in this publication. The information is provided as text, tables, and graphic presentations.

Figures 1 through 3 show the progress systems have made in accumulating assets to pay for benefits when due. The funding ratio is one method for assessing this progress. However, various actuarial methodologies can be used to calculate the funding ratio of a retirement system, with each method resulting in a different funding ratio for the same system.

Figure 1 shows that, of the 83 defined benefit systems that reported funding ratios, 45 (54.2%) have funding ratios of 85% or higher. Of the 38 systems with funding ratios under 85%, 13 have been closed to new employees. These 13 systems account for 0.1% of the statewide defined benefit membership and 0.6% of the statewide funded liability. The 17 open systems with a funding ratio under 85% account for 3.2% of the statewide

membership and 9.5% of the statewide funded liability. The remaining eight systems have both open and closed tiers. These eight systems account for 9.6% of statewide defined benefit membership and 13.4% of the statewide funded liability.

Figure 1

Funding Ratio Distribution

Figure 2 illustrates that, as indicated by the funding ratios, when the actuarial liabilities and assets of individual systems in each category are compared as an aggregate amount, the funding positions of state, county, city, special district, and other systems declined from the 2002-03 fiscal year to the 2004-05 fiscal year.

Figure 2

Summary of Statewide Funding Position for Defined Benefit Systems (Aggregate Amount)

(Amounts in thousands)

Agency	Actuarial Accrued Liability	Actuarial Value of Assets	Unfunded Actuarial Accrued Liability (Funding Excess)	Funding Ratio			Unfunded Actuarial Accrued Liability (Funding Excess) Per Member
				2002-03	2003-04	2004-05

The average values are shown in Figure 3. The divergence in values between the aggregate funding ratios and the average values is caused by the variances between the individual systems as opposed to the aggregate ratios.

Figure 3

Funding Ratio Trends, Average Value

The funding position of most systems has continued to decline. Past investment losses and increased benefit packages, resulting in increased actuarial liabilities, may have contributed to the decline. Figure 4 shows that 17 open systems reported a funding ratio of less than 85% for the 2004-05 fiscal year. Figure 4 shows only systems with all open tiers. Another eight systems with multiple tiers exist – some open and some closed – with funding ratios under 85%: Alameda County Employees' Retirement Association (ERA), Los Angeles County ERA, Merced County ERA, San Diego County ERA, San Mateo County ERA, East Bay Municipal Utility District Retirement System, Turlock Irrigation District Pension Plan, and Public Agency Retirement System (PARS) Defined Benefit Plans. We are unable to determine which tiers within the systems predominantly affect their funding ratios.

Contribution Rates

Figures 5 and 6 report average employer contribution rates, adopted by the respective retirement boards, as a percentage of payroll for defined benefit general and safety systems, accounting for all tiers in each system. In prior year reports, the contribution rates were presented using the median employer contribution rates. Using the average employer rates allows for a more usable comparison. The figures present three years of data for comparison.

The 2004-05 average employer contribution rate for all “general” systems was 11.1% of payroll, with rates ranging from 0% to 49.3%. From the 2002-03 to the 2004-05 fiscal year, the average employer contribution rates of state, county, city, special district, and school district general defined benefit plans increased. Contributions to county general systems increased the most, from 8.1% to 14.5%.

Figure 5
General Defined Benefit Systems
Employer Contribution Rates by Average Value as a Percentage of Payroll

Agency Type	2002-03	2003-04	2004-05
State	5.5%	8.1%	9.3%
Counties	8.1	11.8	14.5
Cities	4.0	3.8	6.0
Special Districts	8.9	10.2	10.8
School Districts	3.1	3.3	3.6
Other	-	-	-
All General	7.3	8.9	11.1

The 2004-05 average contribution rate for all safety systems was 17.7% of payroll, with rates ranging from 0% to 51.7%. From the 2002-03 to the 2004-05 fiscal year, the average employer contribution levels of state and county safety defined benefit plans increased. City systems declined, dropping 15.8%, from 23.3% to 7.5%.

Figure 6
Safety Defined Benefit Systems
Employer Contribution Rates by Average Value as a Percentage of Payroll

Agency Type	2002-03	2003-04	2004-05
State	13.5%	14.9%	19.5%
Counties	15.7	19.8	24.9
Cities	23.3	5.9	7.5
All Safety	18.5	14.0	17.7

Assets

The following figures show that, in total, California defined benefit and defined contribution public employee retirement systems held assets in trust with a fair value of \$614.5 billion at June 30, 2005. State-administered retirement systems account for 75.2% of these assets while local agency administered systems account for the remaining 24.8%, as illustrated in Figures 7 and 8. Although 75.2% of the assets are administered by the state systems, a high percentage of these assets are contributed by many local agencies that contract with CalPERS.

Figure 7
Asset Distribution by Entity Type, Reporting Year 2004-05

(Amounts in thousands)

	Fair Value	Percentage
State	\$ 462,261,638	75.2%

* The fair value of school district assets is 0.004% of total assets.

Figure 8**Asset Distribution by Entity Type, Reporting Year 2004-05**

(At fair value)

Of the 133 total public retirement systems reporting in the 2004-05 fiscal year, the 10 largest systems encompass 89.5% of total assets, 91.8% of total liabilities, and 89.0% of net assets available for benefits, as shown in Figure 9.

Figure 10 shows that, from the 2000-01 to the 2004-05 fiscal year, the fair value of assets declined to a low of \$442 billion in the 2001-02 fiscal year and has since increased steadily to \$614 billion in the 2004-05 fiscal year.

Figure 10**Growth in Total Assets at Fair Value**

(Amounts in billions)

Most assets are invested for income. Figure 11 illustrates that assets are invested primarily in stocks and long-term debt securities. The debt category includes mortgages and corporate and government bonds. Debt makes up 24.1% (\$143.3 billion) of investment assets. Stocks represent 50.3% (\$298.8 billion) of investment assets. The short-term category, which represents 2.5% (\$14.6 billion) of investment assets, consists of cash and cash equivalents and other short-term securities. The “other” category, which represents 23.1% (\$137.2 billion), consists of real estate equity, venture capital, and other miscellaneous investments.

Figure 11**Investment Capital Distribution, Reporting Year 2004-05**

(At fair value)

When real estate equity investments are combined with mortgages, the total assets invested in real estate equal \$44.8 billion, or 7.5% of total assets. Mortgages represent \$17.6 billion of this total, and real estate equity amounts to \$27.2 billion.

Revenues

The total revenues of public employee retirement systems is \$74.6 billion in the 2004-05 fiscal year, a decline of \$8 billion from the 2003-04 fiscal year, due primarily to a decrease in investment values. Defined benefit systems accounted for \$72.7 billion and defined contribution systems accounted for \$1.9 billion of total revenues.

Employer contributions and employee contributions increased by \$1.3 billion and \$1.2 billion, respectively, from the 2003-04 fiscal year. Other contributions increased by \$187.1 million from the prior year. Other revenues accounted for \$53.4 million of total revenues in the current year. Net investment income declined by \$10.6 billion from the prior year.

* Net of investment expenses						

Expenses

The expenses of public employee retirement systems totaled \$23.6 billion for the 2004-05 fiscal year, as shown in Figure 13. Defined benefit systems accounted for \$23.1 billion, or 97.7% of total expenses, while defined contribution systems accounted for \$534.6 million, or 2.3% of total expenses. As shown in Figure 13, total benefit payments amounted to \$22.2 billion, or 94% of total expenses. Refunds, administrative expenses, and other expenses totaled \$831.5 million, \$512.1 million, and \$85.5 million, respectively. These expense categories amounted to 3.5%, 2.2%, and 0.4% of total expenses. Total expenses increase by 44.6%, from \$16.3 billion in the 2000-01 fiscal year to \$23.6 billion in the 2004-05 fiscal year.

Average Yield

The average yield on assets of the various systems is computed using a simplified formula previously recommended by the Government Finance Officers Association.

$$\frac{I}{\frac{1}{2}(A + B - I)}$$

A = Beginning-of-the-year fair value of total assets, less current liabilities

B = End-of-the-year fair value of total assets, less current liabilities

I = Investment income earned during the year

We have presented this simplified method for calculating the average yield because, while more accurate methods of calculation exist, the data necessary to calculate the dollar-weighted or time-weighted methods are not available for all systems. Consider the following pertinent information when comparing average yield data between systems with financial data from other sources:

- The average yield computed by this formula may be distorted if the net cash flow into the system is not evenly distributed during the year.
- In the formula, the changing market value of stocks, bonds, and other investments is included in investment income earned during the year as the net gain or loss in the fair value of investments.
- The timing and amount of contributions can significantly affect the result.

As indicated in Figure 14, the 2005 median average yield for all systems was 9%; the mean average yield rate was 8.7%. The average yield rates ranged from a low of 0.6% to a high of 23%.

Membership

As shown in Figure 15, the total membership in the retirement systems reporting for the 2004-05 fiscal year is 4,014,934, a 2.3% increase from the 3,924,200 members reported in the 2003-04 fiscal year, and a 28.3% increase from the 2000-01 fiscal year.

Figure 16 shows that state-administered systems constitute 78.9% of the total membership of all systems. This percentage includes both defined benefit and defined contribution plans.

Membership classifications are:

- *Active:* Members currently employed.
- *Service Retired:* Members who have worked a full career and retired.
- *Disabled:* Members who took retirement due to work-related or non-work-related illness or injury.
- *Survivors:* Deceased retirees' dependents who continue to receive benefits.
- *Inactive:* Those who have left the system but have retained vested rights to future benefits.

Figure 17 illustrates that active and inactive members constitute 77.9% of total plan membership, while beneficiaries (service retired, survivor, and disabled members) constitute 22.1% of total plan membership. The total membership includes 3,126,960 active and inactive members and 887,974 beneficiaries.

Figure 18 shows that 51 systems (38.4%) have fewer than 100 members, 27 systems (20.3%) have between 100 and 999 members, 31 systems (23.3%) have between 1,000 and 9,999 members, and 24 systems (18.0%) have 10,000 or more members.

Figure 19 illustrates an increase of 57,766 (1.9%) in active and inactive membership and an increase of 32,968 (3.9%) in beneficiary membership since the 2003-04 fiscal year. Beneficiary membership consists of service retired, disabled, and survivor members.

Furthermore, since the 2000-01 fiscal year, active and inactive membership has increased by 32.3%, while beneficiary membership has increased by 16.0%.

Disability Requirements

Most California defined benefit public retirement systems maintain separate schedules of benefits for members who retire because of disability incurred either on or off the job. The schedules generally provide retirement allowances after shorter periods of service than those applicable to other retirees. As a result, the systems pay benefits to disabled retirees for greater lengths of time and the retirees no longer contribute to the system, resulting in lower total deposited contributions on which to earn interest.

Figure 20 presents information about each system's disability retirement position and policies. The first column, Percentage of Disability to Retired, shows the number of disabled members as a percentage of all retirees receiving benefits in the 2004-05 fiscal year. This percentage does not include deceased retirees' beneficiaries.

For example, the California State Teachers' Retirement System reported that 4% of its retired members were receiving disability benefits in the 2004-05 fiscal year. The median percentage of such retired members for all defined benefit systems reporting was 12.3%, while the average was 16.3%.

The remainder of Figure 20 gives a brief summary of disability benefit policies offered by the various plans. It appears that most plans offer similar benefits, ranging from 33.3% to 50% of final compensation for both general members and safety members. Most service-related disabilities have no minimum service requirements, and non-service disabilities usually require five to 10 years of service to qualify.

Disability benefit payments reported by the systems included in this publication totaled approximately \$2.5 billion. This total, however, must be regarded as a low estimate because some systems' reports did not separately account for disability benefits. For systems that were able to itemize their disability benefit payments, disability benefits were 11.2% of total benefit payments and 10.5% of total expenses.

Recent Developments

The investment market continued strong primarily due to improvement in the U.S. economy and in domestic and international markets. However, revenues decreased this year compared to last year due to the exceptional increase in revenues during the 2003-04 fiscal year.

In July 2004, the Governmental Accounting Standards Board (GASB) issued Statement No. 45, *Accounting and Financial Reporting by Employers for Post-employment Benefits Other Than Pensions*. States and large local governments will be required to implement the new guidance starting with the fiscal year that ends December 31, 2007. Medium sized and small governments will be required to do the same starting with the fiscal years ending December 31, 2008, and December 31, 2009, respectively.

GASB Statement No. 45 requires for the first time that public sector employers recognize the cost of other post-employment benefits (OPEB) over the active service life of their employees rather than on a pay-as-you-go basis.

This publication only reflects pension benefits. The defined benefit systems detailed on the following pages do not include OPEB amounts, except for Alameda County Employees' Retirement Association (ERA), Los Angeles County ERA, City of Los Angeles Fire and Police Employees' Pension System, and Merced County ERA. These systems are currently unable to separate their OPEB funds from their pension funds but will do so beginning fiscal year 2007-08.

Financial and Actuarial Data Defined Benefit Tables

We have formatted actuarial and benefit data to accommodate reporting for six general tiers and three safety tiers. However, some agencies have more tiers than can be individually presented. The extra tier information is provided in the comments or footnotes section of the specific agency table.

Following is a summary of symbols and definitions used in the financial and actuarial data tables.

(–) A dash indicates that the listed categories do not apply to that particular public retirement system, and is used in place of a numerical value.

(Y) In the Retirement Benefit Policies Section, the letter Y indicates that a specific benefit policy methodology is used.

(I, N, S)

In the Retirement Benefit Policies Section, Social Security Coverage, I stands for “integrated Social Security benefits,” which means that Social Security benefits are included, in part or in whole, as part of the system’s total monthly retirement benefits. N means that no Social Security benefits are included as part of the monthly retirement benefits. S stands for Supplemental Social Security benefits, which means that Social Security benefits are paid in addition to the system’s monthly retirement benefits.

Comments:

The Judges' Retirement Fund was established in 1937. The membership consists of justices of the Supreme Court, Courts of Appeal, Superior Courts, Municipal Courts, and Justice Courts appointed or elected prior to November 9, 1994.

The law that stated that on and after January 1, 2004, the Judges' Retirement Fund shall be funded and actuarially sound was amended in conjunction with the adoption of the Judges' Retirement System II law, which, among other provisions, eliminated the requirement that the Judges' Retirement Fund be funded and actuarially sound. The system is funded on a pay-as-you-go basis.

Footnote:

- (1) Beginning with the June 30, 1997, actuarial valuation, actuarial valuations were performed using the aggregate cost valuation method. The aggregate cost method does not identify or separately amortize unfunded actuarial liabilities or actuarial assets.
- (2) The employer contribution rate for the system is set by state statute and equals eight percent (8%) of payroll.
- (3) Members retiring after age 60 with at least 20 years service receive 75% of pay of the last judicial office held. With less than 20 years of service, the benefit percentage is 65%.

- Maximum	65 %	—	—	—	—	—	—	—	—

Comments: The Judges' Retirement Fund II was established in 1994. The membership consists of justices of the Supreme Court, Courts of Appeal, Superior Courts, Municipal Courts, and Justice Courts appointed or elected on or subsequent to November 9, 1994. Actuarial valuations are required to be carried out annually. The legislated state contribution rate will be adjusted periodically as part of the annual Budget Act in order to maintain or restore the actuarial soundness of the fund.

Footnote:

(1) The Judges' Retirement System II uses a modification of the Entry Age Normal Actuarial Cost Method, which is a projected benefit cost method and is modified by CalPERS so that the employer's total normal cost is expressed as a level percentage of payroll.

(2) Generally, the unfunded liability is amortized over different periods of time as a level percentage of payroll. If the use of this method results in inconsistencies, the "fresh start" approach is used. In the fresh start approach, the current unfunded actuarial liability is projected and amortized over a set number of years.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Public Employees' Retirement Fund — (Continued)

Comments:

The Public Employees' Retirement Fund (PERF) was established in 1932. Its membership includes the following categories: General, State Industrial, Schools, and Safety.

(1) General members are collectively reported under the following categories: General Tier I - State Miscellaneous Tier 1 and University of California; General Tier II - State Miscellaneous Tier 2; General Tier III - State Industrial Tier 1; General Tier IV - State Industrial Tier 2; General Tier V - Schools; and General Tier VI - Public Agency Employees.

(2) Safety members are reported as follows: Safety Tier I - California Highway Patrol; Safety Tier II - State Safety; and Safety Tier III - State Police Officers and Fire Fighters (SPOFF).

Footnote:

- (1) Generally, the unfunded liability is amortized over different periods of time as a level percentage of payroll. If the use of this method results in inconsistencies, the "fresh start" approach is used. In the fresh start approach, the current unfunded actuarial liability is projected and amortized over a set number of years.
- (2) The UAAL of the Public Employees' Retirement Fund by major employer group from the June 30, 2004, valuation is as follows: a) (\$12,746,000,000) for the State of California, b) (\$2,589,000,000) for schools, and c) (\$9,375,000,000) for public agencies.
- (3) The State of California, pursuant to the Memoranda of Understanding with the employee unions, agreed to a temporary cessation of employee retirement contributions for the 2003-04 fiscal year. This cessation of employee retirement contributions was still in effect for the first three months of the 2004-05 fiscal year. Beginning October 2004, employee contribution rates returned to the usual statutory 5% or 6%.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
State Teachers' Retirement System — (Continued)

Comments:

All of the figures in this plan include data from both the Defined Benefit Plan and the Cash Balance Plan. Program information is presented as follows: General Tier I - Defined Benefit Program; General Tier II - Defined Benefit Supplement; and General Tier III - Cash Balance Program.

Actual member and employer rates are set by the State Teachers' Retirement Law, which assigns the authority to establish and amend contribution requirements to the State Legislature.

Defined Benefit Program (DB Program)

State of California - Beginning July 1, 1999, under Education Code Section 22955, the General Fund transferred annually to the DB Program an amount equal to 3.102% of total creditable earnings of the immediately preceding calendar year to fund certain benefit enhancements effective January 1, 1999. The enactment of Chapter 1021, Statutes of 2000 (AB 2700), provided for a reduction in such funding from the General Fund to a factor of 2.5385% beginning July 1, 2000. This was further reduced to 1.9750% beginning July 1, 2001 through June 30, 2003. Beginning July 1 2003, the rate was changed to 2.017% of the member's creditable earnings from the fiscal year ending in the prior calendar year.

Cash Balance Benefit Program (CBB Program)

The CBB Program, established under Part 14 of the California Education Code (Section 26000 et seq.) and subsequently amended by Assembly Bill (AB) 2673, is a separate defined benefit plan which operates under the IRC within the STRP designed for California's public schools employees who are hired to perform creditable service for less than 50% of the full-time equivalent for the position.

Footnote:

- (1) An employee can be a member of multiple tiers. As listed, each tier includes the number of employees participating in that tier. Therefore, the same employee can be counted more than once. The actual total membership is 775,917.
- (2) The increase from prior year was the result of the State's general fund contribution for the Supplemental Benefit Maintenance Account resuming in fiscal year 2004-05 in the amount of \$620.9 million.
- (3) The Cash Balance Benefit and Defined Benefit Supplement Programs of the State Teacher's Retirement System use the Traditional Unit Credit Cost Method.
- (4) Education Code Section 22901 provides that the State will contribute 8.00%. If it is needed, 0.25% of additional funding is available from the State, per Education Code 22955. The additional contribution is shown on the financial statements under "other general contributions."

Comments:

No contributions were recommended for the 2004-05 Plan Year. This is due to the application of the full funding policy that the Regents adopted in 1990. Member contributions are all currently being redirected to the UC Defined Contribution Plan. It is expected that the Plan's surplus will run out in the next few years and that contributions will need to resume.

Footnote:

(1) Safety inactive vested members are included with safety active vested members.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Alameda County Employees' Retirement Association — (Continued)

Footnote:

- (1) Post-Employment Health Benefits (OPEB) are ordinarily not included in this publication. However, Alameda County Employees' Retirement Association is unable to identify the specific assets and liabilities to remove the OPEB related amounts from the Statement of Net Assets. This amount represents the OPEB payments made.
- (2) During the year, the Board adopted a new provision of the County Employees Retirement Law of 1937 (Section 31580.3) that provides additional budgeting discretion. For a limited period (until January 1, 2007) the Board may elect to adopt an administrative expense budget of 0.23% of net assets based on an asset valuation date in an earlier year. The Board approved the final revised 2004 administration budget in accordance with the Section 31580.3 limitation.
- (3) In 2004, ACERA changed the method of depreciation for information system assets from straight-line to sum-of-the-years- digits and reduced the estimated useful lives of these assets. The estimated useful life of the retirement information system was reduced from 15 years to seven and the estimated useful life of the accounting information system was reduced from five years to three.
- (4) The contribution rates shown for General Tier III are applicable to special district member agencies.
- (5) General Tier I: Out of 1,466 members, 73 do not participate in the Social Security System.
General Tier II: Out of 7,672 members, 4 do not participate in the Social Security System.
Safety Tier I: Out of 241 members, 2 are also covered by Social Security.
Safety Tier II: Out of 1,177 members, 1 is also covered by Social Security.

Comments:

The County of Contra Costa (County) issued \$337,365,000 of Pension Obligation Bonds on March 1, 1994, of which \$333,724,000 was used to satisfy the Unfunded Actuarial Accrued Liability (UAAL) for the County, calculated as of that date. In April 2003, the County issued \$322,710,000 of Pension Obligation Bonds, of which \$319,094,719 was used to reduce the UAAL for the County, calculated as of that date.

Benefit enhancement law changes to Government Code Sections 31664 and 31676.11, commonly known as 3% at 50 for Safety Members and 2% at 55 for General Members, were adopted by the Contra Costa County Board of Supervisors on October 1, 2002, for county employees. The 3% at 50 for Safety Members became effective on July 1, 2002, while the 2% at 55 for General Members became effective on January 1, 2003. In addition, the County eliminated (with legislation) Tier II for all new county employees and transferred all (except the California Nurses Association members - CNA) Tier II employees into Tier III effective October 1, 2002.

Member counts include retirees and beneficiaries of the following former participating agencies: Alamo-Lafayette Cemetery District, City of Pittsburg, Delta Diablo Sanitation District, Office of Education, and Stege Sanitary District.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Contra Costa County Employees' Retirement Association — (Continued)

Footnote:

- (1) The plan's current accounting software is unable to break out disability payments from the service retirement benefit payments.
- (2) The Other Expenses category includes Contribution Prepayment Discount and Membership Withdrawals. Delta Diablo Sanitation District (DDSD) terminated its membership with the Contra Costa County Employee's Retirement Association (CCCERA) effective June 30, 2004 and converted to California Public Employees' Retirement system (CalPERS) on July 1, 2004. The retired and deferred DDSD members, who either currently draw a benefit or could draw a benefit in the future, will continue with CCCERA. An amount of \$4,680,521 was transferred to CalPERS in 2005.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Fresno County Employees' Retirement Association — (Continued)

Comments:

On March 23, 2004, the County of Fresno issued \$402,898,000 in Pension Obligation Bonds (POBs), of which \$398,141,000 was transferred to the association to fund the UAAL and \$4,757,000 was used to pay the issuance costs.

On March 19, 1998, the County of Fresno issued \$184,910,000 in POBs, of which \$183,632,000 was transferred to the association to fund the unfunded actuarial accrued liability (UAAL) and \$1,278,000 was used to pay the issuance costs. With the establishment of enhanced benefits, safety employers were required to begin contributions during fiscal year 2001-02. General employers began contributions during fiscal year 2002-03.

On May 7, 2003, the County brought suit against the Fresno County Employee's Retirement Association (FCERA) and its Board of Retirement in County of Fresno vs. Board of Retirement of the County of Fresno, Fresno County Employees Retirement Association, et al., Case No. 03-CE-CG-01569. The complaint alleges that the method by which the FCERA calculates its members' final compensation for purposes of establishing their retirement allowances (sometimes referred to as the "Fresno Method") violates the law.

On March 2, 2004, the Superior Court issued a tentative decision declaring that the Fresno Method did not comply with the statutes. Thereafter, the Board of FCERA resolved to (a) immediately change its method of calculated retirement allowances for all future members of the retirement system and (b) recalculate all retirement allowances for current employees retiring after March 1, 2004, as of the date of their retirement.

On September 3, 2004, the Superior Court denied Fresno Deputy Sheriff's Association's (FDSA) request for preliminary injunction preventing the FCERA board from implementing its planned changes to its method of calculating retirement allowances during the pendency of the litigation. On October 18, 2004, the Court issued its second tentative decision, ruling against the FDSA. Following the testing of software modifications required to implement the Court's decision, the FCERA began recalculating retirement benefits in November 2004.

Footnote:

- (1) The UAAL is amortized over 30 years for plan amendments and 6 years for all other adjustments.

Comments:

On September 20, 2002, the County of Imperial (County) issued pension obligation bonds in the amount of \$33,265,000, with the final payment on the bonds due August 15, 2031. The bond proceeds were used to pay the County's unfunded actuarial accrued liability (UAAL).

On November 4, 1997, the Imperial County Board of Supervisors adopted Resolution #97-120, which authorized the issuance of pension funding bonds. The bonds were subsequently issued in December 1997 in the amount of \$35,175,000, with the final payment on the bonds due August 15, 2020. The bond proceeds were used to pay the retirement system for the County's UAAL.

Footnote:

- (1) The employer rate includes an additional contribution to the system at a rate of 3.00% of the employees' earnable compensation. The contribution is considered part of the employer contributions and is not refundable to the member at termination.

Comments:

In June 2003, the County of Kern issued \$285 million in pension obligation bonds (POB's) intended to cover the existing unfunded actuarial accrued liability (UAAL) as of December 31, 2003. The proceeds were transferred to the Kern County Employees' Retirement Association (KCERA).

The retirement association board continues to implement the requirement of the Settlement Agreement dated January 23, 2002, "Kern Law Enforcement Association, et al., Petitioners v. Board of Retirement, KCERA, Respondent; County of Kern, Real Party in Interest," Case No. 236460-NFT, providing increased benefits to qualified retirees in a lump sum for arrears to April 1, 1996, increasing monthly benefits going forward, and implementing the terms of agreements for all new retirees. The KCERA processed and evaluated past service records to recalculate benefit levels in accordance with the Settlement Agreement and Judgment. This process was completed in May 2005.

From August 16, 2002 to May 6, 2005, 1,762 retirees or their beneficiaries have received retroactive payments totaling \$11,946,185 and increasing the monthly retirement payroll by \$122,461.

The KCERA amended its funding policy on June 22, 2005 and adopted at 30-year amortization.

Kern County Employees' Retirement Association — (Continued)

Footnote:

- (1) On August 3, 2004, the Kern County Board of Supervisors approved a Memorandum of Understanding (MOU) between the County and the Central California Association of Public Employees adopting Government Code Section 31676.17, which provided enhanced retirement benefits, commonly known as 3% at 60, for general member employees. The enhanced benefits became effective January 1, 2005, resulting in record increases in retirements.
- (2) The MOU, adopted August 2004, by the county and its employees states that all general members hired prior to the first day of payroll period 04-16 shall pay 100% of the employees' normal contributions until they have attained five years of service, at which point those employees shall no longer be required to make their normal contributions to retirement and the county shall pay 100% of those employees' normal contributions. All general members hired on or after the first day of payroll period 04-16 shall pay 100% of the new employees' normal contributions to retirement.
- (3) The MOU, adopted May 2004, by the county and its safety employees states that all safety members with five or more years of service shall not be required to pay any contributions to retirement and county shall pay 100% of those employees' normal contributions.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Los Angeles County Employees' Retirement Association — (Continued)

Comments:

During fiscal year 2004-05, in addition to the cash contribution of \$527,810,191, the County of Los Angeles (County) also directed the Los Angeles County Employee Retirement Association (LACERA) to transfer \$222,542,000 from the County Contribution Credit Reserve to meet the balance needed for 100% of the contribution required.

LACERA accounts for their other post-employment health benefits (OPEB) in their pension fund and are currently unable to separately identify OPEB transactions. Effective FY 2006-07, they will apply the GASB 43 accounting standards and account for them separately.

From 1995 to 2001, no UAAL contributions were required, and the County contributed only its portion of the normal cost contributions. Under the new 2002 Retirement Benefits Enhancement Agreement, the County must also pay its portion of the normal cost contributions adjusted for either a positive UAAL or a positive funding surplus.

In fiscal year 1999-00, LACERA changed its policy on capital assets whereby new capital assets acquisitions are deemed immaterial, so assets are expensed instead of being capitalized. Capitalized assets acquired prior to fiscal year 1999-2000 are carried at cost less accumulated depreciation.

In August 1994, LACERA and the County entered into an agreement whereby the County fully funded the retirement system by issuing pension obligation bonds and transferring the proceeds to LACERA.

Footnote:

- (1) Under the new Retirement Benefits Enhancement Agreement with the County, any positive amounts as of June 30, 2002, through June 30, 2008, must be amortized over a rolling 30 years.

Comments:

Marin County is an agent multiple-employer plan that includes the County Courts, the City of San Rafael, the Novato Fire District and seven other special districts. The membership and retirement benefit policies are reflected as follows: The County, with 4,052 members, is shown under Miscellaneous Tiers I, II, III and Safety Tiers I and II. The City of San Rafael has 855 members and is shown under Tiers I and II. Novato Fire District has 311 members and is shown under Tier I.

The Contribution Rates are broken out as follows: County -- General and Safety Tiers I, City of San Rafael -- General and Safety Tiers II, and Novato Fire District -- General and Safety Tiers III.

The UAAL amortization periods for the County, Southern Marin Fire District, and LAFCO are 23 years while the remaining districts range from 14-16 years.

Footnote:

(1) The adjustment is for a transfer of assets to the post-employment healthcare plan.

Comments:

In December 2002, the County of Mendocino (County) issued additional pension obligation bonds (POBs). The total bonds sold was \$92,208,602, of which \$76,299,000 was transferred to the Mendocino County Employees' Retirement Association (MCERA) for additional investment. The funding agreement between the County and MCERA indicates that MCERA will keep the County informed of current investments and that any unfunded pension liability will be eliminated in a timely manner. The proceeds from the 2002 POBs reduced the unfunded pension liability to less than 10% of the actuarially accrued liability at June 30, 2004. The funding agreement indicates that the County is not required to fund the UAAL if it does not exceed 10% of the total pension liability.

In addition to the County, two special districts are also covered under this plan: the Cemetery District of the Redwoods and the Russian River Cemetery District.

Footnote:

- (1) Disability benefits are included with Service Retirement benefits.
- (2) No UAAL amortization is necessary at this time per the funding agreement as the UAAL does not exceed 10% of the total pension liability.

Comments:

The County Board of Supervisors adopted enhanced benefits for all County general members Tier 1 and Tier II, Resolution no. 2005/37 on March 15, 2005. The enhanced benefits do not apply to county members who, on March 15, 2005, were deferred, reciprocal or Merced County Cemetery District employees.

Footnote:

- (1) Assets related to post-employment healthcare benefits could not be separately identified.
- (2) The amortization method used on years in which there is an unfunded actuarial accrued liability is the level percentage of covered payroll.
- (3) The adjustment is necessary to remove the effect of post-employment healthcare benefits in prior years.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Orange County Employees' Retirement System — (Continued)

Comments:

Orange County Employee's Retirement System (OCERS) tier structure has changed. For fiscal year ending 12/31/2004, the reported tier structure is as follows:

General Tier 1 = All County except Orange County Transportation Authority (OCTA)
General Tier 2 = OCTA
General Tier 3 = San Juan Capistrano
General Tier 4 = Rancho Santa Margarita
Safety Tier 1 = Law Enforcement
Safety Tier 2 = Fire Authority
Safety Tier 3 = Probation Officers

In September 1994, Orange County (County) issued \$320 million in pension obligation bonds (POB), of which \$318.3 million in proceeds was paid to the OCERS and recorded as employer contributions in 1994. For accounting purposes, the proceeds were put into the County Investment Account (Account). Subsequent agreements between the Board of Retirement and the County provide that the Account will be used to fund the County's employer contribution in a decreasing percentage each year. The offsetting credit for fiscal year ending December 31, 2004, was \$3,579,000.

Footnote:

- (1) Cash contribution exclusive of amortization of pension obligation bond proceeds. The County also contributed \$3,579,000 of the pension obligation bond proceeds from the Investment Account.
- (2) Effective December 31, 2004, the actuarial valuation of plan assets was changed to a five-year smoothing methodology based on market value rather than a rolling five-year modified book value.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Sacramento County Employees' Retirement System — (Continued)

Comments:

On July 1, 2004, the Sacramento County Employees' Retirement System (System) received \$420 million in pension obligation bonds (POBs) issued by the County of Sacramento. On October 20, 2004, the SCERS received \$10,538,000 in proceeds from POBs issued by the Sacramento Metropolitan Fire District. Both POB proceeds were recorded as contributions when received.

The system and other retirement systems were sued in a statewide litigation seeking inclusion of additional pay to be included in final compensation and retroactive application of increases in final compensation mandated by Ventura County Deputy Sheriff's Association et al. v. Board of Retirement (1996) 16 Cal. 4th 483. That case is now finally determined (in re Retirement Cases [2003] 110 Cal. Appl 4th 426).

The System agreed to settle the litigation for an actuarially estimated \$55 million shortly before the decision was rendered. That settlement, limiting the System's liability to \$55 million, was approved by the court on December 19, 2003.

The settlement consisted of estimated lump sum payments to members and attorneys' fees of \$25,870,000 and an estimated \$29,130,000 to be paid out after January 2004 as increased retirement allowances. The actual lump sum payments to members and attorney fees were \$26.7 million.

Of the total lump sum payments of \$26.7 million, \$25.9 million was paid in the year ended June 30, 2004. Prospective payments resulting from increased allowances were estimated to be \$29.1 million and such payments are ongoing. With the distribution of the final \$0.8 million of lump sum payments in December 2004, the litigation has reached final resolution.

Comments:

On June 24, 2004, the San Bernardino County Employees' Retirement Association (SBCERA) received pension obligation bonds proceeds of \$506,090,000 from the County of San Bernardino and South Coast Air Quality Management District.

On July 21, 2003, the Superior Court of San Francisco approved a settlement in the Coordinated Retirement Cases, commonly referred to as "Ventura II." During fiscal year 2004, a settlement was reached with the pre-October 1, 1997, retirees and deferred vested members in the Ventura II suit. The retroactive portion of this settlement was realized in the previous year and was expensed by SBCERA through member benefit payments in last year's financials. This resulted in a one-time adjustment of \$23,590,000 for June 30, 2004, and contributed to the overall increase in benefits for June 30, 2005.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
San Bernardino County Employees' Retirement Association — (Continued)

Footnote:

- (1) Prior period adjustment was made to account for accrued expenses not reflected at June 30, 2004.
- (2) The contribution rates shown under the heading for General members are for the following employee categories: Tier I = all other participating agencies except the South Coast Air Quality Management District (SCAQMD) and the County of San Bernardino, Tier II = the County of San Bernardino, and Tier III = SCAQMD. Tier IV = Superior Court.

The contribution rates shown under the heading for Safety members are for the following employee categories: Tier I = all other participating agencies, and Tier II = the County of San Bernardino.

Comments:

In June 2004, the County of San Diego (County) issued pension obligation bonds (POBs) in the amount of \$454.1 million and transferred \$450 million to the retirement fund for investment.

On October 3, 2002, the San Diego County Employees' Retirement Association (SDCERA) received \$550 million from the County related to its sale of taxable POBs to help fund the increased actuarial accrued liability resulting primarily from benefit enhancements.

Footnote:

- (1) Tier III is used for SDCERA's Plan A, which is the current open system for General members who entered the system on or after March 8, 2002.
- (2) Beginning balance adjustment of \$303. Transfer from Other Post-Employment Health Benefits of \$35,808,000.

Comments:

In July 2003, the plan sponsor issued a pension obligation bond for \$135 million to pay off the unfunded liability of the San Luis Obispo County Pension Trust (SLOCPT).

The information shown as General Tier I pertains to Miscellaneous SLOCPT members only, Safety Tier I pertains to Safety members and Safety Tier II pertains to probation officers.

Footnote:

(1) Prior period adjustments for revenue and related receivables that should have been accrued and recorded in the prior year.

Comments:

In the Membership, Contribution Rates, and Retirement Benefit Policies schedules, General Tier V is used for Probation Plan I; General Tier VI is used for Probation Plan II; and Safety Tier III is used for Safety Plan IV and Probation Plan IV.

In the Contribution Rates schedule, Safety Tier III shows the average rates of Safety Plan IV and Probation Plan IV. Individually, Safety Plan IV rates are as follows: Normal Cost - 19.74, UAAL Amortization - 18.04, for a total of 37.78. Probation Plan IV rates are as follows: Normal Cost - 17.39, UAAL Amortization - 12.30, for a total of 29.69.

On November 30, 2001, the trial court ruled that the Ventura decision should be applied retroactively and that the pensions of all retirees and their beneficiaries, regardless of when they retired, must be recalculated. San Mateo County Employees' Retirement Association (Association) filed its plan for the implementation of the decision on April 13, 2004. A reserve of \$31,523,929 has been set aside. The retroactive implementation of Ventura had a total cost of \$11,961,371 to the retirement plan. On May 31, 2005, the remaining balance on the Ventura Reserve was transferred to the employer's retiree reserve, pursuant to Resolution 1-02-03 -- Ventura Litigation Contingency Reserve.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Santa Barbara County Employees' Retirement System — (Continued)

Comments:

The Santa Barbara County Employee's Retirement System (SBCERS) has ten retirement plans, of which five are currently open and available to new employees. Current year data will be reflected as follows: General Tier I - GP1, General Tier II - GP2, General Tier III - GP5A, General Tier IV - GP5B and Air Pollution Control District (APCD) Plans 1 & 2, Safety Tier I - SP1 & SP2, Safety Tier II - SP4A, and Safety Tier III - SP4B.

The APCD Plan 1 has 37 active employees with an employer contribution rate of 16.49%. APCD Plan 2 has 19 active employees with an employer contribution rate of 17.62%.

Comments:

Cost of Living Adjustment (COLA) legislation for Sonoma County (AB 2894) was passed by the Legislature and signed by the Governor in September 2004. The legislation prioritizes Sonoma County COLA grants to those retirees with the greatest loss of purchasing power as it allows the Board to recommend an 80% purchasing-power-only COLA.

Footnote:

(1) The rates adopted are lower than those recommended because the pension obligation bond proceeds eliminated the UAAL.

Comments:

In prior-year publications, General Tiers I and IV were shown under General Tier IV, General Tiers II and V were shown under General Tier V, Safety Tiers I and IV were shown under Safety Tier I, and Safety Tiers II and V were shown under Safety Tier II. In the current year, General Tiers I, II, IV, V and Safety Tiers IV, and V are shown separately and Safety Tiers 1 and 2 are combined.

The Ventura Litigation has been finalized. The State Supreme Court has declined to rule on the final appeal and has let the appellate court ruling stand. Stanislaus County Employees Retirement Association (StanCERA) has estimated the cost of implementing this ruling, as it currently stands, at approximately \$6.0 to \$8.0 million. StanCERA believes the cost of implementing the ruling will not have an adverse impact on funding the plan. It will take an estimated six months to one year for the benefits to be recalculated for all affected retirees.

Footnote:

- (1) The unfunded actuarial accrued liability (UAAL) attributed to Other Employers is amortized as a level percentage of pay over the period ending June 30, 2023.
- (2) The adjustment of \$4,370,509 is for a transfer of plan assets to the Post-Employment Health Benefits Fund.
- (3) Includes Safety Tiers I and 2. Rates shown above are for Safety Tier 1. Safety Tier 2 rates are as follows: Employer Rate - Normal Cost = 11.94%, UAAL = 6.93%, Total Employer Rate = 18.87%. Employees Rates - Age 25 = 9.89%, Age 35 = 11.30%, and Age 45 = 13.19%.

Comments:

In addition to actuarially determined employer contributions, the Ventura County Employees' Retirement Association's (VCERA) employers contribute, pursuant to Government Code No. 31581.1, a portion of the required member contributions. These contributions do not become part of the member's accumulated contributions; instead, the contributions vest, pursuant to the law, in the employer advance reserves.

Footnote:

- (1) The UAAL is being recognized over a 15-year rolling period effective June 30, 2004.
- (2) Employer contributions increased substantially as plan sponsors were required to make higher "actuarially determined" employer contributions due to (a) the decrease in VCERA's funded ratio as the growth in actuarial accrued liabilities outpaced the growth in the actuarial value of assets and (b) the lower earnings assumption rate implemented in 2003.

Comments:

Plan 1079 is for police and fire employees who entered service before 1953. It is a closed plan consisting of 53 participants, all of whom are retired employees or beneficiaries currently receiving benefits.

Plan 1082 is a closed plan and, effective December 31, 1990, all but two participants and their related plan assets were transferred to PERS. Plan 1082 has now been released from all future pension obligations for transferring members. Plan 1082 is obligated to pay supplementary Medicare and dental coverage expenses, which are funded on a pay-as-you-go basis.

The City of Alameda makes benefit contributions on a pay-as-you-go basis for both plans. The plans' annual required contribution is based on the greater of the following: 15 year amortization of the unfunded actuarial accrued liability or actual benefits paid during the year.

Comments:

Contribution rates are based on the city charter, which requires the City of Albany (City) to contribute 9% of gross wages and active plan participants to contribute 9% of gross wages. However, in accordance with the current union contract, active plan participants' contributions were reduced to 0%, and the City's required contribution was increased to 18%. No active plan participants exist as of June 30, 2005, and the plan is closed to new participants.

However, the required contributions described above were not sufficient to adequately fund the actuarial accrued liability of the plan. As a result, since 1982 the City levied a voter-approved property-tax override based on assessed value of real property. All property override levies from 1982 through June 30, 2004, were contributed to the plan. Based on the June 30, 2003, actuarial study, the unfunded actuarial accrued liability (UAAL) should have been fully amortized by June 30, 2004. During fiscal year ended June 30, 2004, the City made a contribution to the plan of \$534,513, to eliminate the plan's UAAL. As a result of the plan being fully funded, no contributions were made for the current year.

Comments:

This plan accounts for Fire Department personnel who retired prior to June 26, 1972. No employer or employee contributions were made to this plan subsequent to June 26, 1972. The only activity in the plan is the receipt of income on invested assets and the payment of vested benefits.

Comments:

The City of Berkeley (City) pays the Safety Members' Pension Fund (Plan) primarily on a rolling pay-as-you-go basis. In February 1979, the Berkeley Civic Improvement Corporation purchased, on behalf of the City, a Guaranteed Income Contract (GIC). The GIC is considered a City asset and provides annual payments through 2018 and an annual guaranteed 9.68% rate of return (net of expenses). The City pays the difference between actual benefit payments and contract-provided annual payments from the General Fund.

The City's annual required contribution (ARC) is the greater of (a) a 20-year amortization of the unfunded actuarial liability, or (b) actual benefit payments made for the year. For the year ended June 30, 2005, the City's ARC was \$2,101,582, equal to the benefits during the year. The City contributed this amount through a \$1,154,000 payment from the GIC plus \$947,582 paid from the General Fund.

Comments:

The Years Remaining in Total Unfunded Actual Liability Amortization has increased due to higher than expected retired liabilities. This is mainly as a result of higher benefits than expected from reciprocity with other public agencies for new retirees who were previously vested terminations as of December 31, 2004.

Footnote:

(1) No active members remain in the plan. Effective fiscal year 2001, the City of Concord started collecting 1% of citywide payroll to help pay the unfunded liability.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
City of Delano Employee Pension Plan — (Continued)

Footnote:

- (1) On June 30, 2005, 39 Police Officers (active safety members) transferred to CalPERS, taking with them their cumulative contributions and interest.
- (2) The employee contribution rates are as follows:

	MISCELLANEOUS			
Years of Service	0-1	1-2	2-3	Over 3
Contribution Rates	6.20%	4.20%	2.20%	0.00%

	POLICE				
Step	A	B	C	D	E
Rate	7.40%	6.14%	4.14%	2.00%	0.00%

Effective July 1, 2004, the active police officers covered under CalPERS will contribute 7.0% of their covered compensation, which will exceed the monthly compensation breakpoint of \$133.33.

Comments:

The plan's assets were exhausted as of June 30, 2005. Future payments will be made on a pay-as-you-go method basis from the city's general fund.

Footnote:

- (1) Only six members remain in the plan and they are all receiving benefits. The actuarial analysis states that actuarial projections of benefit payment requirements for such a small group are useful for planning but should not be taken as providing an accurate estimate of any set of benefits very many years in the future. The actuaries have recommended a method of funding which in effect keeps the City's contribution level as a percent of total expected City revenues, while ensuring that no assets will remain in the plan when it terminates.

Comments:

The City of Emeryville Miscellaneous Pension Fund was established to support two retirement programs: 1) pension stipends for remaining retirees on the City's old retirement system, which existed prior to the City's entry into CalPERS; and 2) the unfunded liability for retiree medical, dental, and vision benefits.

Prior year reports, 1999 and earlier, included the post-employment health benefit plan in the amounts reported. Reports from 2000 reflect just the City of Emeryville Pension Plan.

Footnote:

- (1) The actuary has determined the City of Emeryville's annual required contribution (ARC) is the greater of (a) a 15-year amortization of the unfunded actuarial liability or (b) actual benefit payments made for the year.

Comments:

The plan was terminated on June 30, 1984, when its only remaining participants were retired members and employees who elected not to be covered by CalPERS.

Footnote:

- (1) The City of Eureka (City) transferred \$316,800 out of the City of Eureka Fire and Police Retirement System Pension Trust Fund to the City's General Fund for Public Safety Operations. The State Controller's Office was concerned about the legitimacy of this transaction and contacted the City. Generally Accepted Accounting Principles indicate that fiduciary funds should be used to report assets held in a trustee capacity for others and therefore cannot be used to support the government's own programs. The City will repay the amount plus interest in the 2007-08 fiscal year.

Social Security Coverage:

N

Benefit Comments: Disability benefit is based on the greater of: (1) 1.8% of final compensation for each year of service, (2) 1/3 of final compensation, or (3) service retirement.

Disability Benefits as a Percentage of

Final Average Salary (FAS):

Non-Service Disability - Per Year	—	—	—	—	—	—	—	—	—
- Maximum	33 %	—	—	—	—	—	—	—	—
Service Disability - Per Year	—	—	—	—	—	—	—	—	—
- Maximum	33 %	—	—	—	—	—	—	—	—

Comments:

Employees who are age 55 with five years of service may elect for the Deferred Retirement Option Plan (DROP). Retirement amount is calculated and monthly deposits are made to the employee's DROP account while the employee continues to work up to a maximum of 10 years.

Retirement benefit is 2% times each of the first 25 years of non-DROP service, plus 1% of any years in excess of 25, multiplied by 1.0, 1.10, 1.30 for ages 55, 60, and 65 respectively.

Footnote:

(1) The system's actuarial surplus is being amortized on a level percentage of projected payroll over a fixed 15-year period.

(2) The employer contribution rate is currently set at 11.06%; however, no funds were required from the City of Fresno due to the prefunded actuarial liability of the system.

Comments:

On March 29, 1994, the City of Fresno (City) issued \$241,480,000 in pension obligation bonds to fully fund the City's unfunded benefit obligation. In July 1994, the City deposited prepaid normal contributions, which are classified as prepaid contributions to the Fire and Police Retirement System (System). The prepayment will earn an interest rate of 8.25%.

Footnote:

- (1) In the current year, the city contributions were offset by prepaid contributions of \$8,806,044 with the remainder of the City Contributions offset by prefunded actuarial accrued liability.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
City of Los Angeles City Employees' Retirement System — (Continued)

Footnote:

- (1) Each valuation generates an actuarial gain or loss for each group valued. Each year's gain or loss is amortized over 15 years. Liability changes due to assumption changes and benefit increases have been amortized over 30 years.
- (2) The City of Los Angeles (City) paid a share of the employees' contribution in the amount of \$17,815,340. The amount of contributions made is less than the annual required contribution (ARC) because (1) the Board approved a reduction of the City contribution rates as the second (and last) year phase-in of actuarial assumption changes for the June 30, 2002 actuarial valuation and (2) the original ARC amount and the corresponding adjusted contribution rates that was used by the City for 2004-05 contribution was lower than the final adjusted ARC amount calculated using the required 40-year minimum amortization period of the UAAL.
- (3) The actuarial accrued liability (AAL) continue to increase from prior year as a result of (1) the effect of assumption changes in mortality, retirement, and termination for the June 30, 2005, valuation, and (2) the net loss from investment when compared with the assumed rate of return on the actuarial value of assets. The increase in AAL caused the funding ratio to decrease to 77.2%.
- (4) The single rate shown is for employees hired after February 1, 1993.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
City of Los Angeles Fire and Police Employees' Pension System — (Continued)

Comments:

Post-employment healthcare benefits were included in the prior year reported amounts but have been removed from the current year.

At June 30, 2005, the City of Los Angeles Fire and Police Employees' Pension System (System) is composed of five tiers. For presentation purposes only, Safety Tier III membership level includes Safety members from Tiers 3, 4, and 5. Safety Tiers 3 and 4 are closed plans, and Safety Tier 5 is an open plan. Individual Tier membership is as follows: Safety Tier 3 = 1,463; Safety Tier 4 = 597; Safety Tier 5 = 11,345.

Contribution rates for Safety Tiers 4 and 5 are as follows:

	Tier 4	Tier 5
Normal	12.45%	16.73%
UAAL	<4.43%>	<4.34%>
Total	8.02%	12.39%

Employee Rates: 8.00% 8.00%

Effective May 1, 2002, and through April 30, 2007, members of the System have the option to enroll in the Deferred Retirement Option Plan (DROP) under Section 4.2100 of the Administrative Code.

Members who enroll in DROP continue to work and receive their active salary for up to five years. Enrolled members continue to contribute to the System until they have completed the maximum number of years required for their tier but cease to earn additional retirement service and pay credits. Monthly pension benefits that would have been paid to enrolled members are credited into their DROP account. DROP account balances will earn interest at an annual rate of 5%.

Once the DROP participation period ends, enrolled members must terminate active employment. They then receive proceeds from their DROP account and a monthly benefit based on their service and salary at the beginning date of the DROP, plus applicable cost-of-living adjustments.

At June 30, 2005, 1,217 pensioners were enrolled in the DROP program, with a total estimated value of all DROP accounts of \$193 million.

Service Disability - Per Year	—	—	—	—	—	—	—	—	—
- Maximum	—	—	—	—	—	—	—	—	—

Comments:

The Annual Required Contribution increased this year because (a) the plan has an unfunded liability amortized over various periods and the actuaries recommended that the bases be combined into a single base and amortized over 15 years to be consistent with the current policy, and (b) required contribution rates increased as a result of investment returns being lower than assumed, higher than expected salary increases for active members, and other unfavorable actuarial experiences.

Footnote:

(1) The single rate applies to employees hired after June 1, 1984.

Comments:

This plan was adopted effective January 1, 1990; it covers management/confidential employees and non-management/confidential sworn police employees on July 1, 1990, and is for employees who retired prior to May 1993. The plan pays a retiring employee the difference between the pension payable from PERS and what the PERS pension would be if it were based on the single highest year only. The City of Manhattan Beach has ceded the liabilities of active participants in the plan to CalPERS as of July 1, 1993.

The plan is currently dormant, with payments being made from interest earnings and accumulated balances.

Comments:

This plan covers police, fire, and management/confidential employees who retired prior to January 1995. Employees receive the difference between the CalPERS benefit calculated under the life annuity option and the CalPERS benefit had the city adopted the Police Officer's Standards and Training (POST) Widows and Orphans Salary Continuation Plan.

The plan is currently dormant, with payments being made from interest earnings and accumulated balances.

Comments:

Police officers and firefighters hired after June 30, 1976, are members of CalPERS, which is administered by the State of California.

Footnote:

- (1) The city transferred proceeds of \$17,709,888 from the Oakland Joint Powers Financing Authority Refunding Revenue 2005 Series B Bond to fund a portion of the city's future obligation to the system.
- (2) The City of Oakland issued pension obligation bonds in the amount of \$417,173,300 to fund the Retirement System during the year ended June 30, 1998, and, as a result, no employer contributions are required through the year ending June 30, 2011.

Comments:

The City of Oakland (City) contributes amounts necessary, on an actuarial basis, to provide assets sufficient to meet benefits as they come due. No identified unfunded actuarial accrued liability exists and the City made no contributions for the fiscal year ended June 30, 2005.

Footnote:

- (1) The City of Oakland Municipal Employees' Retirement System (OMERS) is an over-funded system. After the last retiree or beneficiary is deceased, the remaining portion is refunded to the City of Oakland. This amount is the actuary's estimate of what will remain at the conclusion of the system.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
City of Pasadena Fire and Police Employees' Retirement System — (Continued)

Comments:

The funding plan was updated on March 18, 1999, when the Pasadena Fire and Police Retirement System (System) entered into Contribution Agreement No. 16,900 (Agreement) with the City of Pasadena (City). Per the Agreement, the System is considered to be fully funded if the funded percentage exceeds 72.5%. The minimum fully funded percentage will increase by 1/2% each year until it reaches 80%, or for each of the next 20 years.

As of June 30, 2005, the actuarially determined unfunded accrued liability was \$52,451,000 and the funded status of the System was 72% -- below the required minimum funding percentage of 72.5%. The Agreement states that, if the System falls below the minimum funding percentage, the City will reimburse the System in the following fiscal year up to the amount necessary to restore the System to the minimum funding percentage as of the last day of the preceding fiscal year. As a result, the employer rate adopted by the governing body is 512%.

The minimum funding deficits were \$1,407,000 and \$16,865,000 as of June 30, 2005 and 2004 respectively. The Agreement states that if this minimum funding deficit is greater than \$3,000,000, the City will pay \$3,000,000 to the System; any remaining amount necessary to reach the minimum funding percentage is to be phased in over a five-year period.

During June 2004, the system entered into a Settlement and Release Agreement No. 18,550 with the City of Pasadena. Under the agreement, the City issued a debenture in June 2004 and agreed to make three payments to the system (in addition to the Cost of Living contributions required under the City ordinance and employer pick-up of employee contributions negotiated in a labor agreement). The debenture of \$13,735,616 replaced earlier debentures issued by the City for Supplemental Contributions under Contribution Agreement No. 16,900. The debenture included a principal amount of \$12,829,096 plus interest accrued through the end of the prior fiscal year.

In June 2004, the City of Pasadena (City) received \$40,000,000 from a Pension Obligation Bond as a result of the Settlement and Release Agreement No. 18,550 ("Settlement Agreement"). Per the Settlement Agreement, the City and the Fire and Police Employees' Retirement System (System) entered into an agreement to settle the disputed use of the corridor method and the payment of the supplemental contributions. Under the terms of the Settlement Agreement, the City will make contributions of \$15,000,000, \$15,000,000, and \$10,000,000 in August 2004, November 2004, and January 2005, respectively. In consideration, the System agreed to eliminate the use of the corridor concept methodology in all actuarial valuations on or subsequent to June 30, 2004.

Footnote:

- (1) Per the terms negotiated through their respective recognized associations, employee contributions of 9% for both fire and police personnel base earnings were made by the City on behalf of the employees and credited to their individual accounts.

Comments:

The plan is closed to new participants. At June 30, 2005, all active Police and Fire Department employees participated in CalPERS.

Footnote:

- (1) The Retirement Board has adopted an asset-smoothing technique. This technique recognizes realized and unrealized appreciation in the market value of assets over a period approximating five years and incorporates a minimum value of 80% of market value and maximum value of 120% of market value.

Comments:

Based on information supplied by the City of Richmond (City), the Tax Override Pension Fund may be used only to fund pensions provided by charter provisions added before the effective date of Proposition 13 (July 1, 1978).

The results of Oliver Consultants' actuarial valuation as of July 1, 2005, reported that the plan's funded ratio increased to 46%. The increase was primarily due to a contribution that offset the impact of a net return on assets in cash held at Mechanics Bank of 1.4%, versus the 5.0% return assumed in last year's calculation.

Footnote:

(1) Transfer from Tax Override Pension Fund.

(2) Beginning balance restatement to adjust Net Pension Obligation (Assets) that is only reportable at the citywide financial statements according to GASB statements 27 and 34.

Comments:

The results of Oliver Consultants' actuarial valuation as of July 1, 2005, reported that the plan's recommended contributions increased and the funded ratio declined to 46%. The decline is primarily due to mortality losses.

Footnote:

- (1) Transfer from Property Tax Override Fund.
- (2) Beginning balance restatement to adjust Net Pension Obligation (Assets) that is only reportable at the citywide financial statements according to GASB statements 27 and 34.

Comments:

Employer contributions have not been necessary in recent years due to investment returns and demographic results favorable to actuarial assumptions. During the year ended June 30, 2005, active member contributions ranged from 3% to 10% of payroll. There were no actuarially required employer contributions.

General and Safety Tier I represents the 175 Plan; General and Safety II represents the Equal Share Plan; General and Safety Tier III represents the 399 Plan.

Comments:

Effective July 1, 1997, the actuary has been using the aggregate cost method. The aggregate cost method does not separately identify or separately amortize an unfunded actuarial accrued liability. Experience gains or losses are spread over future years through adjustment to the Normal Cost, as they are automatically included in the Actuarial Present Value of Future Normal Costs.

Comments:

In January 2003, the City of San Diego Employees' Retirement System (SDCERS) was named as defendant, along with the City of San Diego (City), in a reputed class action lawsuit (known as Gleason v. San Diego City Employees' Retirement System, et al.) brought by city retirees. The lawsuit alleges that the City and SDCERS entered into an agreement (the Contribution Agreement) that resulted in an unconstitutional funding method for the period through 2009. The City and SDCERS were under investigation by the Securities Exchange Commission, thus delaying the completion of their Comprehensive Annual Financial Report (CAFR). While the investigation has been completed, the CAFR for fiscal year ending June 30, 2005, is still in process. Therefore, the information presented is unaudited.

The tier structure for membership, contribution rates, and retirement policies is being presented differently this year in order to provide more detail. Tier 1 represents the City of San Diego, Tier 2 represents the Unified Port District, and Tier 3 represents the Airport Authority.

Footnote:

(1) The adjustment is due to the correction of real estate fair market value.

San Francisco City and County Employees' Retirement System — (Continued)

Comments:

The safety member contribution rates shown under Tier I and Tier II are for police membership and firefighter membership, respectively. While both the police category and the firefighter category each have two tiers, the rates are the same in each. Therefore, for reporting purposes, police members are Tier I and firefighter members are Tier II.

The employee contribution rates shown are the average for each membership category. Their rates as a percentage of gross salary were as follows: Participants entering the retirement system prior to November 2, 1976, and police and fire, 7%; all others, 8%; participants entering the retirement system after November 2, 1976, 7.5%.

In November 2003, voters approved Proposition F, which provides a targeted early retirement for employees who are in job classifications with positions that are being eliminated through the City Budget process. Employees who are eligible to receive the early retirement benefit would have an additional three years of service and three years of age included in their service retirement calculation. Proposition F was approved for fiscal years 2003-04 and 2004-05; however, the Board of Supervisors can extend the early retirement program for up to an additional two years.

In March 2004, voters approved Proposition D, which provides that surviving domestic partners are to be treated the same as surviving spouses under provisions of the Retirement System.

Comments:

The plan provides retirement benefits for all qualifying union and non-union employees. All represented groups are now combined and reported under one tier.

Footnote:

- (1) The amortization policy was changed beginning with the valuation as of January 1, 2000. All sources of the Unfunded Actuarial Accrued Liability (UAAL) are combined and amortized as a level percentage of projected active member payroll over a 30-year period. This period will decrease by one year with each valuation, until 15 years is reached. From that point forward, the UAAL will be amortized as a level of projected active payroll over a rolling 15-year period.
- (2) Rounding. The financial statements of the AC Transit Employee's Retirement Plan provided to the State Controller's Officer were rounded to the nearest thousands.
- (3) The projected salary increases are 3.90% to 10.90% for members of the Amalgamated Transit Union (ATU) and International Brotherhood of Electrical Workers (IBEW) and 4% for American Federation of State, County & Municipal Employees (AFSCME) and non-represented members.

Service Disability - Per Year	—	—	—	—	—	—	—	—	—
- Maximum	30 %	—	—	—	—	—	—	—	—

Footnote:

- (1) The six years remaining on the Unfunded Actuarial Accrued Liability (UAAL) amortization schedule will lead to significant fluctuations in District contribution rates for future years, so the actuary recommended a change in the amortization period to a 15-year period, where each year's change in UAAL will be separately amortized over a new 15-year period.

Comments:

Effective January 1, 2000, the Plan was amended to provide a Special Payment Plan (SPP), whereby each full-time employee is entitled to an accrual of \$2,000 per year for the term January 1, 1999 through February 28, 2005. Due to the reinstatement of employer's contributions, the annual payments to the SPP have been suspended.

Footnote:

- (1) The District's contributions to the plan are determined as a result of collective bargaining with the Amalgamated Transit Union Local No. 1575. Employer contributions to the plan were suspended from July 23, 1999, through December 31, 2004, unless the actuarial value of plan assets were determined to be less than 105% of the actuarial liability. As that occurred in 2004, the employer contribution to the plan is 15.165% of covered payroll. Of this amount, the District will deposit up to \$80,000 into the Health and Welfare Trust annually to defray the cost of retiree medical benefits.

Comments:

The Board of Directors passed a resolution that allowed employees, as of December 31, 2002, to make an irrevocable choice between continuing in the Retirement Plan and receiving matching contributions to the 401(K) plan. Nonvested employees who elected not to continue in the Retirement Plan gave up their accrued benefits under the plan. New employees hired on or after January 1, 2002 are ineligible to participate in the Retirement Plan.

Effective July 1, 2002, Kaweah Delta adopted the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRAA), which will increase the maximum benefits payable from the Retirement Plan and the pay limits on which benefits may be calculated.

Comments:

A Deferred Retirement Option Program (DROP) was established effective January 19, 2005. This program allows participants to elect "retirement" without separation of employment. At "retirement," the benefit accrual and employee contributions in this plan will cease. The monthly benefit, which must be taken as an annuity, will be deposited into an account that is part of the Trust Fund. This account will earn investment earnings, but there is no investment return guarantee. At separation of service (or death or disability, if earlier), the value of the DROP account will be paid. Additionally, the regular monthly benefit will commence. In the long term, DROP may change the percentage of retirees electing lump sum options and the timing of retirements.

Footnote:

- (1) Year-end audit adjustments of Other Income for Life Insurance deductions, Return of Benefit Payments and audit reclass among plans.
- (2) Beginning balance of the American Federation of State, County, and Municipal Employees (AFSCME) plan. Effective January 1, 2004, the Non-Contract plan spun-off into the AFSCME plan. The AFSCME plan has the same benefit provision as the Non-Contract plan on January 1, 2004, and will receive plan assets that are proportional to its actuarial accrued liability.

Comments:

Effective July 1, 2000, the Metropolitan Transportation Authority contributes funds up to 11% of payroll per year. Anything over 11% is split between employer and employee.

A Deferred Retirement Option Program (DROP) was established effective December 4, 2003. This program allows participants to elect "retirement" without separation of employment. At "retirement," the benefit accrual and employee contributions in this plan will cease. The monthly benefit, which must be taken as an annuity, will be deposited into an account that is part of the Trust Fund. This account will earn investment earnings, but there is no investment return guarantee. At separation of service (or death or disability, if earlier), the value of the DROP account will be paid. Additionally, the regular monthly benefit will commence. In the long term, DROP may change the percentage of retirees electing lump sum options and timing of retirements.

Footnote:

- (1) Transfer to the Los Angeles County Transportation Authority Non-Contract Employees' Retirement System. This amount represents the accrued value attributable to former members who transferred to the Non-Contract plan, have now retired, and now receive a benefit paid by the Non-Contract Plan.
- (2) Year-end audit adjustments of Other Income for Life Insurance deductions, Return of Benefit Payments and audit reclass among plans.

Los Angeles County Transportation Authority Non-Contract Employees' Retirement System — (Continued)

Footnote:

- (1) This represents the net amount of benefit transfers by former union employees that were in the Los Angeles County Transportation Authority Maintenance Employees' Retirement System, the Los Angeles County Transportation Authority Transportation Communication - Union Employees' Retirement System, and the Los Angeles County Transportation Authority United Transportation Union Employees' Retirement System. This amount represents the accrued value attributable to former union employees who transferred to the Non-Contract position and have now retired and are paid by the Non-Contract Plan.
- (2) Year-end audit adjustments of Other Income for Life Insurance deductions, Return of Benefit Payments and audit reclass among plans.
- (3) Balance amount transferred to the American Federation of State, County, and Municipal Employees (AFSCME) plan. Effective January 1, 2004, the Non-Contract plan spun-off into the AFSCME plan. The AFSCME plan has the same benefit provision as the Non-Contract plan on January 1, 2004 and would receive plan assets that are proportional to its actuarial accrued liability.

Comments:

A Deferred Retirement Option Program (DROP) was established effective October 28, 2004. This program allows participants to elect "retirement" without separation of employment. At "retirement," the benefit accrual and employee contributions in this plan will cease. The monthly benefit, which must be taken as an annuity, will be deposited into an account that is part of the Trust Fund. This account will earn investment earnings, but there is no investment return guarantee. At separation of service (or death or disability, if earlier), the value of the DROP account will be paid. Additionally, the regular monthly benefit will commence. In the long term, DROP may change the percentage of retirees electing lump sum options and timing of retirements.

Footnote:

- (1) This amount represents the accrued value attributable to former members who transferred to the Non-Contract plan and have now retired and are receiving a benefit paid by the Non-Contract Plan.
- (2) Year-end audit adjustments of Other Income for Life Insurance deductions, Return of Benefit Payments and audit reclass among plans.

Comments:

The year 2004 was the second year of strong investment returns, and the Plan's funded ratio at 97% was within the funding policy's 95% to 105% target window. As a result, the District contributed only \$1,000,000 of the recommended \$4.19 million. This, and additional enhanced benefits, resulted in a funded ratio of only 82%.

Footnote:

(1) Effective January 1, 2005, the amortization method changed from a 10-year closed, level-dollar amount to a 30-year rolling, level-dollar amount method.

Footnote:

- (1) In August 2004, the San Diego Metropolitan Transit System (MTS), the partner company of San Diego Transit Corporation (SDTC), authorized the issuance of pension obligation bonds (POBs) to fund 85% of SDTC's unfunded accrued actuarial liability (UAAL) and the fiscal year 2005 normal cost reimbursements. As a result, the POBs of \$77,490,000 were sold and \$76,282,336 was deposited into the pension plan in November 2004. Of this amount, \$7,231,698 was funded for the current contribution and \$69,050,638 funded for the prior year UAAL.
- (2) The plan provided Deferred Retirement Option Program (DROP) benefits to a number of Amalgamated Transit Union participants who elected retirement from July 1, 2002 through December 31, 2002. In fiscal year 2005, 21 employees received their DROP payments.
- (3) A new unfunded actuarial accrued liability (UAAL) was created as of April 1, 2000, primarily as a result of improvements in the plan benefits. Therefore, all sources of the UAAL have been combined and are being amortized over a rolling 30-year period.

Comments:

The actuarial cost method used is the Frozen Entry Age Actuarial Cost Method. The frozen actuarial accrued liability is determined using the Entry Age Normal Actuarial Cost Method.

On January 1, 2004, six years remain on the original base of the Unfunded Actuarial Liability, established on October 1, 1979. However, 22 years remain on the assumption-change base established on October 1, 2000.

The amount of the monthly retirement benefit at the Normal Retirement Date shall be equal to the largest of: a) the product of 2.3% of the participant's Final Average Monthly Earnings and years of service; b) the benefit that would have been payable under the prior plan in effect September 30, 1979; c) the benefit accrued to September 30, 1989, under the plan then in effect; or d) the benefit accrued to September 30, 1992, under the plan then in effect.

Footnote:

- (1) Beginning October 1, 1990, the remaining period for amendment losses was changed from 30 to 25 years from the date established, and the period for assumption gains or losses increased from 10 to 15 years.

Comments:

The West Contra Costa Healthcare District Successor Retirement Plan (Successor Plan) was established on March 9, 2000, as a successor plan to the West Contra Costa Healthcare District Employees' Retirement Plan, which was terminated on that date. The participants of the predecessor plan were given the option of receiving immediate lump sum distributions of the present value of their benefits, rolling the benefits into an IRA or other plan, or participating in a successor plan.

As of the July 1, 2004 valuation, Successor Plan assets are less than the actuarial present value of future benefits by the amount of \$867,538. This amount will be amortized over five years.

The district filed for reorganization under Chapter 9 during fiscal year 2006-07.

Comments:

This retirement plan covers part-time, temporary, and seasonal employees who are not contributing to Social Security or not participating in an agency-sponsored retirement plan.

Footnote:

- (1) The amortization period for the unfunded liability was shortened from a rolling 10 to a rolling 5-year period with the goal of more rapidly funding the plan's unfunded liability.

Public Retirement Systems Annual Report — Fiscal Year 2004-05
Public Agency Retirement System (PARS) Defined Benefit Plans — (Continued)

Comments:

The trust purchases allocated annuity contracts from various life insurance companies for certain retiring employees of participating retirement plans. Allocated annuity contracts are contracts under which the companies have a legal obligation to make all benefit payments for which they have received the premiums or consideration requested. Accordingly, funds in the allocated contracts have been excluded from the net assets of the trust. In 2005, at the direction of certain participating plan administrators, the trust purchased \$67,075,958 of annuity contracts to pay benefits to named employees or their beneficiaries.

Membership and contribution rate tier levels may not be consistent from year to year. For the fiscal year ending June 30, 2005, PARS tier levels are as follows: General Tier I = PARS Accumulated Leave Plan, General Tier II = PARS Supplemental Retirement Plan/Separation Incentive Plan, General Tier IV = PARS City of Long Beach Contract Consultants, General Tier V = PARS City of Long Beach Part-Time Seasonal Temporary Plan, General Tier V1 = PARS Retirement Enhancement Plan DB.

Footnote:

- (1) The Public Agency Retirement System (PARS) Defined Benefit Plans is an agent multiple-employer plan. As of June 30, 2005, there were 284 employer members, including 11 counties, 75 cities, 179 school districts, and 19 other employers participating in PARS. Because of the characteristics of a multiple-employer plan, each employer agency of PARS had various numbers of membership tiers of its own and the status of these tiers was not the same as of June 30, 2005. Some tiers were open and some tiers were closed.
- (2) As the PARS Defined Benefit Plan is an agent multiple-employer plan, employer contribution rates vary within the year.

Comments:

The Replacement Benefit Fund (RBF) was established by Chapter 938 of the 1995 Statutes and initially funded in 1998 to provide benefits to members of the PERF whose retirement benefits exceed Internal Revenue Code Section 415(b) limits. IRC Section 415(b) imposes a dollar limit on the annual retirement benefits an individual may receive from a qualified defined benefit pension plan.

The RBF is funded on a pay-as-you-go basis.

Comments:

The Teachers' Replacement Benefits Program Fund is a replacement pension benefit plan established to pay the portion of annual benefits that exceed the annual limitations under Section 415 of the Internal Revenue Code of 1986. This benefit program is funded from current employer contributions on a pay-as-you-go basis.

Comments:

The Tax-Deferred 403(b) Plan is available to all University employees except students who normally work fewer than 20 hours per week. Taxes on contributions and earnings thereon are deferred until the accumulations are withdrawn. Annual pretax contribution limits for the 403(b) Plan changed during fiscal year 2004-05 as follows: Effective January 1, 2005, the maximum annual contribution limit for participants under age 50 is \$14,000 (or 100% of adjusted gross salary, if less). For participants age 50 or older, the annual contribution limit is \$18,000 (or 100% of adjusted gross salary, if less). Participants with 15 or more years of service may be able to increase their limits under a special catch-up provision.

Comments:

On October 22, 2002, the Irvine City Council adopted a resolution giving notice of intention to amend the contract between the Board of Administration of the California Public Employees' Retirement system (CalPERS) and the City of Irvine (City) to offer miscellaneous (non-sworn) employees the opportunity to participate in the CalPERS pension plan. On November 15, 2002, the proposed CalPERS contract for miscellaneous employees was approved through a majority vote of eligible employees. During the April 2003 election period, of the 591 employees eligible to participate in the new CalPERS plan, 434 elected to participate in CalPERS and 36 active participants and 121 non-active participants elected to remain the City of Irvine Defined Contribution Pension Plan (Plan).

In 2003, at the time of the transition between the Plan and CalPERS, some of the Plan participants opting to move to CalPERS had outstanding loans in their 401a accounts. In order to accommodate their transition, the City chose to reduce their years of service by an amount commensurate with their outstanding loan balance. Those affected employees continued to make their payroll deducted loan payments to the Plan although they were not long participants in the Plan.

By mutual agreement, the City transfers annually, on or before March 15, the balances of those participants loan accounts that have been paid in full. For calendar year 2004, the amount transferred was \$110,971. This procedure will continue until all of the outstanding loans have been paid in full and the withheld years of service have been restored.

Footnote:

- (1) Participants may borrow up to 50% of their vested account balances or \$50,000, whichever is less, with the minimum loan amount being \$1,000. At December 31, 2004, loans outstanding totaled \$474,940.
- (2) At December 31, 2004, forfeited nonvested accounts totaled \$244,113. These accounts were used to reduce future City contributions, reinstate closed accounts, and pay for Plan-related expenses (for which the City is responsible) at the discretion of the City.
- (3) Prior to May 17, 2002, participants could not contribute to the Plan. However, in anticipation of an opportunity for participants to transfer to a new pension plan, the Plan was amended to allow limited redeposits. Effective July 1, 2003, participants are required to contribute 4% of their base compensation to the Plan.

Comments:

During the year, the City approved a contract with the California Public Employees' Retirement System (CalPERS) providing for participation by city employees in that agency's retirement plan. The city had discontinued its contributions to the International City/County Management Association (ICMA) Employees Money Purchase Pension Plan and Employees Retirement Trusts as of July 2004. The plan is in the process of being terminated.

Comments:

In January 2003, the City of San Diego (City), along with the City of San Diego Employees' Retirement System (SDCERS), was named as defendant in a reputed class action lawsuit (known as Gleason v. San Diego City Employees' Retirement System, et al.) brought by city retirees. The lawsuit alleges that the City and SDCERS entered into an agreement (the Contribution Agreement) that resulted in an unconstitutional funding method for the period through 2009. The City and SDCERS were under investigation by the Securities Exchange Commission, thus delaying the completion of the Comprehensive Annual Financial Report (CAFR). While the investigation has been completed, the CAFR for fiscal year ending June 30, 2005, is still in process. Therefore, the information presented is unaudited.

Comments:

On September 17, 2002, the Sacramento Suburban Water District (SSWD), the sponsor of the Arcade Water District Money Purchase Plan and Trust (Plan), adopted Resolution No. 02-23, which gave participants the opportunity to choose whether to continue receiving benefits under the Plan or to participate in the California Public Employees' Retirement System (CalPERS). The resolution fully vested the plan accounts of all participating employees and resolved that SSWD will not make further contributions to the Plan. On September 23, 2002, the Plan was terminated and all participant funds were transferred out of the Plan. The final reporting year will be 2004-05.

The Plan liquidated its assets during the year ended August 31, 2004. This is the final year Arcade Water District Money Purchase Pension Plan and Trust will report to the State Controller's Office.

Comments:

Effective March 5, 2005, the Plan was amended so that the District will contribute 12% of eligible employees' wages and participants will be required to contribute 4% of their annual wages.

Footnote:

- (1) There are significantly more distributions in the current year, due to a large number of participants retiring or leaving the employment of the District.

Comments:

The Centre City Development Corporation (CCDC) Money Purchase Pension Plan did not include the financial information for the pension fund in its June 30, 2005, audited financials. Therefore, the amounts above could not be verified.

The CCDC's Money Purchase Pension Plan covers all full-time permanent employees. Each year, the CCDC contributes an amount equal to 8% of the total quarterly compensation for all employees. The CCDC also has a Tax Deferred Annuity Plan, which is reported separately under the CCDC Deferred Annuity Plan.

Comments:

John Hancock Life Insurance Company holds the Plan's assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee, as of and for the year ended December 31, 2004, that the information provided to the plan administrator by John Hancock Life Insurance Company is complete and accurate. Independent auditors Maestro and Associates did not audit and did not express an opinion on the financial statements presented.

There is a difference in the number of plan participants between the audited financials and the schedule of plan membership of ten inactive non-vested members.

Comments:

For the year ended September 30, 2004, the District adopted and implemented a new financial reporting model as required by the provision of Government Accounting Standards Board (GASB) No. 34, 37, 38, and 39. Implementation of these reporting standards results in changes to the format and content of the basic financial statements.

Footnote:

- (1) Member refunds consist of "Withdrawals" of \$24,422 and "Terminations" of \$8,681,068. Withdrawals represents any individual who took a distribution from the plan while still active and employed with Imperial Irrigation District (IID). Terminations represents any individual who took any kind of payment from the plan after he or she separated from service. IID is unable to separate the retirement distributions from distributions to employees who simply leave the agency and take their contributions with them.

Comments:

Delaware Management Trust Company holds the Plan's assets and executes investment transactions. The Plan administrator has obtained a certification from the trustee, as of and for the year ended December 31, 2004, that the information provided to the plan administrator by the trustee is complete and accurate. Independent auditors Hurley and Company did not audit and did not express an opinion on the financial statements presented.

On February 17, 2005, the District received a favorable determination letter from the Internal Revenue Service (IRS) for the La Canada Irrigation District Employees' Pension Plan (Plan), initially effective on January 1, 1969, as amended and restated on January 1, 2003. The Plan has been amended since the District received the determination letter. However, as the Plan is a Prototype Non-standardize Safe Harbor Money Purchase Pension Plan, the plan administrator believes it continues to be designed and operated in compliance with the applicable requirement of the Internal Revenue Code. Administration errors, if any, that are insignificant or operational in nature are handled by the plan administrator in accordance with applicable IRS correction policies. Therefore, the plan administrator also believed that the Plan was qualified and the related trust was tax-exempt as of the financial statement date. As such, no provision for income taxes has been included in the Plan's financial statements.

Footnote:

- (1) The District contributes to the Plan 5% of each employee's compensation; 0.2% of each employee's compensation for each year of the service prior to January 1, 1969; and the contribution amount determined in lieu of Social Security and Medicare for those members who are entitled to an allocation under the Plan.

Comments:

Upon the occurrence of a distributable event, former participants and beneficiaries may elect to receive their benefits in a lump sum or in periodic distributions. Such individuals may elect to commence benefits immediately or defer distributions up to the Internal Revenue Code's (IRS) required beginning date. Therefore, benefit payment amounts will vary from period to period.

The Modesto Irrigation District Supplemental Retirement Plan implemented Government Accounting Standards No. 34 in 2004.

Comments:

The District may elect in any year to contribute any portion or all of each employee's contribution, thereby reducing the employee's contribution by the amount contributed by the District. For the year ended December 31, 2004, the District contributed 3% of the employees' share plus their share of 7.65% for a total of 10.65% of compensation to each employee's account.

Footnote:

- (1) The Plan allows participants to borrow up to the lesser of \$50,000 or 50.00% of the vested portion of the individual participant's account. The loans are secured by up to one-half of the vested account balance in the participant's account and/or a security interest in the residence of the participant. Loans bear interest at rates ranging from 5.00% to 10.50%. The interest rate is determined at the time the loan is approved.

Comments:

On June 19, 2003, the District joined the California Public Employees' Retirement System (CalPERS) and ceased making contributions to the South Tahoe Public Utility District Pension Plan (Plan). The Plan will continue to operate until no later than June 30, 2008, at which time the District intends to terminate the Plan and distribute the Plan assets. No new participants may join the Plan.

Footnote:

- (1) Participants may borrow up to 50% of their account balance to a maximum of \$50,000, subject to the loan policy established by the Plan Trustee. Loan repayments must comply with the IRS provision calling for repayment in five years or less. In addition, the Plan now provides for all loans to be repaid by June 30, 2008.

Comments:

The Southgate Recreation and Park District is the administrator for the plan. The ICMA Retirement Corporation is the trustee of the funds and advises on legal issues, fees, and appropriate plan documents, and issues quarterly statements to plan participants. ICMA offers participants various mutual funds and money market funds in which to invest their contributions.

Comments:

In July 2003, the District approved the management transfer of the District Money Purchase Retirement Plan to TIAA-CREF and ceased contributions to the Money Purchase Plan and Trust with ICMA Retirement Corporation. The amount of \$384,008 was transferred from the Money Purchase Plan and Trust with ICMA Retirement Corporation to the Money Purchase Retirement Plan with TIAA-CREF. Assets still held by ICMA Retirement Corporation represent those of retired employees.

CalPERS SUPPLEMENT

This section is intended to provide a more comprehensive review of the California Public Employees' Retirement System (CalPERS). CalPERS has provided all information presented in the following tables to the State Controller's Office.

1. Actuarial Position by Member Category

Presented below is the system-wide actuarial position of the various CalPERS categories as of June 30, 2004. The total actuarial liabilities calculated using credited projected benefits amount to \$195.5 billion, with an actuarial value of assets of \$170.0 billion and a shortage of actuarial assets over liabilities of -\$25.5 billion. The new funded ratio is 86.9%, compared to 87.3% in 2003.

PERS CATEGORIES	ACTUARIAL LIABILITIES	ACTUARIAL VALUE OF ASSETS	UNFUNDED LIABILITIES	FUNDED RATIO
State Miscellaneous	\$54,700,513,158	\$46,122,429,182	\$8,578,083,976	84.3%
State Industrial	1,601,674,347	1,437,418,578	164,255,769	89.7%
State Safety.....	3,087,450,574	2,534,327,887	553,122,687	82.1%
Peace Officers/Firefighters.....	15,668,422,453	13,188,443,959	2,479,978,494	84.2%
California Highway Patrol	4,741,666,119	3,798,558,010	943,108,109	80.1%
State Combined.....	\$79,799,726,651	\$67,081,177,616	\$12,718,549,035	84.1%
County Schools.....	35,932,737,005	33,310,764,843	2,621,972,162	92.7%
Public Agencies	79,797,759,368	69,598,015,033	10,199,744,335	87.2%
GRAND TOTAL	\$195,530,223,024	\$169,989,957,492	\$25,540,265,532	86.9%

2. State Employer Contribution Rates

Below are the contribution rates that were effective July 1 of each year since 1998 for the various state categories.

MEMBER CATEGORIES	7-1-99	7-1-00	7-1-01	7-1-02	7-1-03	7-1-04
State Miscellaneous Members						
Tier I	1.491%	0.000%	4.166%	14.843%	17.022%	15.942%
Tier II	0.000%	0.000%	0.036%	10.265%	13.216%	15.890%
State Industrial Members	0.026%	0.026%	0.350%	11.099%	16.386%	17.147%
State Safety Members	7.487%	6.808%	12.923%	21.930%	20.773%	19.026%
Peace Officer/Firefighter Members	0.000%	2.729%	9.638%	20.325%	23.841%	23.563%
Highway Patrol Members	13.345%	13.711%	16.897%	32.653%	33.434%	26.396%
County School Members	0.000%	0.000%	0.000%	10.420%	9.952%	9.116%

3. State Employee Contribution Rates

Below are the member contribution rates by employment classification, reported as a percentage of salary (effective July 1, 2003).

EMPLOYMENT CLASSIFICATION	CONTRIBUTION RATE	APPLIED TO MONTHLY COMPENSATION IN EXCESS OF
1. State Miscellaneous Members Not Covered by Social Security	6%	\$317
2. State Miscellaneous Tier 1 Members With Social Security	5%	\$513
3. State Miscellaneous Tier 2 Members	0%	-
4. State Industrial Tier 1 Members With Social Security	5%	\$513
5. State Industrial Tier 1 Members Not Covered by Social Security.....	6%	\$317
6. State Industrial Tier 2 Members.....	0%	-
7. State Safety.....	6%	\$317
8. State Peace Officers/Firefighters.....	8%	VARIES
9. California Highway Patrol	8%	\$863
10. County School Members With Social Security.....	7%	\$133
11. County School Members Not Covered by Social Security	7%	-

4. Funding Position of Contracting Agencies

The following table reports the Actuarial Liabilities, Actuarial Value of Assets, Unfunded Liabilities, and Funding Ratios for each Local Contracting Agency.

Employer Name	Category	Actuarial Liabilities	Actuarial Value of Assets	Unfunded Liabilities	Funding Ratio (%)

4.1 Funding Position of Contracting Agencies – Risk Pools

Government Code (GC) Sections 20840, 20841, and 20842 allow the CalPERS Board to create risk pools and mandate public agency participation in the pools. Article 7.6 was added to Title 2 of the California Code of Regulations, establishing the criteria for participation into risk pools.

Risk pooling is the process of combining assets and liabilities across employers to produce large risk sharing pools. These risk sharing pools help dramatically reduce or eliminate the large fluctuations in the employer's contribution rate caused by unexpected demographic events. Plans will be assigned to risk pools based on their service retirement formula. CalPERS initiated risk pooling during the fiscal year ended June 30, 2004. However, due to the way that CalPERS provides the information to State Controller's Office, this is the first year that the pooled information is reflected in this publication.

Agencies that do not have large numbers of active employees are much more susceptible to the impact of unforeseen demographic events, making the agency's rates fluctuate dramatically from year to year. In an effort to help ensure more stability in the rates of these agencies, they were brought together into a pool – in effect creating one larger agency to help spread out the impact of unforeseen demographic events.

The following ten pools will be presented, followed by the name of the plans participating within that specific pool:

- Miscellaneous 2.0%@55: Miscellaneous employees subject to the 2%@55 formula (GC Section 21354 or GC Section 21354.1).
- Miscellaneous 2.0%@60: Miscellaneous employees subject to the 2%@60 formula (GC Section 21353) or 1.25%@65% (GC Section 21076).
- Miscellaneous 2.5%@55: Miscellaneous employees subject to the 2.5%@55 formula (GC Section 21354.4).
- Miscellaneous 2.7%@55: Miscellaneous employees subject to the 2.7%@55 formula (GC Section 21354.5).
- Miscellaneous 3.0%@60: Miscellaneous employees subject to the 3%@60 formula (GC Section 21354.3).
- Safety 2.0%@50: Safety employees subject to the 2%@50 safety formula (GC Section 21362) or 2.5%@55 safety formula (GC Section 21363).
- Safety 2.0%@55: Safety employees subject to the 2%@55 safety formula (GC Section 21369) or ½@55 formula (GC Section 21366).
- Safety 3.0%@50: Safety employees subject to the 3%@50 safety formula (GC Section 21362.2).
- Safety 3.0%@55: Safety employees subject to the 3%@55 safety formula (GC Section 21363.1).
- Inactive Pool: Rate plans determined to be inactive in the June 30, 2003 actuarial valuation (i.e. no active members in the rate plan), regardless of the benefit formula applicable to the inactive members of the plan. Rate plans moving from an active status to an inactive status will be transferred from their then current pool to the inactive plan pool following a period of at least one year in which they had no active members.

5. CalPERS Supplement – Summary of Contracting Agency's Benefits

The following table compares selected benefits of all the local public agencies that contracted with CalPERS. Agencies are listed alphabetically, with the plan types (miscellaneous or safety) listed below. The five-digit code reported is used for identification by CalPERS for the various benefit formulas and may be useful if additional information is needed. The abbreviations used in the tables are described below.

- A. Retirement Benefit Formula – This column indicates the retirement benefit formula used to compute retirement benefits for each agency and group. A CalPERS member who has at least five years of credited service becomes eligible for service retirement upon attainment of age 50.

1. Three Percent at Age 50 Formula (Local Safety Members):

Age	Percent Per Year of Service
50 and Over	3.000%

2. Three Percent at Age 55 Formula (Local Safety Members):

Age	Percent Per Year of Service
50.....	2.400%
52.....	2.640%
54.....	2.880%
55 and Over	3.000%

3. Two Percent at Age 50 Formula (Local Safety Members):

Age	Percent Per Year of Service
50.....	2.000%
52.....	2.280%
54.....	2.560%
55 and Over	2.700%

4. One-Half Percent at Age 55 Formula (Local Safety Members):

Entry Age	Percent Factor
25.....	1.667%
30.....	2.000%
35 and Over	2.500%

If a member retires between the ages of 50 and 55, the above percent factors must be discounted as follows:

Age	Discount Factor
50.....	0.713
52.....	0.814
54.....	0.933

5. Two Percent at Age 55 Formula (Local Safety Members):

Age	Percent Per Year of Service
50.....	1.426%
52.....	1.628%
55 and Over	2.000%

6. Two Percent at Age 55 Formula (Local Miscellaneous Members):

Age	Percent Per Year of Service
50.....	1.426%
55.....	2.000%
60.....	2.262%
63 and Over	2.418%

7. Two and One-Half Percent at Age 55 Formula (Local Safety Members):

Age	Percent Per Year of Service
50.....	2.000%
52.....	2.200%
55 and Over	2.500%

8. Two Percent at Age 60 Formula (Local Miscellaneous Members):

Age	Percent Per Year of Service
50.....	1.092%
55.....	1.460%
60.....	2.000%
63 and Over.....	2.418%

9. One and One-Quarter Percent at Age 60 Formula (Local Safety):

Age	Percent Per Year of Service
50.....	0.619%
55.....	0.868%
60.....	1.250%
65.....	1.750%

10. Two and One-Half Percent at Age 55 Formula (Local Miscellaneous Members):

Age	Percent Per Year of Service
50.....	2.000%
52.....	2.200%
55 and Over.....	2.500%

11. 2.7 Percent at Age 55 Formula (Local Miscellaneous Members):

Age	Percent Per Year of Service
50.....	2.000%
52.....	2.280%
55 and Over.....	2.700%

12. Three Percent at Age 60 Formula (Local Miscellaneous Members):

Age	Percent Per Year of Service
50.....	2.000%
52.....	2.200%
54.....	2.400%
56.....	2.600%
58.....	2.800%
60 and Over.....	3.000%

B. Final Compensation Offset – This column is used to report which plans apply an offset to the final compensation.

Y — The final compensation used to calculate the retirement benefit is offset by \$133.33 (or by 1/3 if the final compensation is less than \$400).

N — No offset is applied to the final compensation used to calculate the retirement benefit.

C. Final Compensation Period – This column reports whether the retirement benefit is based on a one or three-year final average salary.

D. COLA (Cost-of-Living Adjustment) – CalPERS retirees and survivors receive a COLA of 2% per year on a compounded basis, no greater than the cumulative change in the consumer price index since the date of retirement. Some contracting agencies provide increases of 3%, 4%, or 5% (also limited to the cumulative increase in the consumer price index).

E. Pre-Retirement Death Benefit Option 2 Settlement – A “Y” indicates that the employer has contracted for this benefit, which provides, upon death of a member prior to retirement, an allowance equal to the retirement benefit the member would have received had he or she retired on the date of death and elected Option 2 Settlement. A retiree who elects Option 2 Settlement receives an allowance that has been reduced so that it will continue to be paid to a surviving beneficiary after the retiree’s death. (Gov. Code Sec. 21548).

F. Sick Leave Credit – A “Y” indicates that the agency has contracted for its employees to receive additional service credit for unused sick leave (Gov. Code Sec. 20965).

G. Post-Retirement Survivor Allowance (PRSA) – A “Y” indicates that the employer has contracted for this benefit, which provides, upon death of a member after retirement or disability, a continued allowance to the surviving spouse until death or remarriage, or to surviving children or dependent parents (Gov. Code Sec. 21624 and 21626).

H. Ordinary Disability Increase – This benefit applies to future ordinary disability retirements of miscellaneous members and of non-job-related disability retirements of Safety members. The current statutory level of disability retirement benefits for members with at least five years of credited service (1.8% of final compensation for each year of service, with a 33-1/3% maximum) would be raised to a minimum benefit of 30% of final compensation for five years of service and increased 1% of final compensation for each additional year of service to a maximum benefit of 50% of final compensation. Under no circumstances may the disability retirement allowance be more than the service retirement allowance if the member were to continue in employment and retire at age 60 (Gov. Code Sec. 21427).

- I. **1959 Survivor Benefit** (Gov. Code Sections 20070, 21382.5, 21570, 21571, 21572, 21573, 21574.5, 21575, 21576, 21577, 21578, 21579, 21580, 21581, 21582) – This optional benefit provides the following monthly allowance to beneficiaries of a member who dies prior to retirement. This benefit is in addition to the basic death benefit or the 1957 survivor benefit, but would be reduced by the amount of the industrial death benefits, if payable.

Spouse with two or more children, or three or more dependent children, alone	\$430
Spouse with one dependent child, or two dependent children, alone	\$360
Widow or widower, alone, age 62 (ages vary at different levels) or over; dependent mother or dependent father alone, age 62 (ages vary at different levels) or over; or one dependent child.....	\$180

Section 21572 (2nd level) provides for monthly benefit payments of \$538, \$450, and \$225, respectively.

Section 21573 (3rd level) provides for monthly benefit payments of \$840, \$700, and \$350, respectively.

Section 21574 (4th level) provides for monthly benefit payments of \$2,280, \$1,900, and \$950, respectively.

Section 21574.5 (indexed level) provides for monthly benefit payments of \$1,500, \$1,000, and \$500, respectively, as of January 1, 2000. These benefits increase at the rate of 2% per year.

A "1" indicates that the agency has contracted for Section 21571 benefits. A "2" indicates that it has opted for Section 21572 benefits. A "3" indicates it has selected Section 21573 benefits. A "4" indicates that it has elected Section 21574 benefits. An "8" indicates that the agency has contracted for Section 21574.5 benefits.

- J. **Member Contribution Rate** – The contribution rate paid by members as a percent of payroll. Some agencies use a fixed dollar amount, determined annually. These rates are designated as "Varies."
- K. **Employer Contribution Rate** – The contribution rate that is paid by the contracting agency as a percentage of payroll or a fixed dollar amount determined annually.

Appendix C – Definitions

Accrued Benefits: The amount of a pension plan participant's benefit (whether vested or not) as of a specified date, determined in accordance with the terms of the pension plan and based on compensation (if applicable) and service to that date.¹

Actuarial Accrued Liability: That portion, as determined by a particular actuarial cost method, of the actuarial present value of pension plan benefits and expenses that is not provided for by future normal costs.²

Actuarial Assumptions: Assumptions as to the occurrence of future events affecting pension costs, such as: mortality, withdrawal, disablement, and retirement; changes in compensation and government-provided pension benefits; rates of investment earnings and asset appreciation or depreciation; procedures used to determine the actuarial value of assets; characteristics of future entrants for open group actuarial cost methods; and other relevant items.²

Actuarial Basis: A basis used in computing the amount of contributions to be made periodically to a fund or account so that the total contributions plus the compounded earnings thereon will equal the required payments to be made out of the fund or account. The factors considered in arriving at the amount of these contributions include the length of time over which each contribution is to be held and the rate of return compounded on such contribution over its life.¹

Actuarial Cost Method: A procedure for determining the actuarial present value of pension plan benefits and expenses and for developing an actuarially equivalent allocation of such value to time periods, usually in the form of a normal cost and an actuarial accrued liability.²

Actuarial Present Value (APV): The value of an amount or a series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of actuarial assumptions.²

Actuarial Update: An estimate or projection of the pension benefit obligation developed by using techniques and procedures considered necessary by the actuary. If conditions are relatively stable, only a few minor adjustments (such as an accrual of additional interest on the pension benefits since the valuation date, and addition of benefits earned during the year less benefits paid) may be sufficient. If there have been significant changes in one or more relevant factors (e.g., in the size or composition of the population covered by the public employees' retirement system (PERS), the procedures may be more extensive.¹

Actuarial Valuation: A mathematical determination of the financial condition of a retirement plan. The Actuarial valuation includes the computation of the present monetary value of benefits payable to present members and the present monetary value of future employer and employee contributions, giving effect to mortality among active and retired members and also to the rates of disability, retirement, withdrawal from service, salary, and interest.³

Appendix C Definitions (Continued)

Agent Multiple-Employer PERS: An aggregation of single-employer public employees' retirement systems with pooled administrative and investment functions (i.e., CalPERS acts as a common investment and administrative agent for each employer). Each entity participating in an agent multiple-employer PERS receives a separate actuarial valuation to determine its periodic contribution rate.¹

Aggregate Actuarial Cost Method: A method by which the excess of the actuarial present value of projected benefits of the group included in an actuarial valuation over the actuarial value of assets is allocated on a level basis over the earnings or service of the group between the valuation date and the assumed exit date.² A schedule of funding progress is not required when this method is used because the method does not separately identify an actuarial liability.

Annual Covered Payroll (ACP): The active members' amount of annual payroll that is the basis for the contribution rates. This payroll amount usually excludes overtime pay and bonuses.

Annual Required Contribution (ARC): The employer's mandated contribution for the year, calculated in accordance with certain actuarial parameters.¹

Assets per Member: Total assets divided by total membership.

Attained Age Actuarial Cost Method: A method by which the excess of the actuarial present value of projected benefits over the actuarial accrued liability with respect to each individual included in an actuarial valuation is allocated on a level basis over the earning or service of the individual between the valuation date and the assumed exit date.²

Attribution: The process of assigning pension benefits or costs to periods of employee service.¹

Benefits: Payments to which participants are entitled under a pension plan, including pension benefits, death benefits, and benefits due on termination of employment.¹

Benefits per Beneficiary: Total benefit payments divided by the sum of retired, disabled, and survivor members of the system.

Cost-Sharing Multiple-Employer PERS: A single plan with pooling (cost-sharing) arrangements for the participating employers. All risks, rewards, and costs, including benefit costs, are shared and are not attributed individually to employers. A single actuarial valuation covers all plan members and the same contribution rate structure applies to each employer.²

Defined Benefit Pension Plan: A pension plan with terms that specify the amount of pension benefits to be provided at a future date or after a certain period of time. The amount specified usually is a function of one or more factors, such as age, years of service, and compensation.²

Appendix C Definitions (Continued)

Defined Contribution Pension Plan: A pension plan with terms that specify how contributions to a plan member's account are to be determined, rather than the amount of retirement income the member is to receive. The amounts a member receives depend only on the amount contributed to the member's account, earnings on investments of those contributions, and forfeitures of contributions made for other members that may be allocated to the member's account.²

Discount Rate: The rate used to adjust a series of future payments to reflect the time value of money. For the purpose of calculating the pension benefit obligation defined by Governmental Accounting Standards Board (GASB), this rate is equal to the estimated long-term rate of return on current and future investments of the pension plan.¹

Deferred Retirement Option Program (DROP): An optional voluntary program that allows employees who are entitled to retire and receive benefits under an employer's defined benefit retirement to continue working and receive pay and benefits as an active employee while accumulating service pension payments in a DROP account.

Employer's Contributions: Contributions made in relation to the employer's annual required contributions (ARC).⁴

Entry Age Actuarial Cost Method: A method by which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings or service of the individual between entry age and assumed exit age.²

Employer Contribution Rates: Contribution rates as a percentage of covered payroll that were adopted by the board of the public retirement system. Data is provided for each tier applicable to the system.

Fair Value: The amount the plan could reasonably expect to receive for an investment in a current sale between a willing buyer and a willing seller – that is, other than in a forced or liquidation sale.²

Fiduciary Fund Type: The trust and agency funds used to account for assets held by a government unit in a trustee capacity or as an agent for individuals, private organizations, other government units, and/or other funds.

Frozen Entry Age Actuarial Cost Method: A method by which the excess of the actuarial present value of projected benefits of the group included in an actuarial valuation, over the sum of the actuarial value of assets plus the unfunded frozen actuarial accrued liability, is allocated on a level basis over the earnings or service of the group between the valuation date and the assumed exit date.²

Funded Pension Plan: A pension plan in which contributions are made and assets are accumulated to pay benefits to potential recipients before cash payments to recipients are actually required.¹

Appendix C Definitions (Continued)

Funding Policy: In the context of pension plans, the program for the amounts and timing of contributions to be made by the plan member, employer(s), and others to provide the benefits specified by pension plan contributing entities (for example, state government contributions to a local government plan).²

Funding Ratio: The actuarial value of benefit obligations accrued to date, compared to the pension plan assets, expressed as a percentage.⁵

Investment Return Assumption (Discount Rate): The rate used to adjust a series of future payments to reflect the time value of money.⁴

Level Dollar Amortization Method: The amount to be amortized is divided into equal dollar amounts, to be paid over a given number of years; part of each payment is interest and part is principal (similar to a mortgage payment on a building). Because payroll can be expected to increase as a result of inflation, level dollar payments generally represent a decreasing percentage of payroll. In dollars adjusted for inflation, the payments can be expected to decrease over time.⁴

Level Percentage of Projected Payroll Amortization Method: Amortization payments are calculated so that they are a constant percentage of the projected payroll of active plan members over a given number of years. The dollar amount of the payments generally increases over time as payroll increases due to inflation. In dollars adjusted for inflation, the payments can be expected to remain level.⁴

Noncontributing Employers: In the context of pension disclosures for governments, employers that are not legally responsible for making contributions to a PERS but whose employees are covered by a PERS because of contributions made by another entity.¹

Nonemployer Contributor: In the context of pension disclosures for governments, a government that makes contributions to a PERS to provide benefits to employees of another government (e.g., a state may make the employer's pension contribution for school districts in the state).¹

Normal Cost: The portion of the actuarial present value of pension plan benefits and expenses allocated to a valuation year by the actuarial cost method. This amount does not include any payment related to an unfunded actuarial accrued liability. For plans financed in part by employee contributions, normal cost ordinarily refers to the total of employee contributions and employer normal cost.¹

Open Group/Closed Group: Terms used to distinguish between two classes of actuarial cost methods. Under an open group actuarial cost method, actuarial present values associated with expected future entrants are considered. Under a closed group actuarial cost method, actuarial present values associated with future entrants are not considered.⁴

Appendix C Definitions (Continued)

Other Postemployment Benefits (OPEB): Other postemployment healthcare benefits, regardless of the type of plan that provides them, and all postemployment benefits provided through a plan that does not provide retirement income, except benefits defined as special termination benefits in National Council Governmental Accounting (NCGA) Interpretation 8, Certain Pension Matters, as amended.⁴

Pay-As-You-Go Basis: A method of financing a pension plan by which the contributions to the plan are generally made at about the same time and in about the same amount as benefit payments and expenses coming due.¹

Pension Contribution: The amount paid into a pension plan by an employer (or employee), pursuant to the terms of the plan, state law, actuarial calculations, or some other basis for determinations.¹

Pension Liabilities: The amount recognized by an employer in a fund or in the general long-term debt account group for contributions to a pension plan that are less than pension expenditures/expense.⁴

Pension Trust Fund: A fund held by a governmental entity in a trustee capacity for pension plan members, used to account for the accumulation of assets for the purpose of paying benefits when they become due in accordance with the terms of the plan. Also, a pension plan included in the financial reporting entity of the plan sponsor or a participating employer.⁴

Projected Benefit Liabilities: As used in Statement of Financial Accounting Standards (SFAS) No. 87, the actuarial present value as of a date of all benefits attributed by the pension benefit formula to employee service rendered before that date. The projected benefit obligation is measured using assumptions as to future compensation levels if the pension benefit formula is based on those future compensation levels (pay-related, final-pay, final-average-pay, or career-average-pay plans).¹

Ratio of Retired to Total: The sum of retired, disabled, and survivors divided by total membership.

Single-Employer Plan: A plan that covers the current and former employees, including beneficiaries, of only one employer.⁴

Standardized Measure of the Pension Benefit Obligation: The actuarial present value of credited projected benefits produced by the projected unit credit actuarial cost method, prorated on service and other measurement requirements specified in GASB Statement No. 5 (superseded by GASB Statement No. 25).²

Trustee: A fiduciary holding property on behalf of another.¹

Appendix C Definitions (Continued)

Unit-Credit Actuarial Cost Method: A method by which the benefits (projected or unprojected) of each individual included in an actuarial valuation are allocated by a consistent formula to valuation years. The actuarial present value of benefits allocated to a valuation year is called the normal cost. The actuarial present value of benefits allocated to all periods prior to a valuation year is called the actuarial accrued liability.²

Vested Benefit: A benefit for which the employer has an obligation to make payment even if an employee terminates; thus, the benefit is not contingent on an employee's future service.¹
